

# Lexis® Application & Systems Hosting

In the area of data backup and protection, can your law firm rest easy? The answer is “yes” if you rely on LexisNexis, a technology provider with 35 years of legal industry experience, strong data management expertise and world-class global data centers.

Protect your firm against business interruption, gain higher levels of security and reduce risk exposure by using Lexis® Application & Systems Hosting, the only personalized global legal hosting solution tailored to law firms.

LexisNexis operates top-tier, high-availability data centers in Columbus, Dayton and Springfield, OH; Chicagoland; the U.S. West Coast (Scottsdale, AZ); Dublin (Ireland); and Hong Kong. These data centers serve as the primary or secondary hosting sites for law-firm data and systems and protect firms against business interruptions. Services include:

- **Backup and recovery**—Safeguarding of data by making multiple onsite and offsite copies of the data to be restored in the event of disaster, data corruption, hardware failure or human error
- **Replication**—The real-time or near-real-time moving of data to a location outside the primary storage system or to another facility to allow for quick restoration in the event of physical damage to systems and buildings
- **Security**—Applying best practices and security technology to the storage system to augment server and network security measures
- **Systems and application management**—Exceptional service delivery with 100 percent satisfaction rates for management of law-firm systems and applications
- **Network services**—Network design and consulting, validation and testing, implementation, management and monitoring

# Lexis® Hosted Litigation

**Grow your litigation business, reduce risk to your firm and increase productivity.**

Your law firm can grow substantial revenue by quickly gaining more capacity for litigation projects—without making large infrastructure investments. When your firm turns to Lexis® Hosted Litigation, you not only reduce risk, but you also benefit from the application, research, litigation support and case management expertise of LexisNexis.

Lexis Hosted Litigation is a complete turnkey solution using LexisNexis® database experts and project managers committed to helping your law firm's litigation projects succeed. Unlike most hosted solutions, Lexis Hosted Litigation solutions allow firms to utilize their internal litigation support resources to manage litigation data and maintain control. At the same time, outsourcing litigation hosting to LexisNexis enables you to lower cost, reduce risk, increase productivity and benefit from application exclusives.

## LEVERAGE STRONG EXPERTISE

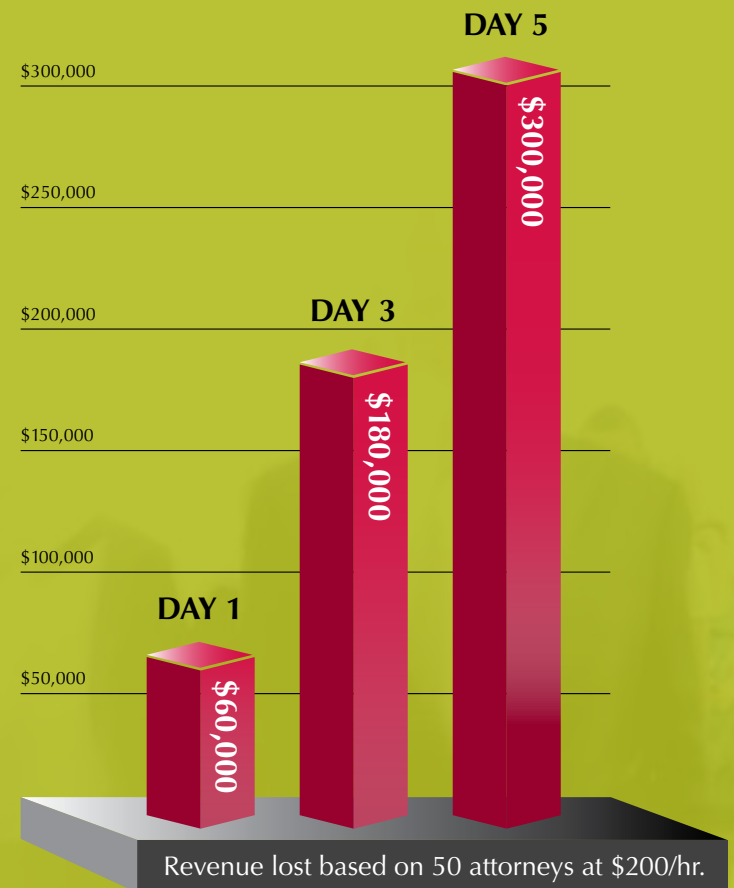

- Gain case-management software expertise across applications and consider using LexisNexis® exclusive tools (e.g., Concordance® discovery management software)
- Access professional project managers, database administrators and technical support from industry experts

## CHOOSE COST-EFFECTIVE OPTIONS

- Track costs to the client and matter level so your firm can pass costs on to clients
- Benefit from significant potential cost-savings as a result of LexisNexis buying power, expertise and service capability
- Pay only for the storage you use

## GET THE FLEXIBILITY YOU NEED

- Load data in 24 hours (compared to 3 – 4 days with other vendors)
- Activate archived data within 24 hours when needed
- Be assured that LexisNexis will keep an extra 20 percent storage capacity on site to respond quickly to unexpected demand

*Lexis Hosted Litigation helps your firm reduce the risk of litigation data loss and its impact on productivity and revenue generation.*

#### **AVOID RISK**

- Comply more easily and effectively with regulations by choosing practical, automated ways to value, catalog, protect and store your data in the most cost-effective way

#### **INCREASE PRODUCTIVITY**

- Use best-practice data and policy management to achieve process improvement
- Consider adopting a policy-based solution for managing data flow:
  - **Archive Management**—the automated movement of critical data to tiered storage
  - **Compliance**—comprehensive strategy for valuing, cataloging and protecting information assets in a way that is legally compliant
  - **Tiered storage**—storage of data in lower-cost performing drives or systems
  - **Storage on demand**—available storage as needed for primary, secondary, litigation support and backup/disaster recovery

Also available are backup recovery, replication and security as outlined under Lexis® Application & Systems Hosting.

