Lexis® Diligence Enhancements

Lexis® Diligence enhancements are designed to provide you with greater flexibility and customization, as well as enhanced news and company information.

Enhancements include:

Availability of Experian Commercial Credit Scores. Quickly understand the financial health of third parties with financial and credit scores from Experian®, the leader in consumer and business credit reporting. Available as a new add-on to your Lexis Diligence subscription, Experian data can help you predict a third party's future financial health with vital background and company financial ratios and risk scores. To inquire about adding Experian commercial credit data to your subscription, please call 800.227.4908.

Enhanced Report Builder. The Lexis Diligence Report Builder enables users to save documents from across different sources into one customized due diligence report. Now, you can also add public records documents to your customized due diligence report—reducing the need for separate documents and providing you with an even more comprehensive view of the company or person you're searching. As always, you can add your own annotations to the report to summarize key points or highlight next steps for other reviewers.

Google Maps™ Integration. Company Reports now integrate the Google Maps service to help you understand the context of a company's location and identify possible fraud. When a complete address is included within a document, an icon will appear beside the address; clicking this icon will open Google Maps in a new window. This feature is included for the following sources: Company Reports, D&B® Global Profiles and Experian Commercial Credit Scores (for those with an Experian subscription).

Addition of Positive News. Coming Soon! In addition to Negative News, you will soon have access to Positive News on the Person Check and Company Check search forms. Positive News is designed to deliver a set of results that captures positive topics related to a company or person, such as job expansion, earnings growth, customer satisfaction and charitable giving. Like Negative News, Positive News will be available in 17 languages and customizable queries can be saved for ongoing use.
