

Monitor energy industry new technologies, trends and innovations with access to national and foreign news and business sources from LexisNexis®.

Publication	Description
Africa Energy Intelligence	Africa Energy Intelligence covers all energy matters in Africa: oil, gas, electricity, strategy, funding, legislation and politics. Africa Energy Intelligence, which succeeds Africa Energy & Mining, offers its subscribers a wide range of independent, fresh and reliable news on the energy industry (oil, gas and power) in Africa. To monitor the progress of projects in government offices, identify the real local and regional political decision makers, watch companies short-listed for contracts and follow last-minute bargaining with donors, Africa Energy Intelligence keeps its ear to the ground concerning the political, economic and diplomatic environment of energy projects and the intentions of domestic and foreign corporations.
Africa Energy Intelligence - Edition Française	Africa Energy Intelligence - Edition Française, which succeeds "La Lettre Afrique Energies", offers its subscribers a wide range of independent, fresh and reliable news on the energy industry (oil, gas and power) in Africa. To monitor the progress of projects in government offices, identify the real local and regional political decision-makers, watch companies short-listed for contracts and follow last-minute bargaining with donors, "Africa Energy Intelligence - Edition Française" keeps its ear to the ground concerning the political, economic and diplomatic environment of energy projects and the intentions of domestic and foreign corporations.
Africa Mining Intelligence - Edition Française	Africa Mining Intelligence - covers the entire mining industry in Africa, including: contracts, projects, prices, markets, politics It provides unique insight into emerging projects, legal disputes, the strategy of big mining groups and other players in the African mining sector. In order to monitor the progress of projects in government offices, identify the real local & regional political decision-makers, watch companies short-listed for contracts and follow last-minute bargaining with donors, "Africa Mining Intelligence - Edition Française" keeps its ear to the ground concerning the political, economic and diplomatic environment of energy projects and the intentions of domestic and foreign corporations.

Publication	Description
ASAPII Publications - Energy	The ASAPII file contains selected full-text documents from the following databases produced by Information Access Company including Computer, Magazine, Health, Periodicals, Trade and Industry.
Australian Bureau of Statistics; Environment & Energy, Environment	The Australian Bureau of Statistics (ABS) produces statistics on a wide range of environment and energy related activities. The ABS Centre for Environment and Energy Statistics (CEES) seeks to complement and add value to existing statistical activity through active partnerships with key agencies, including the States and Territories.
Australian Bureau of Statistics; Industry, Manufacturing Statistics (Energy & Commodity Production)	The Australian and New Zealand Standard Industrial Classification (ANZSIC) defines manufacturing as, "the physical or chemical transformation of materials or components into new products, whether the work is performed by machinery or by hand". This includes activities undertaken by a manufacturing business that are not in themselves manufacturing activities (e.g. repair or installation of goods produced, administration). This view of manufacturing measures all of the activities of only those organizations whose principal activity is manufacturing. The manufacturing activities undertaken by private individuals or organizations whose principal activity is not manufacturing are excluded from the ANZSIC definition.
BMI Americas Oil and Gas Insights	The Oil and Gas Insights series provides analysis, forecasts and company profiles on a country-by-country basis, covering the key trends affecting global oil and gas markets. Split into five regional publications covering Asia, Western Europe, Central & Eastern Europe, the Middle East & Africa and the Americas - the Insights examine the implications of global and region-wide trends at a regional, market-specific and company level. The Insights feature by-market forecasts, projecting how current trends will influence industry sales and consumption patterns in the future, as well as company analysis, designed to provide a better understanding of a market's competitive landscape.
BMI Asia Pacific Oil and Gas Insights	The Oil and Gas Insights series provides analysis, forecasts and company profiles on a country-by-country basis, covering the key trends affecting global oil and gas markets. Split into five regional publications covering Asia, Western Europe, Central & Eastern Europe, the Middle East & Africa and the Americas - the Insights examine the implications of global and region-wide trends at a regional, market-specific and company level. The Insights feature by-market forecasts, projecting how current trends will influence industry sales and consumption patterns in the future, as well as company analysis, designed to provide a better understanding of a market's competitive landscape.
BMI Emerging Europe Oil and Gas Insights	The Oil and Gas Insights series provides analysis, forecasts and company profiles on a country-by-country basis, covering the key trends affecting global oil and gas markets. Split into five regional publications covering Asia, Western Europe, Central & Eastern Europe, the Middle East & Africa and the Americas - the Insights examine the implications of global and region-wide trends at a regional, market-specific and company level. The Insights feature by-market forecasts, projecting how current trends will influence industry sales and consumption patterns in the future, as well as company analysis, designed to provide a better understanding of a market's competitive landscape.
BMI Middle East and Africa Oil and Gas Insights	The Oil and Gas Insights series provides analysis, forecasts and company profiles on a country-by-country basis, covering the key trends affecting global oil and gas markets. Split into five regional publications covering Asia, Western Europe, Central & Eastern Europe, the Middle East & Africa and the Americas—the Insights examine the implications of global and region-wide trends at a regional, market-specific and company level. The Insights feature by-market forecasts, projecting how current trends will influence industry sales and consumption patterns in the future, as well as company analysis, designed to provide a better understanding of a market's competitive landscape.

Publication	Description
BMI Oil & Gas Report	Business Monitor International's Industry Reports provide unparalleled analysis of global industries and research on leading companies in Emerging Markets. They cover all key global developments influencing company strategy, including country, regional and global supply and demand dynamics. BMI's Reports contain business-focused analytical content which enables analysts, economists and senior management to plan company strategy, manage risks and identify new opportunities for specific country markets. Each report features BMI's independent 10-year forecasts for oil and gas and LNG, covering all major indicators including reserves, production, consumption, refining capacity, prices, export volumes and values. Industry trends and prospects are analyzed, as well as multinational and national companies, and changes in the regulatory environment.
BMI Power Report	Business Monitor International's Industry Reports provide unparalleled analysis of global industries and research on leading companies in Emerging Markets. They cover all key global developments influencing company strategy, including country, regional and global supply and demand dynamics. BMI's Reports contain business-focused analytical content which enables analysts, economists and senior management to plan company strategy, manage risks and identify new opportunities for specific country markets. Each report features BMI's market assessment and independent 10-year forecasts covering electricity generation by fuel - gas, coal, oil, nuclear, hydro and renewables- plus consumption, trade, generation costs and transmission. The impact of regulatory changes, recent developments and the background macroeconomic outlook are analyzed, and competitive landscapes are provided comparing multinational and national operators by sales, market share, investments, projects, partners and expansion strategies.
<i>BMI Renewables Report</i>	The BMI Renewables Report researched at source contains BMI Research's assessment of the current renewables market in each of the countries covered. The report also contains historical data together with forecasts covering electricity generation (TWh) and electricity capacity (MW). The renewables sectors covered include Wind, Solar, Geothermal, Tidal and Wave, and Biomass. The report also features details on government green energy agendas and funding opportunities, as well as presenting a detailed list of key renewables projects currently being planned or undertaken, their capacity, the timeframe of construction and their current status. The report discusses the various energy policies currently in force, including targets, subsidies and the relevant infrastructure developments or limitations which might impact on renewables growth, analyzing the potential effects of regulatory changes in conjunction with the background macroeconomic outlook. Finally, there is a general overview of the competitive landscape, together with a detailed summary of the main utilities and manufacturers present and their business operations.
BMI Water Report	The BMI Water Report has been researched at source and features latest-available data covering public and private sector investment in all major water projects including water extraction, water distribution and water treatment and sanitation projects and also includes competitive intelligence. The report features BMI Research's independent industry forecasts and analysis of latest industry news, trends and regulatory developments across the countries covered. BMI's Water Report provides industry professionals and strategists, sector analysts, business investors, trade associations and regulatory bodies with independent forecasts and competitive intelligence on the water industry in each country. Coverage BMI Industry View: Summary of BMI's key industry forecasts, views and trend analysis covering regulatory changes, major investments and projects and significant national and multinational company developments.
BMI Western Europe Oil and Gas Insights	The Oil and Gas Insights series provides analysis, forecasts and company profiles on a country-by-country basis, covering the key trends affecting global oil and gas markets. Split into five regional publications covering Asia, Western Europe, Central & Eastern Europe, the Middle East & Africa and the Americas—the Insights examine the implications of global and region-wide trends at a regional, market-specific and company level.
California Energy & Climate Report	California Energy & Climate Report is a subscription-based weekly emailed newsletter covering the development of greenhouse gas regulations and the renewables and clean-energy revolution taking place in California. Tapping the editorial excellence of Inside Cal/EPA and InsideEPA.com, our new California Energy & Climate Report keeps readers up to speed on the emerging regulations and policies that are setting the pace for the rest of the country.