## **Lexis® Network Services**

**LexisNexis offers a fully managed and customized network service that includes:**

- Provisioning of network services and routers
- Design and consulting, incorporating advanced traffic flow design, redundancy and diversity
- Design validation and testing so that your design meets business needs and provides seamless implementation
- Implementation, including project management, installs, testing and validation
- Management and monitoring, including capacity reporting, change and fault management, and more
- WAN troubleshooting coordination, providing faster resolution by getting the right engineers engaged early
- Vendor stewardship to align performance with requirements

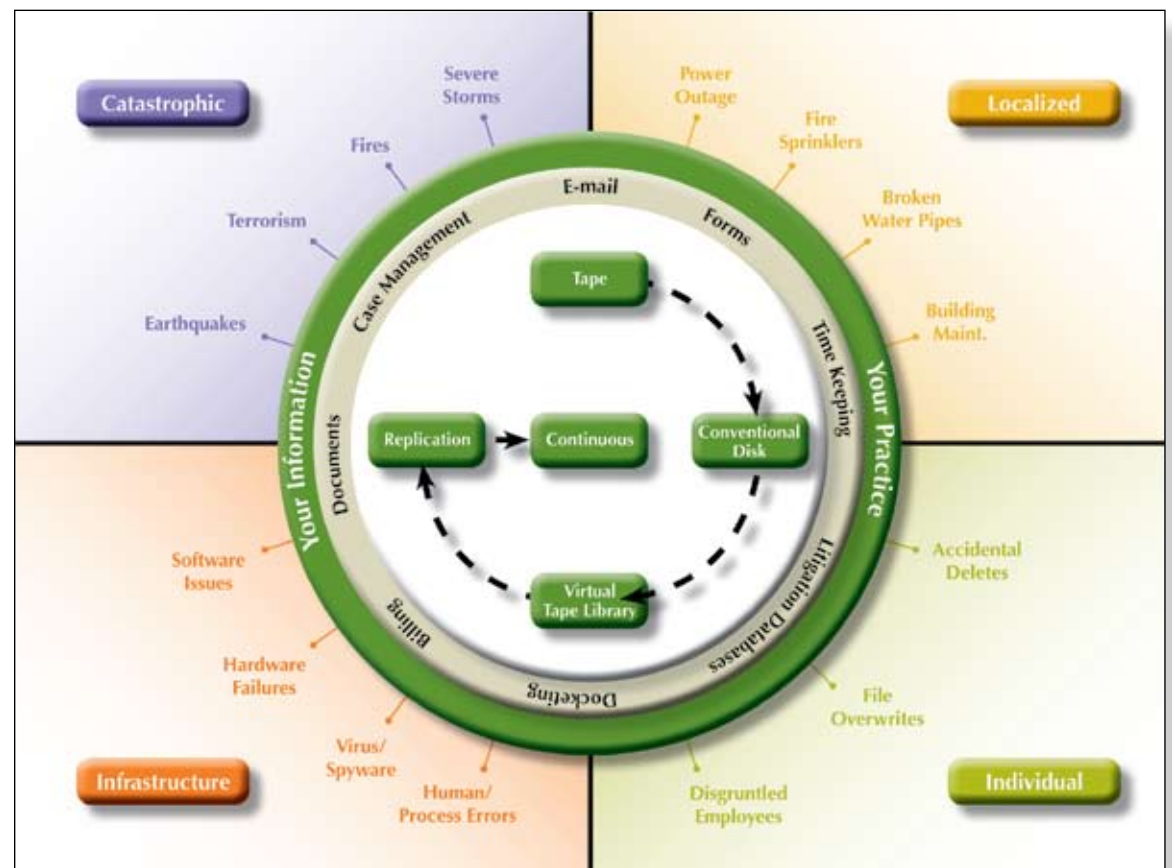

## Lexis® Disaster Recovery

Through alliances with key hardware and software vendors—Double-Take Software, LiveVault, Hewlett-Packard, Network Appliance, EMC and Agility Recovery—LexisNexis offers comprehensive disaster recovery services.

### Elements of Lexis Disaster Recovery include:

- Business continuity planning, including criticality analysis, recovery strategy and planning exercises to address your full business needs
- Mobile recovery offices and quick shipment of replacement technology at a time of disaster or testing

By combining Lexis Disaster Recovery with Lexis Hosted Litigation, you can create a customized plan for your key applications and data.

*Disaster Recovery Model*
