Coursebook Series Titles:

Constitutional Law Modular Series

The *Constitutional Law Modular Series* is intentionally designed to break the mold of the traditional casebook. Course materials consist of one or more separate volumes selected from among a larger and growing set of volumes. Each of those volumes is relatively short, so that the professor may “mix and match” a suitable number of volumes for a course of varying length and focus. Each volume is designed to serve an instructional purpose rather than as a treatise. Each of the volumes in the *Series* is published in soft cover. The associated DVD-ROM included with each volume contains full, searchable text of several of the most important resources for interpreting the Constitution, lowering the wall between doctrinal courses and research courses. Cases and materials that shed additional light on matter in the casebook are also included. The titles in this *Series* include:

Introduction to Interpretive Methods and Introduction to the Federal Judicial Power, Volume 1 (2008)

(eB) (Pub. No. 3261) Thomas H. Odom

LexisNexis® Graduate Tax Series

The *Graduate Tax Series* books emphasize complex, practice-oriented problems in order to help students develop the skills of recognizing issues and analyzing provisions of the Internal Revenue Code and regulations that they will encounter in practice on a daily basis. Course materials, including the problems, are designed to encourage students to learn the law by carefully studying the applicable sections of the Code and regulations. Excerpts from cases, administrative pronouncements, and secondary sources are limited to those appropriate to learning how to understand and apply the Code, the regulations, and non-statutory doctrines such as business purpose and step transaction. The *Graduate Tax Series* titles include:

Skills & Values Series

The *Skills & Values Series* materials are subject-specific, practice-oriented books and corresponding online content supported by LexisNexis® Web Courses. Together, the book and the Web Course are designed as a tool for professors to teach practical and analytical skills that can help students serve future clients competently, skillfully and in an ethical manner, and also help them self-assess their work.

Each of the *Skills & Values Series* books has a corresponding Adoption Model Web Course for you to review and a special code to access that Web Course. When you adopt a *Skills & Values* title for your class, another Web Course pre-populated with all of the materials included in the Adoption Model Course will be created for you and your students to use.

The *Understanding Series* is highly regarded by students, professors, and practicing attorneys. As they are not tied to any particular casebook, many professors assign these concise yet comprehensive titles to their students as additional required or recommended reading.