Publication	Description
CEE Energy NewsWatch Today	A newsletter produced daily, highlighting the industry oriented stories that energy traders and other industry practitioners with a Central and Eastern European mandate need to know.
Clean Energy Report	Clean Energy Report is a brand-new cutting edge news service focused on the regulatory, legislative and court decisions that foster the clean energy economy and shape EPA's controls on greenhouse gas emissions. The failure of Congress to pass cap-and-trade legislation has prompted a major shift in policies to promote low-carbon energy sources. Clean Energy Report delivers the inside story on this emerging strategy. Clean Energy Report is specially designed to get our readers to the next level of news analysis and action-ready participation in the seminal challenge facing the energy industry as a result of the new environmental policies that regulate it.
Coal Industry News Stories	The Coal Industry News group file contains cover-to-cover news sources where more than 60% of the stories from the sources pertain to the coal industry and selected coal industry stories from other news sources.
Daily Oil Bulletin	Daily Oil Bulletin is Canada's best-known and most-used oil patch publication. The Daily Oil Bulletin has been serving readers since 1937. Every day readers get breaking news stories, analysis of oil patch trends, activity snapshots, interviews with corporate leaders, reports on exploratory successes and failures, new well locations, feature stories on new technologies and much more.
E&E News PM	The E&E News PM contains a roundup of all the breaking and developing energy and environmental policy news from Capitol Hill, around the country and around the world.
EI Finance	International Petroleum Finance takes a broad geographical approach with EI Finance, tracking the relationship between energy and money globally, while offering insightful analysis on corporate strategies, industry restructuring, mergers and acquisitions, equity markets, and financial product innovations.
Electric Light & Power	Electric Light & Power is a monthly news magazine serving management, engineering, operating and purchasing personnel in U.S. electric utilities, and the consultants serving these electric utilities. Every issue provides up-to-date coverage of major developments and events of interest to electric utility executives and engineers. Each year the "Top 100 Utilities" are covered, with a focus on financial ratings in the June issue and a focus on performance ratings in the August issue. In November's issue, EL&P reports on the Utility of the Year. Also check EL&P's coverage on the major utilities spending plans in the January issue. In addition, EL&P will publish more than a dozen Focus Reports on developing technologies during the year.
Electrical Construction & Maintenance	Each month, EC&M shows readers the latest techniques for designing, installing and maintaining electrical distribution, control and low-voltage wiring systems.
Electrical Monitor	Electric Monitor captures the investment-related dynamics of India's electricity sector including non-conventional T & D.
Energie & Management	Energie & Management and Marktplatz Energie turns to the commercial and technical management of power suppliers, industrial energy producers as well as large energy consumers. Energie & Management informs the energy economy and political federations about national and international market tendencies with the production and distribution of energy. Through interviews, reports and background reports the newspaper is an opinion-forming medium in all ranges of the energy industry, energy engineering and the energy trade. powernews.org is the comprehensive news service for decision makers in the European energy industry. powernews.org delivers information on the European energy world - independently, critically and competently. From general news about the industry over to economic and political background news up to current technical developments.

Publication	Description
Energy and Power	Energy and Power is a fortnightly magazine which deals with the news of energy and power sector in Bangladesh. The magazine emphasizes on all the issues with respect to the development within the energy sector. It is useful for the policy makers and assists them in analyzing the development of the energy sector within the economy. It also includes the web publications for this title.
Energy and Public Utility News Stories, Current	The Current Energy News group file contains cover-to-cover news sources that have a publication date 2 years old or less where more than 60% of the stories from the sources pertain to Energy and Public Utilities and selected stories about Energy and Utilities from other news sources.
Energy and Utility Agency News Stories	The Energy and Utility Agency News group file contains cover-to-cover news sources where more than 60% of the stories from the sources pertain to the energy or utility-related regulatory agencies and selected energy and utility agency stories from other news sources.
Energy and Utility Archive News	The Energy and Utility Archive News group file contains cover-to-cover news sources that have a publication date over 2 years old where more than 60% of the stories from the sources pertain to Energy and Energy-related Public Utilities and selected stories about Energy and related Utilities from other news sources.
Energy and Utility News Stories	The Energy and Utility News group file contains cover-to-cover news sources where more than 60% of the stories from the sources pertain to Energy and energy-related utilities and selected stories about Energy and Utilities from other news sources.
Energy and Utility Stories	The energy and utility file contains industry and trade news.
Energy Bangla (Bangladesh)	Energy Bangla is news portal that provides information on energy sector of Bangladesh
Energy Compass	Energy Compass is the primary source of timely intelligence on the interrelated political and commercial risks to which oil companies are exposed. Truly global in scope, it is concerned with the personalities and processes at work in the corridors of power. Investigates thoroughly how current events affect the oil industry, and how the oil industry is, in turn, shaping the politics of the day. Energy Compass provides early warning of the political, religious, military, ethical, and economic developments that pose risks to the activities of oil companies in any country in the world. At the same time, it draws the attention of those in the political sphere to industry events and trends that bear on the political decision-making process.
Energy Future	The Solar Quarterly provides the latest research and initiatives on solar energy and its applications.
Energy Intelligence Briefing	Energy Intelligence Briefing offers rapid analysis of unfolding events and key market indicators of importance to your business. It delivers high-quality analysis and perspective of the most important breaking news. Unlike traditional real-time news services, EIB takes readers behind the headlines, analyzing what key events mean to the energy industry and, potentially, to their bottom line as they are happening. EIB gives readers what they really need to know, when they need to know it, to help them make informed, profitable decisions.
Energy Intelligence Pubs	This file contains newsletters published by Energy Intelligence Group, Inc. Publications included in this file are cover-to-cover.
Energy Law Journal	The Energy Law Journal, published by The Energy Bar Association, has become a preeminent energy publication, providing thought-provoking and deeply researched articles by practitioners, internationally known academics, Federal judges, high ranking government officials, and members of FERC. The Journal has often been cited by Federal Courts, law review articles, energy industry speakers, and the FERC. The Journal publishes legal, policy, and economic articles of lasting interest with significant research value on subjects dealing with the energy industries.

