

**FIRST, IT TACKLED ANALYSIS.
NOW, IT HANDLES EVEN MORE.**

Introducing LexisNexis CaseMap 12.1. Now with review and production.

CaseMap 12.1 has new killer features – it lets you redact, code documents, produce, and quickly search all within a single solution. For smaller cases, it means you no longer need third-party solutions to manage eDiscovery.

CaseMap is the essential litigation solution for smaller cases. It allows you to capture and organize facts, documents, persons, evidence, issues and legal research relevant to your case in a centralized repository, and keep vital information at your fingertips

CaseMap simplifies your litigation evidence (and does more with what's left)

Gather critical information directly from PDFs, Concordance® Desktop software, Microsoft® Word®, lexis.com®, Lexis Advance® and more. Send it to CaseMap while maintaining a record and the ability to link back.

Collaborate with your team on case data that is hosted on a central server allowing your team to work on a case concurrently and identify connections faster.

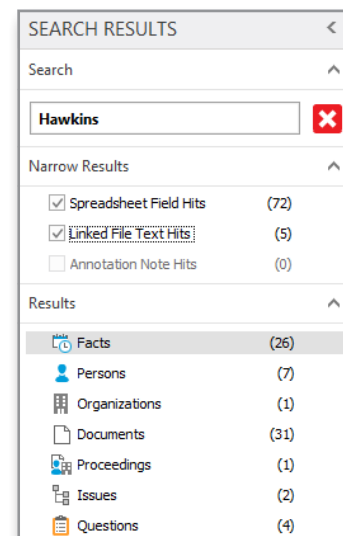

Integrate with Lexis Advance easily with a right-click so that your downloaded research stays just as live, searchable and organized as you found it.

With CaseMap software, you can easily organize, analyze and communicate critical case information.

CaseMap case analysis software helps you achieve optimal case outcomes faster

- Benefit from an easy-to-use, modern interface. The CaseMap ribbon displays your favorite features, and descriptive hints help you along.
- Organize witness lists, a master-fact chronology and document indices, plus privilege logs, deposition summaries and case issues you're trying to prove.
- Tie together the facts, issues, people and evidence—see connections you might otherwise miss.
- Compile this knowledge into polished reports for better case communication with clients.
- Share case research and insight across offices, with co-counsel and clients for stronger collaboration.
- Increase efficiency so you can take on more cases without sacrificing client service.

Search your entire case file and then narrow results, as desired.

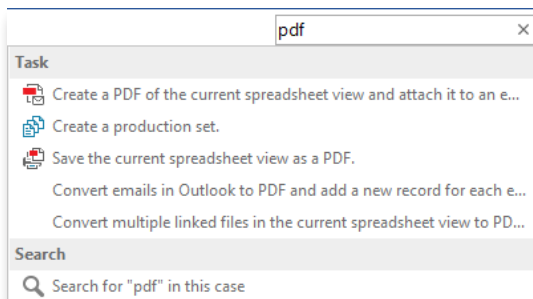

What's New for CaseMap 12.1: Navigate tasks, reports, help and search

Smart Assist

The Smart Assist guided approach helps users accomplish tasks, search case data, and bridges gaps to find the things they are looking for. Type in keywords in search textbox and get results based on functional areas in CaseMap and displayed in terms of relevancy of search. Smart Assist benefits both the novice and veteran of CaseMap. It reduces the learning curve for novices so they can start using CaseMap right away, and refreshes the memory of the veteran if they haven't used the software in a while.

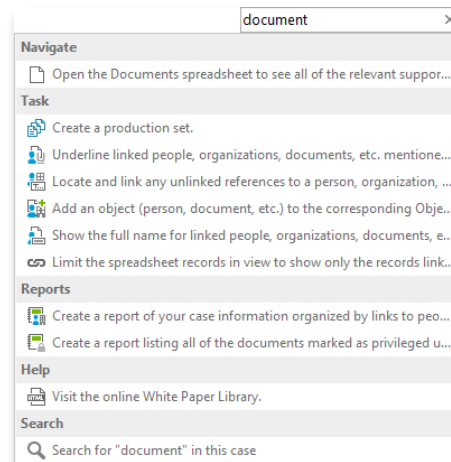

Very easily navigate software with keywords in Smart Assist.

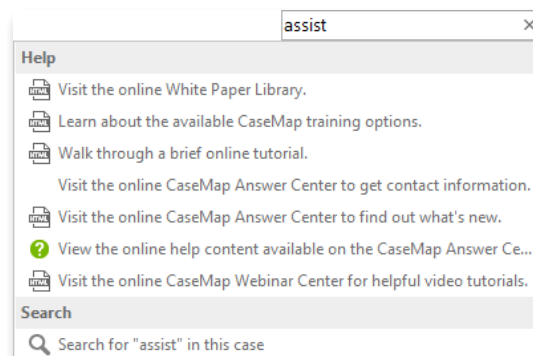

Quickly generate reports from CaseMap based on the spreadsheet you are in, for example type in PDF and generate a PDF report.

Use Smart Assist to facilitate searching for information within your case file.

