

## Efficiency Tools for Legal Documents and Scholarly Work

Access *Shepard's*® BriefCheck™ and *Shepard's*® BriefLink—directly within your Lexis Advance® research session.

***Shepard's*® BriefCheck™** is a web-based product that allows you to upload a document and check up to 600 citations and quotations in articles, briefs, memoranda, pleadings, motions and more. BriefCheck™ extracts the citations and quotations from the document and creates a report that contains not only the *Shepard's*® report for each citation, but also quotation validation reports. **An excellent timesaving tool for scholarly articles, legal documents generated in clinics and reviewing accuracy of citations and quotes in student work.**

***Shepard's*® BriefLink** allows you to take an existing document containing citations and upload it through the Lexis Advance® platform to insert permanent links on each of your legal citations. You and your students can then easily and efficiently access the citations you have referenced as well as see the *Shepard's* Signal™ indicators associated with those cites, if you choose. **An excellent tool for your syllabus, assignments, research guides, etc.**

Both BriefCheck and *Shepard's* BriefLink are available now from the Lexis Advance® Research pull-down menu at the top left.

To learn more, take a moment to view the BriefCheck [video](#) or [reference guide](#) and [Shepard's BriefLink](#) video.

If you have any questions about these tools or other LexisNexis® products or services, please contact your [LexisNexis account executive](#).