Publication	Description
Energy Monitor Worldwide	Energy Monitor Worldwide is a subscription based publication covering energy news and developments from worldwide jurisdictions. Energy Monitor Worldwide covers the petroleum industry, including oil companies, petroleum refiners, fuel transport and end-user sales at gas stations; the gas industry, including natural gas extraction, and coal gas manufacture, as well as distribution and sales; the electrical power industry, including electricity generation, electric power distribution and sales; the coal industry; the nuclear power industry; and the renewable energy industry, comprising alternative energy and sustainable energy companies, including those involved in hydroelectric power, wind power, and solar power generation, and the manufacture, distribution and sale of alternative fuels.
<i>Energy Next</i>	Energy Next is a single point reference for all matters related to the renewable energy sector in India and abroad. Energy Next has a unique mix of content with interviews, analyses, market-based features, policy guidelines and initiatives, news and comments. It is a platform for government functionaries, civil society partners and private sector leaders to discuss the opportunities and challenges of a global, rapid deployment of renewable energy.
<i>Energy Processing Canada</i>	Energy Processing Canada is written and edited for the hydrocarbons processing related industries and devotes its entire energies to presenting the changing technology in these fields, and to the promotion and well-being of this phase of the petroleum marketplace.
Energy Update	Energy Update is a monthly magazine that focuses on developments in the energy sector, of particular interest to Pakistan. It is also covering developments in the alternate energy, especially CNG/NGV. The magazine also promotes energy events through some promotional activities and media coverage in the country.
EnergyWashington Week	A biweekly newsletter, (formerly Electric Power Alert) specializing in how national public policy affects the electric power industry. Our editors provide investigative business news reporting on the restructuring of the bulk power market, the policies affecting new sources of electric generation, the effect of state regulation, and the development of environmental policies affecting generators. Our editors are unmatched in covering Capitol Hill and Washington, DC regulators.
Enewsletter Environment Magazine Déchets	Enewsletter Environment Magazine Déchets is a weekly web publication that contains information on understanding the pathways following the life cycle of sorting treatment and finding any changes on household and industrial waste.
Enewsletter Environment Magazine Energie	A web publication providing technical information, accompanied by references and contacts, on the environment. It is intended for research and technical directors, engineers and other professionals who need to follow the technologies and evolutions in the environmental sector.
Engineered Systems	Engineered Systems (ES) Magazine provides smart, sustainable solutions for mechanical engineering projects. Whether it's a renovation or new construction, ES delivers new ideas to help commercial, institutional, industrial, and government buildings achieve LEED and Energy Star certification.
Environment and Energy Daily	E & E Daily is the leading source of information for people who track environmental and energy action in Congress. The Daily covers everything that happens on Capitol Hill that relates to environmental and energy policy, including: hearings, markups, bill introductions, floor actions, positions of key legislators and interest groups and more.
European Daily Electricity Markets	EDEM is the leading publication for the fast-developing European power markets. Launched in 1997, EDEM includes daily price assessments, breaking news, market reports and statistics. EDEM has established itself as the publication of choice for professionals who need to stay connected.
European Gas Markets	EGM is the leading publication for professionals in the European natural gas industry. Twice a month it gives unrivalled insight into the commerce and politics of one of the world's most dynamic and fastest growing industries

Publication	Description
European Spot Gas Markets	ESGM is the foremost daily gas market report for the European gas markets. Launched in 1995, it was the first publication to report gas trading in Europe and is extensively used as the basis for pricing and supply contracts. It is widely respected among gas market professionals as the most authoritative and accurate source of market prices and industry news
<i>Europolitics Energie (Français)</i>	The policy and regulations applied to all energies: renewable oil, nuclear power, gases, energies, etc. With statistics, activities of the companies and professional bodies, research programs. Now merged with Europolitics (French).
<i>Forecourt Trader</i>	Forecourt Trader is the market-leading monthly magazine dedicated to the fuel retailing sector, containing news, views and in-depth features on the major issues of the day, as well as the latest information on products, promotions and equipment.
Global IP News. Energy Patent News	Global IP News Oil & Gas Patent News is a daily newswire service covering the latest developments in the global petrochemical industry. It covers patents from more than 70 countries across the world.
Global IP News. Oil & Gas Patent News	Oil & Gas Patent News is a daily newswire that delivers patent information on oil pipelines, seismic survey, exploration drilling instrument, onshore and offshore oil exploration. Patent related to exploration drilling, oilfield equipment, petroleum, petrochemical products, systems and services are also available.
Global IP News. Petrochemicals Patent News	Petrochemical Patent News is a committed daily newswire service covering latest developments in the global petrochemical industry. It covers patents from more than 70 countries across the world.
Government Publications & Documents Energy Stories	The Government Publications & Documents database contains the full text of publications issued by various government agencies and offices.
Greentechlead.com	Greentechlead.com is the single online news platform covering all green technology aspects. It focuses on green technologies such as wind, solar, biogas, e-vehicles and smart grid as well as water management, clean energy and recycling.
Gulf Oil & Gas	Gulf Oil & Gas is a specialized e-marketplace focusing on the Oil & Gas industry in the Eastern Hemisphere and provides news, project information and Business related information to executives and professionals.
Hart Energy Publications	Hart Energy Publications includes award-winning publications around the oil & gas industry with insightful information about business opportunities, finding capital, managing risk, trends and technology as well as forward-thinking analysis.
Heren Energy Pubs	Heren Energy Pubs contains energy related newsletters published by Heren Energy Ltd. Publications include European Daily Electricity Markets, European Spot Gas Markets and European Gas Markets.
Hydrocarbon Processing	Hydrocarbon Processing is the premier magazine providing job-help information to technical and management personnel in petroleum refining, gas processing, petrochemical/chemical and engineer/constructor companies throughout the world—since 1922.
Hydroplus (French language)	Hydroplus Created in 1990, this monthly magazine is the essential reference on France's water sector. The magazine is supported by a team of journalists specialized in collaborating with professionals. In France, "Hydroplus" occupies an exclusive niche in the specialist publications, as it is the sole monthly magazine exclusively dealing with the entire water sector. This coherent editorial is centered on current technological and economic markets, targeting the group of water professionals who look for concrete solutions. Strongest key points are reliability of technical information, reactions on current news in the water sector, quality of contributions by recognized experts.
IET Electric Power Application	IET Electric Power Applications publishes papers of a high technical standard with a suitable balance of practice and theory. The scope covers a wide range of applications and apparatus in the power field. In addition to papers from those involved in the design and development of electrical equipment, papers relying on analysis are also sought, provided that the arguments are conveyed succinctly and the conclusions are clear.