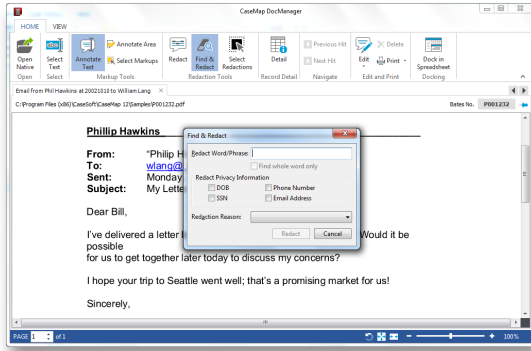

Perform various task-based functions in the software such as opening a document, linking an issue, sending information to Excel, etc.

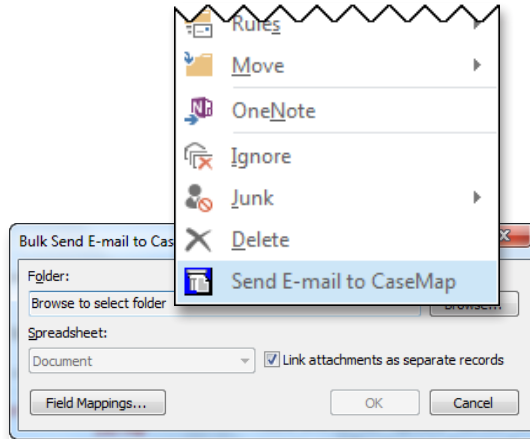

Type in keywords to quickly find helpful results, like access to the Answer Center, to learn more about CaseMap and get the help you need.

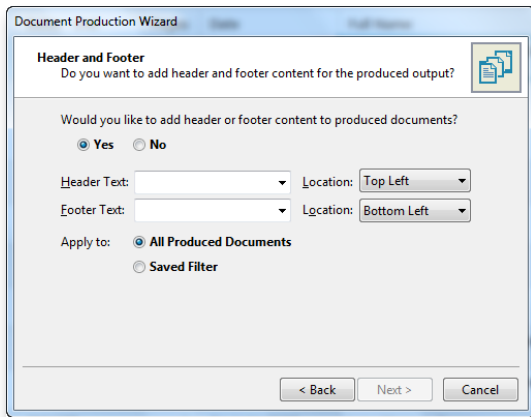

Other new features

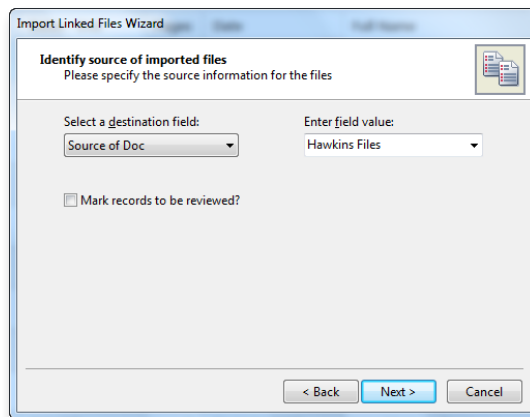

Find & Redact- improve productivity.

Expanded outlook plug in- bulk send emails and extract attachments.

Enhanced document production- provides more flexibility for rendering and output options, can now render in gray scale and output can be saved as a TIFF file and can add headers and footers to produced documents.

Document import- specify a source for imported files to jumpstart coding of information- simplifying process and eliminating step of manual entry.

CaseMap also enables you to assemble your case and to:

- Search your entire case including spreadsheets and documents
- Create advanced reports with key document links right in the reports for quick access
- Import multiple files and folders in one step
- Make text within images searchable using optical character recognition (OCR) with multiple images
- Streamline your workflow by taking advantage of Microsoft integration and optional collaboration tools.

Plus, the CaseMap® DocManager feature provides a single interface for you to view, annotate, hit-highlight, Bates stamp, batch print, and batch convert files.

In the course of organizing your case, you can link documents to certain records in CaseMap spreadsheets. You can then easily embed those linked documents in PDF ReportBooks, making it easier to prepare thoroughly for presentations during arbitration and trial.

“... the break in that evidence connection turned up through organizing the data in CaseMap.”

Sean O'Brien Associate Professor, School of Law University of Missouri-Kansas City, who led a legal team to exonerate an innocent man who had served 15 years in jail for a crime he didn't commit.

It all works together: CaseMap, TextMap, TimeMap and Sanction software

Integration between CaseMap®, TextMap®, TimeMap® and Sanction® software helps you perform critical assessment of all facts, issues and case law. For example:

- Send CaseMap issue outlines to TextMap and maintain the outline hierarchy
- Include linked CaseMap facts when you generate TextMap reports
- Share linked documents and exhibits between CaseMap and TextMap
- Annotate a transcript and send it as a fact into CaseMap for analysis in the context of other case facts
- Send deposition facts to CaseMap
- Achieve quick, effective timeline graphing by sending key passages and depositions to TimeMap software
- Easily send timelines to CaseMap or Sanction software
- Send documents from CaseMap to Sanction software to use in presentations
- Transfer transcripts and video annotations from TextMap to Sanction for presentation
