

## LexisNexis® IP Portfolio

Supporting you at every stage of the patent workflow

Developing and retaining quality intellectual property drives innovation and advances the economy. Bringing it to life in the most efficient and comprehensive manner, understanding the competitive landscape and extracting the maximum value from your patents is critical to your success.

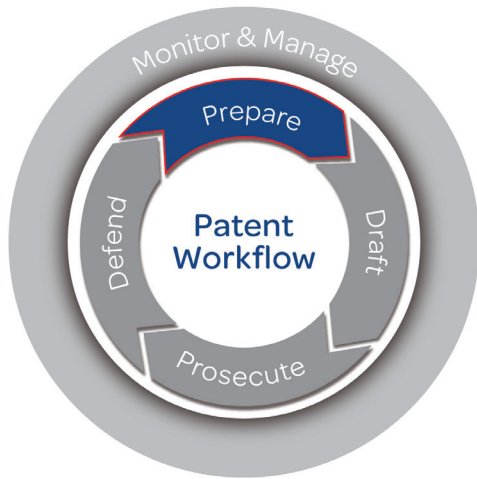

You need a partner that offers customizable, innovative tools to deliver insights with a strategic edge.

The LexisNexis® IP Portfolio offers services that span the patent workflow. The LexisNexis suite of services and solutions were created by patent attorneys and refined by input from customers who understand the underlying needs of patent professionals. They have been developed to provide a comprehensive approach across the patent workflow with solutions that are uniquely designed to meet your needs as you prepare, draft, prosecute, defend, monitor and manage patents.

## PREPARE

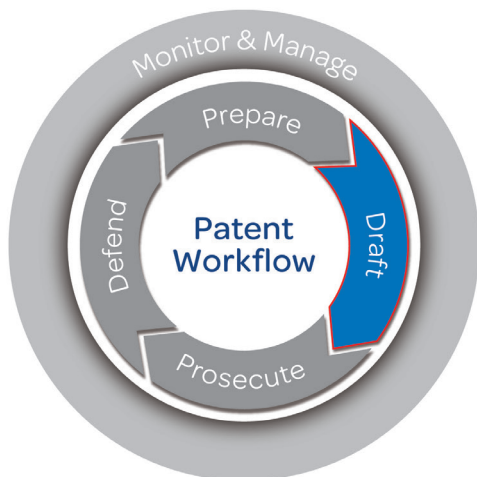

LexisNexis® TotalPatent® provides peace of mind when conducting patent research. It is the most comprehensive, precise and dynamic patent research and retrieval service available anywhere. This powerful tool features the world's largest collection of searchable full-text and bibliographic abstract patent documents from over 100 patent authorities with more patent records than any other competitor. It includes the ability to view images, high-quality translations into English, citations, legal status and patent family collections. TotalPatent makes researching patent documents easier and faster with name normalization and the option to use semantic search to uncover reliable results in the most efficient manner.

- Thoroughly and easily conduct prior art research by uncovering all relevant assignee variations with highly accurate name normalization and standardization
- Track innovation space, emerging markets and competitor developments
- Uncover related concepts in your patent and non-patent prior art research with semantic search

## DRAFT

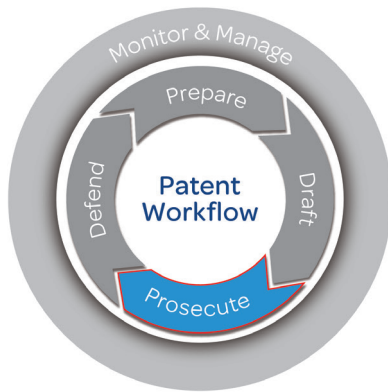

LexisNexis® PatentOptimizer™ offers revolutionary patent drafting technology that is unmatched by competitors. PatentOptimizer automates and streamlines the process of drafting high-quality patent applications while saving a significant amount of time. Easily search patents, including design patents, with the most powerful text-to-image viewer on the market, or utilize the exclusive patent thesaurus and master index of parts for a highly comprehensive view into the USPTO, EPO, and WIPO. Generate a comprehensive, configurable "one-click" error report that reduces drafting and review time and improves quality of patent applications.

- Perform critical quality control checks and streamline patent claims analysis
- Reduce legal risk and save time by ensuring your patent applications are consistent, concise and well-tailored
- Avoid preventable errors to focus on core patentability issues, saving time and money
- Draft high-quality patent claims with patent drawing software that helps you check for proper antecedent basis or possible lack of supporting the disclosure, adequate support in the drawings, terminology for court rulings and consistency in part labeling and numbering

