Dear Professor:

As technology and the learning experience evolve, LexisNexis is proud to provide transformative, high-quality educational content in a print or digital format that suits your teaching style and accommodates a mobile environment for your students. Choose from digital textbooks that can be read on a device of choice or print media in bound or loose-leaf formats.

New in 2014! Evidence Challenge ... An interactive, Web-based problem and role-based exam tool. The category "Evidence" contains a complete listing of all titles that are part of the Evidence Challenge. These eBooks include dynamic links to an innovative platform simulating a courtroom experience.

The law-professor version of the LexisNexis® Digital Library continues to be updated as new content and new editions become available in eBook format.

Most LexisNexis® titles are published in a number of formats, including eBook and loose-leaf, in addition to their casebound or softbound format. Many also offer supplemental teaching materials. Look for titles noted with a TM (teaching materials) designation. Look for author videos highlighting salient features of the book. These are noted with a AV (author video) designation.

This catalog highlights New Titles Coming Soon, as well as identifiers for new editions pending release. In addition:

- The *Skills & Values Series* titles to help you integrate experiential learning materials into your courses

Coursebook Series Titles

Constitutional Law Modular Series

The *Constitutional Law Modular Series* is intentionally designed to break the mold of the traditional casebook. Course materials consist of one or more separate volumes selected from among a larger and growing set of volumes. Each of those volumes is relatively short, so that the professor may “mix and match” a suitable number of volumes for a course of varying length and focus. Each volume is designed to serve an instructional purpose rather than as a treatise. Each of the volumes in the *Series* is published in soft cover. The associated DVD-ROM included with each volume contains full, searchable text of several of the most important resources for interpreting the Constitution, lowering the wall between doctrinal courses and research courses. Cases and materials that shed additional light on matter in the casebook are also included. The titles in this *Series* include:

Introduction to Interpretive Methods and Introduction to the Federal Judicial Power, Volume 1 (2008)

(Pub. #03261) Thomas H. Odum

The *Graduate Tax Series* books emphasize complex, practice-oriented problems in order to help students develop the skills of recognizing issues and analyzing provisions of the Internal Revenue Code and regulations that they will encounter in practice on a daily basis. Course materials, including the problems, are designed to encourage students to learn the law by carefully studying the applicable sections of the Code and regulations. Excerpts from cases, administrative pronouncements, and secondary sources are limited to those appropriate to learning how to understand and apply the Code, the regulations, and non-statutory doctrines such as business purpose and step transaction. Skills & Values Series

The *Skills & Values Series* materials are subject-specific, practice-oriented books and corresponding online content supported by LexisNexis® Web Courses.