Publication	Description
IET Electrical Systems in Transportation	IET Electrical Systems in Transportation covers electrical power systems in modern transport applications including generation, storage, distribution and utilization.
<i>IET Generation, Transmission & Distribution</i>	IET Generation, Transmission & Distribution is intended as a forum for the publication and discussion of current practice and future developments in the electric power generation, transmission and distribution. Practical papers that provide examples of good present practice can be described and disseminated are particularly sought.
<i>IET Power Electronics</i>	IET Power Electronics covers applications of power semiconductor technology, circuits, devices, techniques and performance management.
IET Renewable Power Generation	IET Renewable Power Generation provides information on research and development in wind, solar, fuel cell, biomass oceanic, geothermal and micro-combined heat and power technologies. It also includes articles on renewable energy technology, power generation and systems integration.
India Energy News	India Energy News covers all aspects of the energy markets in India. 'Energy News India' discusses the energy scene in the country with respect to use of different energy sources, plans and programs for development of renewable energy and statistical data on imports and consumption. It also reports and analyzes Indian Government's energy policy, the activities of government regulatory bodies and developments in energy legislation, research, science and technology.
Indian Oil and Gas News	Each week it delivers the latest national oil and gas news; analysis of issues and events; practical technology for design, operation and maintenance; and important statistics on international markets and activity. The Oil & Gas news is designed to meet the needs of engineers, oil management and executives throughout the oil and gas industry.
Inside F.E.R.C.'s Gas Market Report	Inside F.E.R.C.'s Gas market Report is the premier independent source of the gas prices at all key pricing points. The newsletter was established in January 1985 and is a sister publication to Inside F.E.R.C. (the INFERC file). Reporting on the natural gas industry, the newsletter covers buyers and sellers as they strive to keep ahead of an increasing number of variables, e.g., competitive bidding, floating contract rates, shifting policies and alternative fuels. Regular features include reports on bid offerings and requests for proposal (RFP) by buyers, details on available transportation capacity and pipeline discounting practices, market commentaries, price comparisons for gas and residual fuel oil and other related data on alternative fuel competition.
International Journal of Energy Sector Management	The International Journal of Energy Sector Management aims to facilitate dissemination of research on issues relating to supply management, demand and usage management, waste management, customer and other stakeholder management, and solutions thereto. The journal covers all forms of energy (non-renewable and renewable), forms of supply (centralized or decentralized), ownership patterns (public or private, cooperative, joint, or any other), market structures (formal, informal, integrated, disintegrated, national, international, local, etc.) and degrees of commoditization (e.g. internationally traded, regionally traded, non-traded, etc.).
International Journal of Photoenergy	International Journal of Photoenergy offers original research articles as well as review articles in all areas of photoenergy. The journal consolidates research activities in photochemistry and solar energy utilization into a single and unique forum. It covers the following topics and applications: photocatalysis; photostability and toxicity of drugs and UV-photoprotection; solar energy artificial light harvesting systems; photomedicine photo nanosystems; nano tools for solar energy and photochemistry; solar chemistry; photochromism; organic light-emitting diodes; PV systems; nano structured solar cells.
International Oil Daily	International Oil Daily provides quick, accurate, and insightful coverage of the latest developments in the oil and gas business. International Oil Daily extends Oil Daily's 50-year tradition of strong and immediate coverage beyond the Americas to Europe, Asia, the Middle East, Russia and the Caspian region. Coverage ranges from the drill bit to the gasoline pump, and includes worldwide upstream and downstream developments, assessments of key market trends and prices, news on mergers and acquisitions, and political changes that affect the business. International Oil Daily is ideal for any energy executive seeking to keep abreast of developments in this fast-moving industry.

Publication	Description
International Resource News	International Resource News is updated throughout the day and provides timely, concise news stories on international events. Includes information on manufacturers, component suppliers and new technologies.
<i>Jet Fuel Intelligence</i>	Jet Fuel Intelligence (JFI) is an authoritative weekly newsletter devoted to insightful coverage and analysis of all aspects of the global aviation fuel business. JFI identifies, clarifies and analyzes the latest market-moving events, fuel facility developments, and trends that have a significant impact on the aviation fuel business. It is the only source for global airport-by-airport jet fuel pricing, and coverage of spot cargo markets and swaps.
<i>Kazakhstan Oil & Gas Weekly</i>	Kazakhstan Oil & Gas Weekly covers the Kazak oil and gas industries.
MarketLine Energy & Utilities Newswire	MarketLine Energy & Utilities Newswire is an expert opinion and analysis service that briefs investors and professionals on the implications of topical business issues and events in the sector. All articles are written by MarketLine analysts, whose specialist knowledge provides the reader with in-depth analysis of market dynamics and company strategies.
Minerals & Metallurgical Processing	Gives researchers and operations personnel the latest information on the processing of coal, industrial minerals, gold, aluminum, iron, zinc, lead, rare earths and other minerals.
Mining Engineering	A monthly journal dealing with the issues, developments, and technologies that impact mining (underground, surface, and solution), exploration, operations, the processing of metals, health and safety, and the environment.
Modern Power Systems	Modern Power Systems Modern Power Systems is the leading monthly technology magazine for the power supply industry with an international circulation of 12,067 copies (BPA audit). Its editorial features news updates and technical articles on the latest developments and project applications in the power generation, transmission and distribution field worldwide. The magazine is read by management and senior executives in public and private power utilities, government energy planning departments, consulting engineers and industrial power producers throughout the world.
Modern Power Systems - Asia and Pacific Stories	Modern Power Systems Modern Power Systems is the leading monthly technology magazine for the power supply industry with an international circulation of 12,067 copies (BPA audit). Its editorial features news updates and technical articles on the latest developments and project applications in the power generation, transmission and distribution field worldwide. The magazine is read by management and senior executives in public and private power utilities, government energy planning departments, consulting engineers and industrial power producers throughout the world.
Modern Power Systems - Middle East and Africa Stories	Modern Power Systems is the leading monthly technology magazine for the power supply industry with an international circulation of 12,067 copies (BPA audit). Its editorial features news updates and technical articles on the latest developments and project applications in the power generation, transmission and distribution field worldwide. The magazine is read by management and senior executives in public and private power utilities, government energy planning departments, consulting engineers and industrial power producers throughout the world.
Modern Power Systems - North and South America	Modern Power Systems is the leading monthly technology magazine for the power supply industry with an international circulation of 12,067 copies (BPA audit). Its editorial features news updates and technical articles on the latest developments and project applications in the power generation, transmission and distribution field worldwide. The magazine is read by management and senior executives in public and private power utilities, government energy planning departments, consulting engineers and industrial power producers throughout the world.
Monthly Energy Review	Monthly Energy Review provides data on production, consumption, stocks, imports, exports, and prices of principal energy commodities in the United States.

Publication	Description
National Petroleum News	Articles from National Petroleum News, a trade magazine for petroleum product wholesalers and retailers, automobile service station and convenience store operators, cover petroleum product marketing, industry news, companies, law and legislation, management and taxation. Selected full-text articles from this publication are provided by Information Access Company.
Natural Gas Week	Natural Gas Week coverage of the North American gas sector is aimed at a broad spectrum. Whether you're a producer, pipeline, local distribution company, marketer or end-user, NGW will keep you well-informed on every aspect of the North American natural gas scene. For the past 15 years, NGW has been providing readers with data and information that have helped them stay on top of developments and take full advantage of new commercial opportunities.
Nefte Compass	Nefte Compass is the one-stop site for those looking behind the scenes of the oil and gas industry in the former Soviet Union and Central and Eastern Europe. Nefte Compass is the single most reliable independent and authoritative source of information on oil and gas in the area, setting the highest standards for news breaking and informed analysis.
News of the energy companies of the CIS countries	Everything about events in the energy industry of the CIS-countries during the day. The informational pack of about 30-40 news in Russian depicts everything that has happened at the fuel and energy companies of the CIS-countries for the last 24 hours. We get information from press-services of companies, 21 information agencies and open sources in the Internet.
Nuclear Energy News	The Nuclear Energy News group file contains cover-to-cover news sources where more than 60% of the stories from the sources pertain to the nuclear energy industry and selected nuclear energy industry stories from other news sources.
Nuclear Engineering International	Nuclear Engineering International Nuclear Engineering International, established in 1956, has an international circulation of 2,417 copies (ABC audit). This monthly magazine features in-depth and timely coverage of key technical and commercial industry issues, detailed profiles of world-wide nuclear programs and country surveys and reviews reporting on significant developments in the international nuclear industry.
Nuclear Engineering International - Asia and Pacific Rim Stories	Nuclear Engineering International Nuclear Engineering International, established in 1956, has an international circulation of 2,417 copies (ABC audit). This monthly magazine features in-depth and timely coverage of key technical and commercial industry issues, detailed profiles of world-wide nuclear programs and country surveys and reviews reporting on significant developments in the international nuclear industry.
Nuclear Engineering International - Middle East and Africa Stories	Nuclear Engineering International Nuclear Engineering International, established in 1956, has an international circulation of 2,417 copies (ABC audit). This monthly magazine features in-depth and timely coverage of key technical and commercial industry issues, detailed profiles of world-wide nuclear programs and Country surveys and reviews reporting on significant developments in the international nuclear industry.
Nuclear Engineering International - North and South America Stories	Nuclear Engineering International Nuclear Engineering International, established in 1956, has an international circulation of 2,417 copies (ABC audit). This monthly magazine features in-depth and timely coverage of key technical and commercial industry issues, detailed profiles of world-wide nuclear programs and Country surveys and reviews reporting on significant developments in the international nuclear industry.
Nuclear News	Nuclear News is a leading monthly magazine in the field of nuclear energy, published by the American Nuclear Society since 1959. It deals with the application and impact of nuclear power as well as the latest foreign and domestic developments in this field. Articles range from semi-technical to brief news items. Coverage includes major developments in the application of nuclear energy, interviews with influential leaders in Washington and elsewhere, extensive reports on important meetings and international news. Also included is the World List of Nuclear Power Plants which is revised and updated for the February and August issues.

