

## Introducing Knowledge Mosaic® Research for Corporate Secretaries & Governance Professionals

The Knowledge Mosaic® research platform and new service is an indispensable resource for corporate secretaries and governance professionals. With intuitive and versatile search capabilities for SEC filings, a complete collection of federal laws and regulations, extensive federal agency rulemaking materials, and commentary provided from 100,000 law firm memos, Knowledge Mosaic offers an unrivaled balance between comprehensive content and affordability.

### Keep Current

- Identify Dodd-Frank rulemaking that's relevant to you, with topic-based searching, rule proposals mapped to the Act, searching by release date, effective date, comment period end date, and compliance date, and public comments mapped to rule proposals. You can also limit your search by agency or set up customizable daily alerts.
- Stay on top of the latest actions from a broad range of federal agencies and regulatory bodies.
- Review commentary and analysis from the world press, law firms, and the industry's most trusted bloggers.

### Enforcement & Litigation

Supplementing the broader enforcement data available in the Laws, Rules, Agencies section, our Enforcement & Litigation section offers hand-tagged data to allow for highly targeted searching of public company investigation disclosure, as well as enforcement or adjudication actions by the SEC, CFTC, and FINRA®.

### Laws, Rules, Agencies

From a single platform, cross-search or browse across the federal regulatory landscape, including:

- The complete U.S. Code
- The complete CFR
- All bills in current Congress
- The full Federal Register dating back to 1998
- Agency materials from a broad range of business regulators, including the SEC (no action letters, form instructions), CFTC, FDIC, FTC, DOJ, FINRA, and many more.

Explore this extensive database using dynamic faceting, which allows you to refine or redirect your search even as you dig into the universe of relevant results. Filter by agency or browse by document category, including enforcement, guidance, rulemaking, news releases, or speeches and testimony. Results feature Key Word in Context (KWIC™) highlighting and are sorted by relevance.

### SEC Disclosure & Transactions

- Robust search fields at both the filing and company levels complement full Boolean text search capabilities, helping you quickly find relevant language from SEC EDGAR® filings. Filter by a filer's location, industry, financial characteristics, and index membership.
- Search at the exhibit level, allowing you to bypass the base filing and get precedent language for substantive documents by putting keywords—e.g., merger agreement—in our Exhibit Label text search box.
- Eliminate the clutter with 8-K and 10-K item-level searching: find just what you're looking for and skip the rest.
- For even more targeted searches, utilize additional search pages tailored to specific types of SEC filings, including:
  - A newly enhanced proprietary database of law firm relationships to identify firms that represent issuers.
  - Search pages dedicated to securities registrations, risk factors, SEC comment letters, and insider filings.

### Law Firm Memos

This unrivaled database of expert commentary features almost 100,000 memos from the world's top legal and accounting firms. Keep up with the latest legal developments, or do in-depth research on special topics. Our memos now cover a broad range of 46 practice areas, from Accounting & Auditing to Trusts & Estates. You can also create daily email alerts by authoring firm, practice area, and text string.

A Knowledge Mosaic® license also includes full access to our industry's best customer support, research assistance and training. Whether you need help refining a search, don't know where to begin, or just want to get caught up on all our latest features and datasets, our knowledgeable support staff is only a call or email away.
