

LexisNexis®

MANAGED TECHNOLOGY SERVICES FROM LEXISNEXIS

Managing critical legal data can be a daunting undertaking. Having the right equipment and a trusted partner provides custodians of legal data the security and resources they need to succeed.

Ensure the security of your legal data with the help of an expert, experienced partner. Unlike other service providers, LexisNexis Managed Technology Services (MTS) specializes in the technology needs of the legal industry. We help you maintain the integrity of your data by understanding the unique security, compliance, chain of custody and case management requirements that form the IT needs of your practice.

**Work through some of your greatest
IT Challenges with MTS on your team**

Cloud & Cyber Security

Compliant Backup, Archiving and Disaster Recovery

Disclosure & Document Management

Secure Remote Access

The HLS team works with your needs to build out an Infrastructure as a Service (IaaS) plan that is scalable and secure, and cost effective. The IaaS private cloud built specifically for you allows you to host critical apps for your litigation, productivity and back office needs, while providing support for most litigation apps. Our services include an account manager who is with you every step of the way. Guiding you through your organization's private portal into an infrastructure environment built for your needs. All backed by 24/7/365 support, enterprise security and redundancy, and matter level billing to help you recoup costs efficiently and effectively.

Co-location from LexisNexis MTS offers you the ability to use our world class SSAE16 certified Tier III designed data centers to house your equipment of choice. Reduce your costs by using shared resources such as power, cooling, communications and data center floor space and maintain complete control over your systems. We provide you with 24/7/365 onsite and remote support without you having to make additional investments in your IT support team. Get the most out of the investments you have already made in your IT.

LexisNexis MTS offers multiple solutions to cover your wide area network (WAN) needs. If you already have the circuits and equipment in place, we can offer WAN Management as a Service to ensure your systems remain up and running with the highest available speeds possible. Time to upgrade your infrastructure but don't want a huge upfront capital expenditure? We offer WAN as a Service to design, provision, and monitor circuits and WAN in either single or fully redundant models, with industry leading SLA's.

Security is a top priority for LexisNexis MTS as it should be for every organization. We work side by side with you to identify and remediate infrastructure weaknesses while providing audit and certification survey support. LexisNexis MTS has achieved some of the highest security industry certifications and implemented the gold standard of assurance programs so that you may rest easy (ISO, SOC, ITAR, Safe Harbor, etc.).

No organization can afford downtime regardless of the cause. Missed billable hours, missed court appearances and missing data can cause you to lose clients and credibility. DRaaS from LexisNexis MTS can help you get back up and running when disaster strikes. Our virtual machines are up and running in the event that your primary storage facility fails, so you are positioned for success even in the worst of circumstances.

LexisNexis MTS can give you an advantage by reducing costs and risk while increasing productivity and collaboration. With scalable global offerings, we will partner with you to create the perfect solution for your litigation needs. When undertaking the daunting task of managing your critical systems, data, and data access you can feel secure knowing you are not alone with LexisNexisMTS.

With more than 35 years of experience managing large amounts of legal industry data, LexisNexis MTS is fully equipped to keep your data safe. You'll feel secure partnering with our data experts, knowing we have the equipment and infrastructure necessary to keep all links of the custody chain intact.

Why LexisNexis MTS

LexisNexis has been the leading data-hosting platform for the legal industry for more than 35 years. LexisNexis Managed Technology Services provides a fully managed virtual cloud, world-class storage, security and network connectivity in our Tier III rated data centers. LexisNexis maintains several certifications and assurance programs including SOC 1 (SSAE 16), SOC 2, ISO/IEC 27001:2013 and ISO/IEC 9001:2008 to ensure we provide the highest quality services in the industry. Our solutions protect critical systems, data and access by leveraging best practices and technology, while providing unparalleled customer care and a wide range of value-added services.