Publication	Description
Nuclear News - Biographical Stories	Nuclear News is a leading monthly magazine in the field of nuclear energy, published by the American Nuclear Society since 1959. It deals with the application and impact of nuclear power as well as the latest foreign and domestic developments in this field. Articles range from semi-technical to brief news items. Coverage includes major developments in the application of nuclear energy, interviews with influential leaders in Washington and elsewhere, extensive reports on important meetings and international news. Also included is the World List of Nuclear Power Plants which is revised and updated for the February and August issues.
Nuclear Plant Journal	Nuclear Plant Journal contains technical papers and articles aimed at developing better methods, systems, products, and services in the nuclear power industry.
Oil & Gas Journal	The Oil & Gas Journal is an authoritative source on the U.S. petroleum industry. It is edited for senior and middle management, engineering and supervisory personnel of operating oil companies. Industry coverage includes exploration, drilling, production, pipeline, transportation, refining, processing and marketing. Most issues include broad coverage of industry news and statistics combined with detailed technical articles. A number of special issues are published during the year that provide in-depth coverage of a specific segment of the industry. Topics include the Annual Petrochemical Report, Geophysical Report, Offshore Construction, Microcomputer Report, and the Worldwide Report, which provides information on worldwide oil and gas production, reserves and refineries.
Oil & Gas Journal - Biographical Stories	The Oil & Gas Journal is an authoritative source on the U.S. petroleum industry. It is edited for senior and middle management, engineering and supervisory personnel of operating oil companies. Industry coverage includes exploration, drilling, production, pipeline, transportation, refining, processing and marketing. Most issues include broad coverage of industry news and statistics combined with detailed technical articles. A number of special issues are published during the year that provide in-depth coverage of a specific segment of the industry. Topics include the Annual Petrochemical Report, Geophysical Report, Offshore Construction, Microcomputer Report, and the Worldwide Report, which provides information on worldwide oil and gas production, reserves and refineries.
Oil & Gas Journal - Dutch Stories	The Oil & Gas Journal is an authoritative source on the U.S. petroleum industry. It is edited for senior and middle management, engineering and supervisory personnel of operating oil companies. Industry coverage includes exploration, drilling, production, pipeline, transportation, refining, processing and marketing. Most issues include broad coverage of industry news and statistics combined with detailed technical articles. A number of special issues are published during the year that provide in-depth coverage of a specific segment of the industry. Topics include the Annual Petrochemical Report, Geophysical Report, Offshore Construction, Microcomputer Report, and the Worldwide Report, which provides information on worldwide oil and gas production, reserves and refineries.
Oil & Gas Journal - Market and Industry Stories	The Oil & Gas Journal is an authoritative source on the U.S. petroleum industry. It is edited for senior and middle management, engineering and supervisory personnel of operating oil companies. Industry coverage includes exploration, drilling, production, pipeline, transportation, refining, processing and marketing. Most issues include broad coverage of industry news and statistics combined with detailed technical articles. A number of special issues are published during the year that provide in-depth coverage of a specific segment of the industry. Topics include the Annual Petrochemical Report, Geophysical Report, Offshore Construction, Microcomputer Report, and the Worldwide Report, which provides information on worldwide oil and gas production, reserves and refineries.
Oil & Gas News	Oil & Gas News (OGN), the only weekly journal covering the Middle East, Asia and the Pacific Rim since 1988. Oil & Gas News continues to provide a unique and authoritative news and information service to individuals and organizations with a serious interest in all aspects of oil, gas and related industries. Each week OGN carries news stories covering exploration, production, refining and petrochemicals as well as specialist country reports and extensive reviews of major national oil companies. New products and processes for the industry are highlighted on a regular basis from Tokyo to Ras Tanura, from Kuala Lumpur to Kuwait.

Publication	Description
Oil Daily	Oil Daily is unique in providing quick, complete and insightful coverage of the latest developments in the oil business. Focusing on the North and Latin America oil and gas industries, Oil Daily also gives its readers global coverage of worldwide upstream and downstream developments, market trends, business deals, and regulatory and legislative changes that are altering the landscape of the petroleum industry.
Oil Industry News Stories	The Oil Industry News group file contains cover-to-cover news sources where more than 60% of the stories from the sources pertain to the oil industry and selected oil industry stories from other news sources.
Oil Market Intelligence	Oil Market Intelligence provides you with the most complete, accurate, and interlocking assessment of supply, demand, and inventory data available anywhere from a private source. Every month, it analyzes data against the backdrop of price movements and relationships in crude oil and products in the main markets of Asia, Europe, and North America -- pulling this information together to give you a uniquely sophisticated and timely analysis of oil market behavior, trends, and outlook.
Oil Market Report	International Energy Agency's Oil Market Report has become the definite source for information on the world oil market fundamentals, covering supply, demand, OECD stocks, prices and OECD and selected non-OECD trade. The OMR provides the most extensive, up-to-date statistical data available on current world oil market trends. It is the finest and exclusive source to present official government statistics from all OECD countries and data from non-OECD countries. The main market movements of the month are highlighted in a convenient summary, while detailed analysis explains recent market developments and provides an insight into the months ahead. It is the only regular short-term analysis of the oil industry based on information obtained from the IEA's extensive network of contacts with governments and industry.
Petroleum Accounting and Financial Management Journal	The Petroleum Accounting and Financial Management Journal is published three times per year and targets a readership of petroleum and financial professionals at the mid- to high-management levels. As the petroleum industry of today is a global industry, today's Journal reflects this with an increased coverage of international issues and a larger number of international contributors among its authors. The Journal endeavors to balance the coverage of both international and domestic issues confronting the oil and gas industry, as well as an appropriate mix of articles from both academic and industry professionals.
Petroleum Economist	Petroleum Economist magazine is published monthly. It covers all aspects of the energy industry from oil, gas and coal to renewables and other forms of sustainable energy as well as providing subscribers with copies of Petroleum Economist renowned energy maps as they are published. The magazine is well known for its in-depth country reports and detailed analysis of macroeconomic and geo-political events related to the energy industry. It is read by senior executives, policy makers and their advisors.
Petroleum Intelligence Weekly	Petroleum Intelligence Weekly (PIW) is the one publication a busy executive needs in order to gain a quick and accurate understanding of what is happening in petroleum around the world. It explains why events are important, and how changing trends are likely to affect an executive's organization, whether that be in the industry itself, in government, or in finance.
Pipeline & Gas Journal	Pipeline & Gas Journal covers energy pipeline construction, operations and maintenance, and natural gas transportation and distribution.
Platt's Coal Trader	Essential information for traders, risk managers, analysts and other professionals who need unbiased information for short- and long-term action and analysis. This publication provides Platts OTC Broker Index, including CAPP barge; CAPP rail (CSX); PRB 8,800; and PRB 8,400. In addition, Platts daily assessments for US thermal coal exports, including FOB US East Coast, FOB USGC Eastern Coal, FOB USGC Western Coal, and FOB Canada/USWC. These price assessments and the included market intelligence on U.S. coal markets provide intelligence on who is buying, who is selling, and where the markets are heading.

