

# TextMap<sup>®</sup>

Transcript Summary Tool

The screenshot displays the LexisNexis TextMap interface. On the left, a sidebar contains a 'Transcripts' list with items like 'Deposition of Philip Hawkins', 'Deposition of Susan Sheridan', and 'Deposition of Wayne Varvaro'. Below it is a 'Word Search' section with a search box containing 'home' and a list of results including 'homeowner', 'homeowner's', and 'homeowners'. The main window shows a document titled 'Deposition of Wayne Varvaro' with a table of linked facts and a transcript view. The transcript includes a Q&A exchange about 'home' services.

TextMap® is a simple and easy-to-use transcript summary tool that offers powerful cross-transcript searching, condensed transcript printing and a built-in PDF writer. The simplicity and intuitive design of the TextMap program makes it easy for litigators using electronic transcripts for the first time to be up and running within minutes. And TextMap is the most cost-effective transcript summary option available in the legal market.

You can use TextMap Version 3 by itself or team it with CaseMap® case analysis software to help improve case-file organization.

## Why Choose TextMap?

### Ease of Use

Lawyers—even electronic transcript novices—say TextMap is incredibly easy to learn and to use. Just upload the electronic transcript, then search, summarize, annotate and attach notes regarding testimony.

*“I use TextMap for all my deposition transcripts. The user interface is friendly and intuitive. Importing transcripts is a cinch ... the TextMap word search feature makes it easy to find where a particular witness has used a particular word.”*

— Jeffrey B. Storer  
Ropes & Gray LLP (Boston, MA)

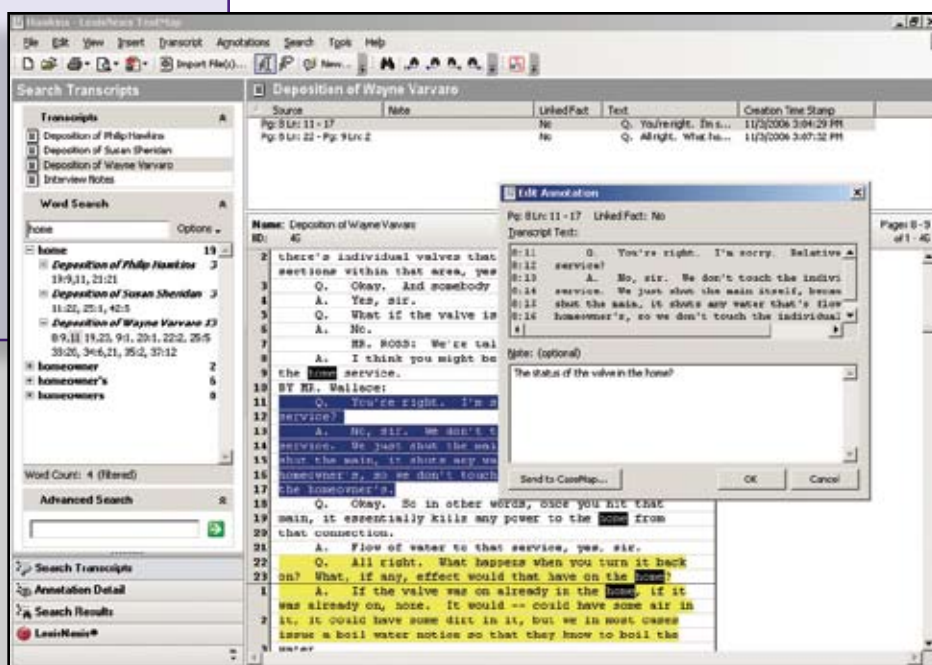

### Unique Features

TextMap offers features not found in other transcript summary tools. For example, you can create PDF versions of transcripts and TextMap reports. Additionally, you can select and link portions to CaseMap case-analysis files. Plus, trial **team members can work together in a case’s TextMap transcript database**—all searching, culling facts and creating reports at the same time, even during travel.

### Affordability

TextMap cost? Only one quarter of the price of other transcript-summary tools. It’s cost-effective for the entire organization.

It’s simple to pinpoint words and phrases across all your case transcripts.

# Choose TextMap and You Can:

## Import Easily

Import electronic transcripts in many different formats—even import from LiveNote®. For example, TextMap imports electronic transcripts with any number of lines per page, with or without headers and footers, etc.

