

Lexis® DiscoveryIQ

LexisNexis®

EVERY CASE HAS A STORY FIND IT FASTER

Lexis® Discovery IQ with Brainspace™ Smart Analytics

Millions of documents, yet as many as 90% have no relevance. Why wait until Review to hone terabytes of data when Lexis DiscoveryIQ powers PreDiscovery with the Smart Analytics that find the real story faster? Why indeed?

See every detail that matters – and a ton less of what doesn't – before Review. "Near-dupe" technology in Lexis DiscoveryIQ sifts out 85%¹ of non-relevant data during Early Case Assessment by filtering documents at the metadata level.

PreDiscovery =

85%
LESS TO REVIEW

70%
\$PEND

To save money, follow the money. With more than seven out of every ten cents of document production costs consumed in Review², Lexis DiscoveryIQ vastly reduces expenditures by greatly reducing the number of non-relevant documents that make it to Review.

**60-90
PERCENT
FASTER**

More focused data set =
More focused Review.

Prioritized Review from Brainspace speeds Review by 60- to 90 percent³, so high-value talent can drill into strategy earlier, achieving faster, better results, ultimately attracting more high-value work.