Publication	Description
Platt's Coal Trader International	Essential information for business executives, traders, risk managers and other mining and energy professionals. This is a market-focused newsletter providing information on price movements in Europe, South Africa, Australia and Asia. Prices, indexes, assessments and other price information published herein are based on material collected from actual market participants.
Platt's Energy Economist	Energy Economist is a unique monthly newsletter providing an overview of world energy news and forecasts. Rather than inundating you with tables of statistics and data, it concentrates on punchy features covering the different energy markets across the world. Each issue includes Energy Economist Briefing, a supplement providing an in-depth analysis of key issues affecting the energy market.
Platt's Energy Trader	Platt's Energy Trader is the premier daily publication for readers who need a comprehensive yet easy-to-use package of news and price information for both gas and electricity markets in North America. In addition to complete news coverage of stories that matter to gas and electricity markets, Energy Trader provides a wide range of price information for both markets. It provides daily spot gas prices for 101 locations and daily electricity indexes for 30 locations. Energy Trader also includes daily assessments of the forward power market, prices for near-term forward electricity markets, spark spreads, unit outage tables by region, and unique national indicators for daily gas and electricity prices. It also features market commentary on the daily and forward electricity markets, daily gas markets, and NYMEX gas futures.
Platt's European Gas Daily	Platt's European Gas Daily is a newsletter delivering competitive intelligence across the European gas marketplace. It provides critical price changes and their effects on the industry, accurate price assessments, the latest corporate, regulatory and commercial news, and comprehensive market commentary across Europe.
Platt's European Power Daily	Platt's European Power Daily is a newsletter delivering comprehensive news and pricing information and providing daily updates on new policies, projects, power deals, acquisitions, generation fundamentals, wholesale price drivers, regulatory decisions, and evolving trading markets in Europe.
Platt's Inside F.E.R.C.	In-depth reporting of the activities of the Federal Energy Regulatory Commission (FERC) is the specialty of Inside F.E.R.C., a weekly newsletter from McGraw-Hill, Inc. Although they concentrate on FERC, the newsletter's Washington-based editorial staffers also report on legislative developments affecting FERC issues, and the hearings and decisions of other relevant federal or state agencies. The newsletter does significant reporting, including interviews with the heads of energy committees and subcommittees in Congress. The newsletter also comments on FERC decisions regarding gas or pipeline rates or utility rates of return that have direct impact on the bottom line of major corporations. Platts Inside F.E.R.C. provides coverage of the development of energy futures trading on commodity exchanges and speculation over the possibility of trading in gas futures. International coverage includes extensive reporting on Canadian gas pricing, U.S. negotiations on supply of gas from Mexico and FERC decisions that affect the import of LNG (liquid natural gas) from such suppliers as Algeria or Indonesia.
Platt's Inside N.R.C.	Platt's Inside N.R.C. provides highly specialized reporting of the regulation of commercial nuclear power and the political or technical issues and trends affecting nuclear power regulation. Coverage focuses on the federal government's Nuclear Regulatory Commission (NRC) but extends to state and local government involvement, intervenor actions, significant international developments and the activities of anti-nuclear activists. Litigation engendered by events in the nuclear power industry is followed closely by this bi-weekly newsletter. The major thrust of the NRC's regulatory and research effort is focused on the use of nuclear energy to generate electric power. The publication keeps tabs on the NRC's procurement activity, much of it involved with research needed to allow the commission to perform its regulatory functions.
PLATTS INTERNATIONAL GAS REPORT	Platt's International Gas Report is the leading source of quality intelligence on the international gas and gas liquids industry, providing readers with the latest industry developments on a bi-monthly basis. International Gas Report covers everything from exploration and production, to transmission, power demand, market forecasts and company news.

Publication	Description
Platt's LNG Daily	Platt's LNG Daily is an independent news publication for the global LNG industry providing information on the global market from new LNG supply projects to gas quality issues. It delivers expert and respected benchmark price assessments for the global LNG market.
Platts NuclearFuel	Nuclear Fuel provides detailed worldwide coverage of the nuclear fuel cycle as part of the commercial application of nuclear power. While geared mainly toward buyers and sellers of nuclear fuel, the subject matter in the newsletter also includes information on countries and companies involved in the nuclear industry. Nuclear Fuel reports on long-term trends in uranium supply and pricing including studies and forecasts by government agencies or industry experts. Coverage also includes news of uranium exploration, mining, milling, enrichment and fuel fabrication, financing, reprocessing, plutonium, storage, transport and disposal. Foreign policy or national defense implications of nuclear fuel developments are also covered.
Platts NuclearFuel - Dutch Stories	Nuclear Fuel provides detailed worldwide coverage of the nuclear fuel cycle as part of the commercial application of nuclear power. While geared mainly toward buyers and sellers of nuclear fuel, the subject matter in the newsletter also includes information on countries and companies involved in the nuclear industry. Nuclear Fuel reports on long-term trends in uranium supply and pricing including studies and forecasts by government agencies or industry experts. Coverage also includes news of uranium exploration, mining, milling, enrichment and fuel fabrication, financing, reprocessing, plutonium, storage, transport and disposal. Foreign policy or national defense implications of nuclear fuel developments are also covered.
Platt's Oilgram News	Since 1934, Platt's Oilgram News has been an authoritative daily newsletter edited specifically for senior corporate executives, government officials and financial analysts in the oil and gas industry. The newsletter concentrates on factual reporting of world petroleum politics, crude oil supplies and availability, oil exploration and U.S. and foreign regulation of the oil industry. Oilgram News is organized into several broad areas including international, national and financial news. International coverage includes OPEC and International Energy Agency (IEA) meetings, decisions and policies, trade agreements, price fluctuations, joint ventures with foreign governments and corporations, and explorations, production and expansion around the world. A key international item is the monthly report on Free World Crude Output.
Platt's Oilgram Price Report	Platt's Oilgram Price Report covers the daily fluctuation of price and supply in the world's oil and gas markets. International marketing information, both spot and contract, receives the greatest emphasis. The Report covers crude oil and petroleum products markets, supply and demand trends worldwide, petroleum futures trading, and price postings in many locations worldwide for a wide range of petroleum products. A large quantity of data is presented in tabular form allowing for easy reference. Summaries of news items which affect the oil and gas industry are also reported. Political shifts of opinion in OPEC are closely analyzed in order to monitor the impact on world oil and gas prices.
Platt's Power in Europe	Power in Europe is widely recognized as the best intelligence source for executives in the electricity business. It provides incisive comment and analysis on the policies and projects that shape the European electricity market. Tracking both national and international developments, Power in Europe can be relied upon to include only the kind of information that is of practical use for your business.
Power Economics- Middle East and Africa Stories	Power Economics is the news business journal for the international power market, and has an international circulation of 10,000. Published monthly, the editorial content includes news and comment on developing trends in power project finance, risk assessment and electricity trading, analysis of government policy and regulation issues, major project reports and geographical area surveys.
Power Watch India	Power Watch India is a business and trade magazine for the energy industry. It covers the entire value chain of a new project/venture; and exclusive interviews with senior power sector professionals.