## Pinpoint Words and Phrases Across Case Transcripts

As transcripts are imported into TextMap, each transcript word is indexed and added to a transcript dictionary that also includes the number of times the word was used in all transcripts and a “hits list” showing the specific transcripts, pages and lines where the word appears. This allows you to quickly pinpoint words and phrases across case transcripts. *See screen on previous page.*

## Organize Transcript Details

Use TextMap alone—searching, annotating, adding notes and creating summary reports. Or cull key transcript passages with TextMap, then click and organize them in the CaseMap key-fact chronology feature. The TextMap program offers advanced integration with CaseMap not found in other transcript-management products.

## Generate Valuable Reports

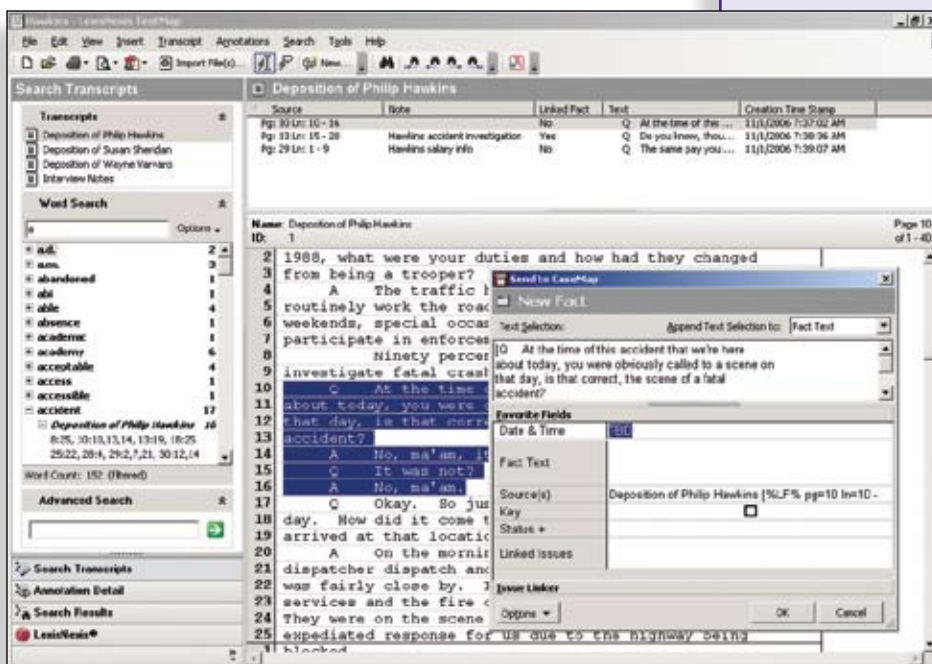

TextMap allows you to create PDFs easily, without a full Adobe Acrobat® license. There’s even a Print to PDF and Email option. And now it’s even easier to print or create PDF reports based on the annotations and notes you add to transcripts. *See screen below.*

## Share Coordinated Access

Trial team members can all work in a TextMap transcript database—all searching, culling facts and creating reports at the same time. Easy-to-use replication and synchronization features let you work on your TextMap transcript database as you travel—even as colleagues back home work on the master version.

*“ ... I can convert any depo to PDF and e-mail it to my client with an index and they have it before anyone else, which shows them we’re right on top of it.”*

— David Wolowitz, Esq.  
McLane, Graf, Reulerson & Middleton  
(Manchester, NH)

Highlight critical deposition facts and transfer them to CaseMap easily.

## Dedicated Support & Training

Count on outstanding support and training to ensure you are comfortable using TextMap to its full potential.

### Support & Training Includes:

- **Phone & E-mail Support**  
TextMap comes with one month of "Contact Us with ANY Question" support. Inquiries are answered by LexisNexis® CaseMap staff members who work alongside our developers and trainers.
- **CaseMap Academy Open-Enrollment Classes**  
Advanced trainers conduct open-enrollment classes in 20+ cities around Canada and the United States. Day-long courses focus on CaseMap case-analysis software, but TextMap is also covered.
- **Dozens of Internet-Based Tutorials**  
Find introductory, intermediate and advanced training sessions available 24/7 at [www.casesoft.com/webinar.htm](http://www.casesoft.com/webinar.htm)
- **Training at Your Office or Ours**  
Trainers are ready to visit your offices to conduct fee-based classes. Or take in-person training at our offices in Ponte Vedra Beach, Florida.
