Lexis® DiscoveryIQ

EVERY CASE HAS A STORY. FIND IT FASTER.

Introducing Lexis® DiscoveryIQ

There's nothing unusual about having to deal with millions, even tens of millions of documents in litigation cases.

So why wait until Review to reduce all that data down to what's actually relevant?

Lexis® DiscoveryIQ puts the power of advanced analytics technology to work in the PreDiscovery phase to filter out 85% of data, including anything that is non-relevant, non-responsive and duplicative, then makes it possible to speed Review by 60-to-90 percent with the patented machine-learning capabilities and predictive coding of Prioritized Review from Brainspace™.

Essential data extracted. Connections uncovered. Case insights brought to light.

Minimizing costs. Increasing efficiencies. From PreDiscovery to Review to Processing and Production.

With market-leading processing speeds, Lexis DiscoveryIQ helps you make the connections that make the case faster, even while saving money.

The true brilliance of the Lexis DiscoveryIQ platform, though, is in saving time and money while also ensuring that not even the tiniest byte of relevant data slips through unnoticed, practically eliminating defensibility concerns.

Lexis DiscoveryIQ documents every detail every step along the litigation way so there's never any question about the defensibility of your work.

And it's all accomplished on commodity hardware so you can reduce your hardware footprint and cost.

Processing and Production

Lexis DiscoveryIQ eliminates duplicate, non-relevant and non-responsive files even during processing and production phases so you can be sure you're only spending time and resources on what's essential.

By working as a "production engine" to quickly scan, import and process both paper and electronic evidence documents, Lexis DiscoveryIQ helps you gain greater control of the volume of data, reduce litigation costs and maintain a seamless chain of custody throughout discovery.

Analytics

Lexis DiscoveryIQ powers every stage of eDiscovery from PreDiscovery on with Predictive Coding and other types of Technology Assisted Review (TAR) such as "near-dupe" analytics to filter out anything that's duplicative, non-responsive or not relevant to the case, greatly decreasing the universe of materials going forward and ensuring that every document left behind helps uncover the real story of the case at hand.

Lexis DiscoveryIQ helps you more efficiently identify case strengths and weaknesses, with all the essential information needed to evaluate whether it's more financially advantageous to settle or pursue the case further.

Review

With the vast majority of non-relevant data eliminated in the Early Case Assessment phase, Lexis DiscoveryIQ makes every Review minute count.

High-value Review talent get clearer, more concise insights from minute one, so they can put their efforts toward mapping out case strategy with no wasted time, no wasted effort chasing dead-ends.

Whether you're a law firm or legal service provider, you benefit from taking a more consultative approach with your clients, providing greater value to them while you benefit from a growing reputation among other high-value clients and ultimately, increased profits.

Brainspace Smart Analytics Integrated Solutions

Brainspace modules are fully-integrated with the Lexis DiscoveryIQ platform, adding the power of machine-learning analytics technology that works the way the human brain works, intuitively, to surface connections that might otherwise remain hidden, further improving the speed, performance and scalability of Lexis DiscoveryIQ.

- Lexis DiscoveryIQ Advanced includes the Lexis DiscoveryIQ base platform PLUS patented Brainspace Smart Review to uncover case connections that would be nearly impossible to discover with human or artificial intelligence alone.
- Lexis DiscoveryIQ Premier includes the Lexis DiscoveryIQ base platform PLUS Brainspace Smart Review PLUS Brainspace Discovery 5, the most advanced Brainspace technology in existence. Discovery 5 helps visualize unstructured data connections graphically so you get an even clearer picture of every case's essential story.