Publication	Description
Power Finance & Risk	Power Finance & Risk provides comprehensive in-depth coverage of corporate finance, M&A and risk management activity in the power industry. PFR is the only industry publication offering timely intelligence, insight and analysis of corporate finance and restructuring, mergers and acquisitions, power marketing and risk management trends, generation asset sales and purchases, and worldwide regulatory news.
Propane Canada	Propane Canada is edited for the Canadian LP Gas industry and devotes its entire energies to the promotion and well-being of this segment of the oil and gas marketplace.
Public Utilities Fortnightly	The Public Utilities Fortnightly presents information and views on major policy issues affecting utilities. The magazine is authored by experts in the public utilities field, and contains articles by outstanding and informed utility professionals, regulators and legislators, discussing current problems and exploring trends within the utilities industry.
Public Utility News Stories	The Public Utility News group file contains cover-to-cover news sources where more than 60% of the stories from the sources pertain to the public utility industry and selected utility stories from other news sources.
RDS Business and Management Practices - Selected Energy Documents	Business and Management Practices - Selected Documents file focuses on management issues and business practices. Presently covering over 250 management sources and selected records from over 100 business & insurance sources. BaMP focuses on how companies and managers make decisions, tackle implementation of new technology or new techniques, plan for the future, deal with internal and external issues or expand their business. Business methodology is covered with special emphasis on case studies and practical applications including guidelines. BaMP covers the how and why of business.
Recyclage Récupération - Hebdo	Founded in 1909, this magazine is published by Les Editions Montmartre which was absorbed by the Victoires-Editions group in 2005. A new format was launched in November 2005, the economic and technical magazine on recycling and recovery : "Recyclage Récupération", including weekly and monthly issues. In the heart of this magazine are courses of various enriched salvaged materials and progressively, the newcomers: WEEE, VHU - Energy prices will soon be included regularly. Covering the markets, economic situation, economic trends and the business techniques of recovery and recycling-"Recyclage Récupération - Hebdo" sticks to the current news with the growth in the world demand for waste material exchange, major exports, waste cycles and the new European regulations.
Renewable Energy Law and Policy	Renewable Energy Law and Policy Review provide reports on the dynamic and quickly changing developments taking place in Europe and around the world in the renewable energy sector, from bio- energy, solar and wind power to developing technologies like fuel cells and nuclear fusion.
Russia & CIS Energy Daily	Russia & CIS Energy Daily is a bulletin on the most significant events in the ex-USSR fuel and energy industries, covering the implementation progress of the major oil and gas projects. The report includes major statistics on oil and gas production and exports, petroleum product output and sales plus expert commentaries on the world oil markets.
Russia & CIS Energy Newswire	Russia & CIS Energy Newswire covers all major events in the Russian and CIS fuel and energy industries, and providing statistics on oil and petroleum products, exports and sales, as well as oil price movements analysis.
Russia & CIS Energy Newswire - Most Recent 2 Weeks	Russia & CIS Energy Newswire covers all major events in the Russian and CIS fuel and energy industries, and providing statistics on oil and petroleum products, exports and sales, as well as oil price movements analysis.
Russia & CIS Oil and Gas Weekly	Russia & CIS Oil and Gas Weekly highlights the most important events in the oil and gas sectors in Russia and the former Soviet republics and provides experts' comments as well as reference information. It also includes basic statistics on the region's oil and gas industries.

Publication	Description
Russian Electrical Energy Industry (Russian language)	The information bulletin that is offered contains solely unborrowed events in the electrical energy industry in Russian Federation and abroad. The materials of the news bulletin are structured according to topic chapters. Periodicity of the information bulletin is to be agreed upon with the customer and is flexible, from daily to monthly issues. The four times in month periodicity of branch news issue for heating supply is highly recommended. The total number of original publications included into one information bulletin for the electrical power industry is, as an average, 250 items.
Russian Natural Gas Industry (Russian language)	The information bulletin that is offered contains solely unborrowed events in the natural-gas industry in Russian Federation. The daily periodicity of branch news issue for heat-and-power engineering industry is highly recommended. The total number of original publications included into one information bulletin for the natural gas industry is, as an average, 50.
Russian Oil Refining Industry (Russian language)	The information bulletin that is offered contains solely unborrowed events in the oil refining industry in Russian Federation and abroad. The materials of the news bulletin are structured according to topic chapters. Periodicity of the information bulletin is to be agreed upon with the customer and is flexible, from daily to monthly issues. The daily periodicity of branch news issue for heat-and-power engineering industry is highly recommended. The total number of original publications included into one information bulletin for the oil refining industry is, as an average, 60 items.
Science and Technology of Nuclear Installations	Science and Technology of Nuclear Installations offers information on issues related to the nuclear industry and nuclear sciences and technologies. It also covers industrial applications of nuclear technology and related disciplines, i.e. from mining to waste and incineration. It discusses the design, operation and decommissioning of power plants, research reactors and special purpose reactors including sub-critical facilities, as well as the industrial use of radioisotopes. Papers focus on key aspects of industrial applications, including quality assurance, liability, safeguards, international cooperation, as well as training and management issues. Results of experiments that are relevant for nuclear reactor safety and design are also of interest.
SeeNews Renewables	SeeNews Renewables is a global news service tailored to provide high-quality comprehensive coverage of business news for the renewable-energy industry and related sectors. SeeNews Renewables focuses on the main renewable energy sources wind, sun, water, biomass and geothermal energy. The new service caters for energy companies, suppliers of components and sub-assemblies for wind turbines, manufacturers of turbines, developers, utilities and engineering firms, hydroelectric power plants (HPPs), tidal energy conversion plants, suppliers of processing technologies and equipment, logistics and distribution players, manufacturers of energy systems.
SNL Canada Energy Week	SNL Energy breaks new ground with Power Week Canada, becoming the first energy publisher to offer a weekly report on the dynamic Canadian power market. We've even set up shop in Ottawa and have hired a veteran staff of Canadian power journalists to dig into the Canadian markets. Power Week Canada covers the involvement of Canadian utilities in RTO
SNL Daily Coal Report	SNL Daily Coal Report is aimed at coal industry professionals who can't wait for a weekly update on their red-hot market, and prefer daily information in a familiar newsletter format. Participants in the OTC markets for coal and emissions credits who demand fast and accurate information will make this newsletter a vital part of their daily routine.

Publication	Description
SNL Daily Gas Report	SNL's coverage of state and federal policy goes beyond the PUCs and FERC. SNL delves into other agencies, state houses and Capitol Hill. We dig into issues that affect all local distribution -- investor-owned, public and cooperative -- and cover all aspects of interstates and intrastate transportation from new projects, financing and MLPs to tariffs, capacity markets and supply constraints. We also cover storage, trading, hedging, forecasts and everything that affects the price of gas. LNG is hotter than ever and we track all projects and the markets that will be served by them. And our coverage of production goes deep into the regional markets with a focus on new wells, including the unconventional variety.
SNL Electric Transmission Week	The North American power grid affects every segment of the electric power business. It's already taxed and rapidly aging. How will it be managed, operated and improved? Who will pay for it? Transmission is often the most complicated aspect of power designs, plans and transactions.
SNL Electric Utility Report	The North American power grid affects every segment of the electric power business. It's already taxed and rapidly aging. How will it be managed, operated and improved? Who will pay for it? Transmission is often the most complicated aspect of power designs, plans and transactions.
SNL Energy Finance Daily	Goes beyond a simple recap of relevant news from the prior day. SNL's team of writers probes deeper - in filings, at investor conferences, in discussions with executives and analysts - for exclusive, market-moving information.
SNL Energy M&A Review	Provides comprehensive coverage of significant deals in the power and natural gas sectors, including company financials, selected comparable transactions and key implied values. Each monthly issue draws from the extensive SEC and regulatory information in SNL's databases to provide you with up-to-date analysis. Learn the rationale and implications behind every transaction, as well as financial and legal-adviser ratings.
SNL FERC Gas Report	Covers all key developments and proceedings at the Federal Energy Regulatory Commission for the gas industry. Unlike any other FERC-focused publication, the FERC Gas Report is a news and document service, providing Web links to key FERC documents referenced in articles.
SNL Gas Week	Focuses on local distribution companies and all relevant issues inside the city gate or LDC territories. Along with extensive news, analysis and feature articles, every issue includes 3-4 pages of market data. If it affects local gas distributors, pipelines and producers - inside or outside the city gate - you'll find it every week in Gas Utility Week - where all gas is local.
SNL Generation Markets Week	Each weekly issue provides coverage of: 1. New projects 2. Financing issues 3. Siting 4. Permitting 5. Supply projections 6. Regional market forecasts 7. Unit-level generator profiles 8. Market indicators As the industry sharpens its focus on the importance of asset optimization, portfolio management and risk mitigation strategies, companies with access to the highest quality generation market data will have the competitive advantage.
SNL Power Policy Week	The FERC Power Report, formerly the Foster Electric Report, covers regulatory activity before FERC and other federal agencies, Congress and the courts, as well as precedent-setting regional and local developments affecting the power industry. The FERC Power Report provides in-depth analysis, detailed descriptions and extensive background information on all key developments at the FERC.

