

## LexisNexis® Intellectual Property Solutions

Be confident you're covering all the bases.

### *Successful businesses are built on intellectual property; protecting it depends on you.*

When it comes to patents, LexisNexis® has an expertly designed suite of solutions to help you work smartly, efficiently and confidently. These solutions provide direction in a tangle of information, helping you successfully develop, maintain and protect intellectual property assets.

#### **TotalPatent™ delivers the most precise, dynamic patent research, retrieval and analysis service available**

Whether you're looking for growth opportunities, doing deep patent research, performing a trends analysis or investigating potential infringement, TotalPatent™ makes the process easier.

#### **You can be confident your research will be comprehensive and precise.**

- Quickly access the world's largest collection of searchable, patent authorities—30 full-text and 70 bibliographic—using one, easy-to-use interface
- Search in the original language of publication or in English translation
- Save time with 50+ million PDF images that are searchable, bookmarked, multi-page and compressed
- Monitor industry trends and developments with alerting and profiling tools
- Save, organize, annotate and share your results using flexible work folders
- Utilize analytics tools to create graphical maps and bar charts online, as well as allowing offline analysis of results with 3-D graphs and charts
- Search conceptually using the semantic search option to help you identify concepts related to the terms in your search query
- Link to and from *PatentOptimizer™* and IP sources at *lexis.com®* for seamless integration into your workflow
- Compare and analyze up to three search results sets

When it comes to innovation and protection of intellectual property, TotalPatent can help you be confident you're covering all the bases in your prior art research.

#### **PatentOptimizer™ helps you improve the quality and efficiency of your patent analysis and applications**

Streamline patent analysis and application drafting with *PatentOptimizer*. Developed by patent attorneys, this solution helps you deliver consistently strong, high-quality patent applications in a relatively short period of time as well as quickly uncovering potential gaps and irregularities in online-issued patents. In addition, the new *PatentOptimizer* analytics feature helps you uncover critical data relationships, hidden trends and more across an entire patent portfolio.

#### **Your patent drafting and analysis can be faster and more consistent than ever before.**

- Draft higher-quality patent applications with tools that help you by serving as critical quality control to check claims, terms, references, parts and more
- Correct inconsistencies with flexible document editing capabilities
- Verify, investigate and export information related to patents referenced in your document
- Analyze patents to assess areas of weakness and form higher-value litigation strategies
- Create comprehensive reports that identify claim issues, generate pre-populated IDS forms and more
- Link to some of the most popular dictionaries and thesauri on the Internet
- Link to and from TotalPatent, IP sources at *lexis.com* and other related sources and tools

When the strength of your patents can make or break a business strategy, *PatentOptimizer* can help improve the quality even as it saves you time by streamlining patent analysis and application drafting.

## IP sources at *lexis.com*®: an unrivalled collection of IP resources

From comprehensive prior art databases to authoritative analytical resources and beyond, the intellectual property sources at *lexis.com* deliver the broadest, deepest collection of IP resources anywhere.

### From a single source you can:

- Confidently license inventions, litigate against infringements, protect patents internationally, and advise your company with expert commentary and proprietary analytical content from leading industry authorities
- Ensure your prior art research is as thorough as possible with quick access to the full text of leading non-patent prior art sources, including IP.com, Research Disclosure and Elsevier journals as well as other scientific, technological and related information
- Stay on top of IP issues and laws worldwide with Global IP Law Service
- Follow industry-specific news with access to thousands of full-text, English-language news sources, including top U.S. and international newspapers, magazines, journals, television and radio networks, blogs, wire services, and more

IP sources at *lexis.com* gives you access to valued information from a single provider. You no longer have to search multiple databases for due diligence, industry news, non-patent prior art research or infringement cases.

## Put LexisNexis Intellectual Property Solutions to work for you.

For a personal demonstration or to discuss a trial, contact your LexisNexis® IP Specialist or call **800.227.4908** and ask for your IP Specialist representative.
