Negative News Search Enhancements

Apply new options to adjust the relevancy of negative news search results:

- 1 Apply negative news search options to adjust relevancy by restricting search to medium or high negative levels—right in the search form. Simply click the radio button to indicate your preference.
- 2 Customize low, medium or high negative terms to conduct more focused searches.
- 3 Pre-set rules for high, medium and low negative levels from Admin Preferences view to facilitate ease-of-use for end users.

Negative News Search x

The Negative News option searches for your search terms in conjunction with terms below. You can edit the negative terms by changing them in the box below and clicking Save. These changes will be saved for the next time you return to the form. To go back to the original search, click 'Revert to original terms'.

How editing works

The Low Level Terms set contains all items. A subset of the low-level terms is shown in the Medium Level Terms set, and then a smaller subset is shown in the High Level Terms set.

Note: If you want to remove one or more high-level terms, you will need to delete them from all three sets (High, Medium, and Low). The easiest way to do this is to copy each set to a file, apply your changes, then paste the sets back into their respective boxes.
