

LexisNexis®

HOSTED LITIGATION SOLUTIONS

MANAGED TECHNOLOGY SERVICES FROM LEXISNEXIS

LexisNexis® Hosted Litigation Solutions (HLS) is your organization's litigation managed infrastructure and storage partner. Unlike generic providers, we understand that your data isn't just "data"... it's evidence and we provide the security, chain of custody, redundancy and scalability that it requires.

The HLS team works with your needs to build out an Infrastructure as a Service (IaaS) plan that is scalable, secure, and cost effective. Your account manager is with you every step of the way guiding you through your organization's private portal into an infrastructure environment built for your specific needs. All this is backed by 24/7/365 support, enterprise security and redundancy, and matter-level billing to help you recoup costs efficiently and effectively.

of the AmLaw 200 embrace cloud computing¹

of all respondents identified security management as their top IT challenge followed by email management²

of this year's respondents reported that they use outside technology consultants to assist with some aspect of firm operations, technology or infrastructure.

Security

LexisNexis Hosted Litigation Solutions provides you with dedicated servers at our secure, state-of-the-art data centers, which are managed by our highly trained data security specialists. Our data centers are Tier 3 certified with SSAE-16/ ISO 27001/14001/9001 and SOC 2 certified controls. Data is handled securely through limited access loading rooms at our data centers or through high performance data transfer capabilities which are immune to network latency. Secure accessibility is obtained with a dedicated domain and VLAN and remotely through a private VPN with available two-factor authentication.

Risk Management

Reduce your exposure to data security problems by enlisting the services of LexisNexis Hosted Litigation Solutions. By hosting your litigation environment with LexisNexis, we take on the risk of data breach and the burden of disaster recovery. We do this while keeping up with the latest in security best practices, such as default denial, defense in depth, and encryption at rest and in transit. Security is always changing, we make sure we keep up with certifications and security vulnerabilities as they are announced or become apparent. Through your own private cloud environment, you can securely collaborate across law firms, in-house legal teams and litigation support bureaus while restricting access both internally and externally.

Convenience & Scalability

You are in the business of practicing law, not managing infrastructure or updating IT needs. LexisNexis provides the infrastructure you need to focus on your clients. HLS is application agnostic and so you can choose the litigation tools that you want while we host them in your own private cloud. Unexpectedly need more storage? Need to accommodate discovery for a new case? We're on it. Our support team is standing by to provide the help you need – when you need it.

Expertise

We have the skills and knowledge to ensure your environment's security while helping you mitigate risk. We hire and continually train the best data security and technology infrastructure specialists so that our own data stays secure and available. You can reap the rewards from these efforts without having to build out your own security and data management groups. All of our environments include encrypted data storage, snapshots, replication and VPN with global data centers to fit your geographic needs.

Why LexisNexis MTS

LexisNexis has been the leading data-hosting platform for the legal industry for more than 35 years. LexisNexis Managed Technology Services provides a fully managed virtual cloud, world-class storage, security and network connectivity in our Tier III rated data centers. LexisNexis maintains several certifications and assurance programs including SOC 1 (SSAE 16), SOC 2, ISO/IEC 27001:2013 and ISO/IEC 9001:2008 to ensure we provide the highest quality services in the industry. Our solutions protect critical systems, data and access by leveraging best practices and technology, while providing unparalleled customer care and a wide range of value-added services.