## PROSECUTE

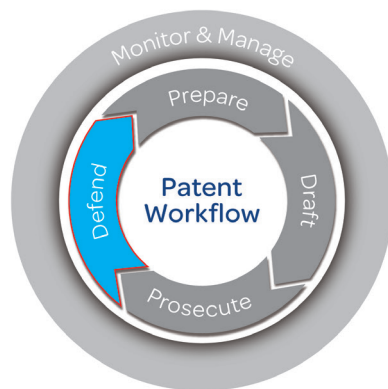

Bringing predictive analytics to patent prosecution to help you practice smarter, **LexisNexis® PatentAdvisor<sup>SM</sup>** provides access to the most comprehensive patent analytics available anywhere. PatentAdvisor, the first-ever data-driven patent strategy tool, provides a systemic approach to crafting an effective prosecution strategy and managing an IP portfolio. Understand why certain patent applications take longer than others to reach allowance—then use that knowledge to devise better prosecution strategies

- Improve patent prosecution with actionable data and analytics framed within the context of the entire patent office to support your patent prosecution strategy
- Manage a portfolio of patent applications more effectively with user-friendly visualization and filtering tools
- Identify at-risk patents so you can adjust your strategy to save time and money

## DEFEND

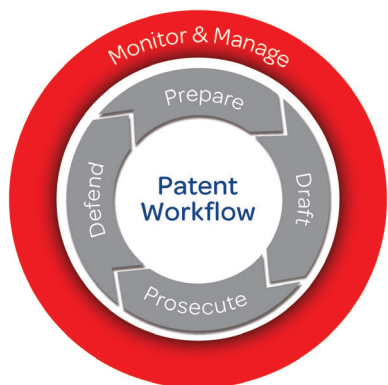

Analyze patents at issue in litigation to assess potential areas of weakness and form higher-value litigation strategies with **LexisNexis® PatentOptimizer<sup>TM</sup>**. **LexisNexis® TotalPatent<sup>®</sup>** delivers the timely information you need to monitor and invalidate competitive threats for better business outcomes more efficiently and at a lower cost. And easily access rare and older U.S. patent file histories, patent file wrappers, U.S. trademark file histories and international file histories through IP Services (formerly ReedFax<sup>®</sup>).

- Identify competitive threats, infringements and emerging issues that could impact your patent assets
- Analyze and dissect online-issued patents in litigation to assess potential areas of weakness and form higher-value litigation strategies
- Uncover critical data intersections, hidden trends, aggregate parts/elements nomenclature and ranked language variations
- Assess case precedence with case law including Markman orders

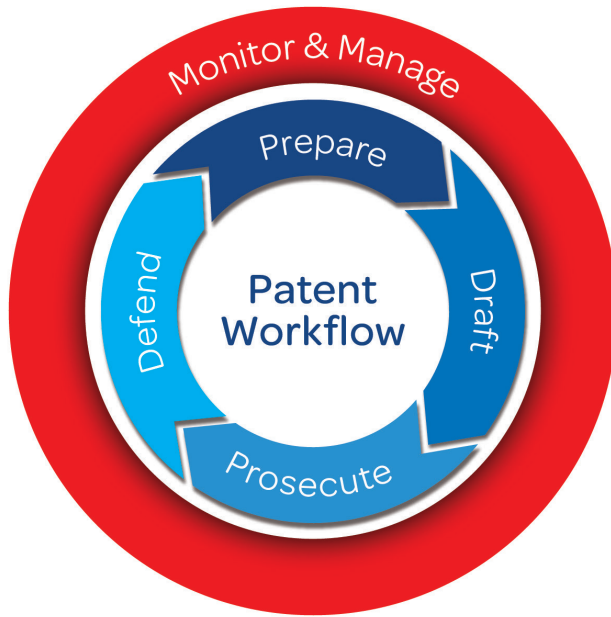

## MONITOR & MANAGE

The **LexisNexis® PatentAdvisor<sup>SM</sup>** patent portfolio management system utilizes predictive analytics to enable intellectual property professionals to gain more insight for better strategic decisions. In addition, **LexisNexis® PAIR Watch<sup>SM</sup>** automates patent application monitoring with email alert notifications for one patent or an entire portfolio.

- Manage your entire collection of public and private patent applications more effectively with real-time visualization of application status
- Identify and address problems with a visual representation of all pending, approved and abandoned patents in your portfolio
- Keep up with the prosecution status of patent applications regarding updates to the Image File Wrapper, Continuity Data or Transaction History
- Monitor one patent or an entire patent portfolio for changes in application status or pre-selected patterns of events

The LexisNexis® IP portfolio offers customizable, innovative services that span the patent workflow:

- Prepare by uncovering and analyzing primary-source documents to create stronger patent applications with LexisNexis® TotalPatent®.
- Draft your application to avoid § 112 rejections by conducting full patent document structural analysis and ensuring claim and specification synchronicity with LexisNexis® PatentOptimizer™.
- Prosecute more strategically by using never before available data to gain insight for a more precise approach customized to your specific needs with LexisNexis® PatentAdvisor™.
- Defend your portfolio by understanding potential opposition patents and having the ability to address them before they become an issue with LexisNexis® TotalPatent®, LexisNexis® PatentOptimizer™ and IP Services.
- Easily manage your entire portfolio of published and unpublished patent applications more effectively with innovative tools and monitor your own and your competitors' patent applications the smart way with automated alerts with LexisNexis® PatentAdvisor™ and LexisNexis® PAIR Watch™.