Publication	Description
SNL Renewable Energy Weekly	Devoted to the emerging renewable energy market in North America. Unlike any other renewables publication now available, Renewable Energy Week focuses solely on North America and provides feature articles and analysis of wind, hydro and biomass fuel. The most promising future opportunities in the energy market will come from the renewables sector.
SweetCrude Reports	Web News Source SweetCrude Reports offers a concise, in-depth and up-to-date review of the Nigerian energy industry. Based in Lagos, Nigeria.
The Electricity Daily	This publication provides analysis for the issues effecting the electric power industry. It is written by US regulators, academics, economists and industry executives.
The Electricity Journal	The Electricity Journal is America's leading publication covering the electric power industry. It provides analysis of the issues affecting the rapidly changing electric power industry. The Electricity Journal is written by U.S. regulators, academics, economists, and industry executives.
The Foster Report – Canada	The Foster Natural Gas Report focuses on regulatory and governmental problems affecting the domestic natural gas industry and public utility companies, including gas exploration, pipeline transport, gas prices, rate structures, consumption statistics, deregulation, legislation and congressional hearings. The activities of the Federal Energy Regulatory Commission (FERC) are also covered extensively. The newsletter summarizes responses to FERC's notices of inquiry, and the results of state regulatory commission public hearings and rulings. The newsletter includes tables summarizing statistics for the industry. Political, regulatory and industry leaders as well as companies and corporations in the industry are also covered.
Transmission & Distribution World	Transmission & Distribution World is edited for engineers and operating professionals in the electric power industry. Feature articles are written primarily by technical editors and industry professionals in the user and manufacturer groups. Survey reports by the editors deal with industry practices and trends in specific areas. Yearly editorial content includes feature articles on electrical transmission & distribution, substations, construction, operation and maintenance, automation, and other articles pertinent to the electric power industry. Non-feature editorial covers new product reviews and industry news.
Trend Oil & Gas - Azerbaijan	Information overview on the oil and gas markets in Azerbaijan and other Caspian Sea countries, the Caucasus and Central Asia. Includes daily prices for Azeri Oil, news of SOCAR, weekly review of Azerbaijani Oil Prices, daily schedule of Iranian ports, and so much more.
UPI Energy	UPI Energy covers alternative energy products (bio-fuels and renewables and clean coal) with strong focus on the surging development in UK and Europe of alternative energy resources, including nuclear, wind and tidal. It also features regular analyses on expanding energy resources in Russia, Caucasus and Central Asia, and the rivalry for energy resources in the new Asian markets. UPI Energy contains daily briefs and a digest of the US and international energy markets in fossil fuels, energy policy, pipeline and shipping and supply issues, and also major pollution issues. It also includes the Energy Watch column, with its steady look at the under-reported sectors like Australasian and West African offshore developments.
Utilities Monitor Worldwide	Utilities Monitor Worldwide is a subscription based publication covering utilities news and developments from worldwide jurisdictions. Utilities Monitor Worldwide covers hot topics and important political and business developments concerning utilities, focused on electricity and gas, multi-utilities and water.
UtilityWeek	Utility Week will bring you the latest news on regulation, mergers and acquisitions, people, customer service, finance and legislation, plus exclusive interviews, profiles and in-depth features on key issues. And with news and feature sections dedicated to European issues, the still growing influence of the Continental utility giants on the UK market is covered in full. Authoritative, impartial and essential reading for senior people within utilities, regulators and government, Utility Week has covered the industry for over a decade in which the pace of change has showed no sign of slowing
Waste News	Waste News is the only weekly publication in North America written specifically for decision makers in the rapidly changing solid waste industry. The publication covers legislative and regulatory activity, market pricing and management issues that are essential to professional who collect, transport, process, dispose of and recover solid waste.

Publication	Description
Waste360.com	Waste Age serve3s private contracting firms, governmental entities, consulting engineers, industrial plants, retailing firms, and hospitals, as well as equipment dealers distributors, manufacturers and other allied to the field. Waste Age magazine delivers subscribers with purchasing power in every facet of waste management.
Water Power and Dam Construction	Water Power and Dam Construction is the only international monthly magazine providing news, views and current affairs, a mixture of technical and business articles, serving the needs of this world-wide marketplace. With an international circulation of 4,197 (BPA audit), it is a highly respected, well established, independent publication offering an unrivalled information source to its readers, power utilities, government departments, consultants, engineers and project managers within the hydro/dam construction markets.
Water Regulation Alert	Water Regulation Alert is a weekly newsletter covering EPA regulation of water quality.
Wilmington Publications	Modern Power Systems is the leading monthly technology magazine for the power supply industry with an international circulation of 12,067 copies (BPA audit). Its editorial features news updates and technical articles on the latest developments and project applications in the power generation, transmission and distribution field worldwide. This monthly magazine features in-depth and timely coverage of key technical and commercial industry issues, detailed profiles of world-wide nuclear programs and Country surveys and reviews reporting on significant developments in the international nuclear industry. Power Economics is the news business journal for the international power market, and has an international circulation of 10,000. Published monthly, the editorial content includes news and comment on developing trends in power project finance, risk assessment and electricity trading, analysis of government policy and regulation issues, major project reports and geographical area surveys. Water Power and Dam Construction Water Power and Dam Construction is the only international monthly magazine providing news, views and current affairs, a mixture of technical and business articles, serving the needs of this world-wide marketplace.
Windpower Monthly's Magazine	Windpower Monthly's Magazine provides news articles from around the world provide a concise yet detailed overview of the essential political, industrial, environmental and technical developments in the global wind energy arena. National news updates are backed by regular charting of market forces, thought-provoking editorials and incisive analyses of business and economic trends.
World Gas Intelligence	World Gas Intelligence analyzes the major developments in the world's natural gas markets. It covers the entire gas chain, from wellhead through transmission, marketing and distribution to the burner tip for piped gas, and including liquefaction through tankers to import terminals for LNG. Indeed it goes beyond, to convergence between the gas and power sectors. WGI takes a global perspective on trends in the gas industry and gives readers valuable insights on how the business is evolving.
World Oil	World Oil is a monthly magazine delivering in-depth features and articles on drilling, production and exploration, as well as economics, management issues and statistical analysis. Contains the full context of new operations and procedures, not just an overview. World Oil's editors are industry trained and instinctively cover proven technologies and technical specifics of value to readers.
Worldwide Energy	Worldwide Energy provides news and information on all types of energy sources and applications including oil, gas, coal, nuclear, electric, solar and the latest energy alternatives. It covers exploration and operation of various energy sources, R&D, and production of energy conservation products and processes.
