Find the right option for your firm, company or agency.
E-discovery management solutions for litigation cases of every size.

Every organization's e-discovery needs are unique. Now no matter what your organization's size, caseload or infrastructure, LexisNexis has a solution that can help you fully manage all of your litigation data in one place.

Choose from two outstanding solutions—Concordance® discovery management software and Concordance® Evolution—as well as two delivery methods:

- Install Concordance or Concordance Evolution behind your firewall
- Host Concordance Evolution or Hosted FYI ongoing or on a case-by-case via LexisNexis® Hosted Litigation Solutions

Select the solution that's just the right fit for your organization:

Concordance®

Concordance is an electronic discovery document management solution that is a great fit for **small and midsize** litigation cases.

This in-house solution allows sharing databases with outside users, with **Concordance® FYI™**. It involves a minimal technology footprint, is easy to use and requires lower investment costs.

Concordance software is installed on your network and runs from a desktop. It's the perfect choice for organizations that already have existing IT infrastructure, staff or resources available in-house.

Concordance® FYI™

Concordance FYI remote access software, an extension of Concordance discovery software, is for users who already have Concordance but would also like the ability to collaborate in real time—anytime, anywhere, any way via the Web.

Concordance FYI software is installed on your organization's network, sits behind your firewall and gives users a secure way to share Concordance data. Access via a secure IP Web address. There are two software components: FYI Server installed on your network; and FYI Reviewer™, which runs on Internet Explorer®.

Concordance Evolution

Concordance Evolution is the next-generation of Concordance and delivers an e-discovery review engine with outstanding speed, capacity and ease of use. It handles e-discovery management for cases of any size, and is specifically designed for **large-scale, complex litigation**.

With the installable version of Concordance Evolution, review software and discovery data stay behind your firewall. You have full control of all administrative functions.

Hosted FYI™

The Hosted FYI service is also an extension of Concordance discovery software, and gives you an **on-demand, case-by-case option** for collaborating in real time—anytime, anywhere, via the Web.

Hosted FYI is located on a secure LexisNexis server providing full-service, turnkey, remote access to Concordance and your data without making costly investments in IT, software, training and staff. Access via a secure IP Web address.
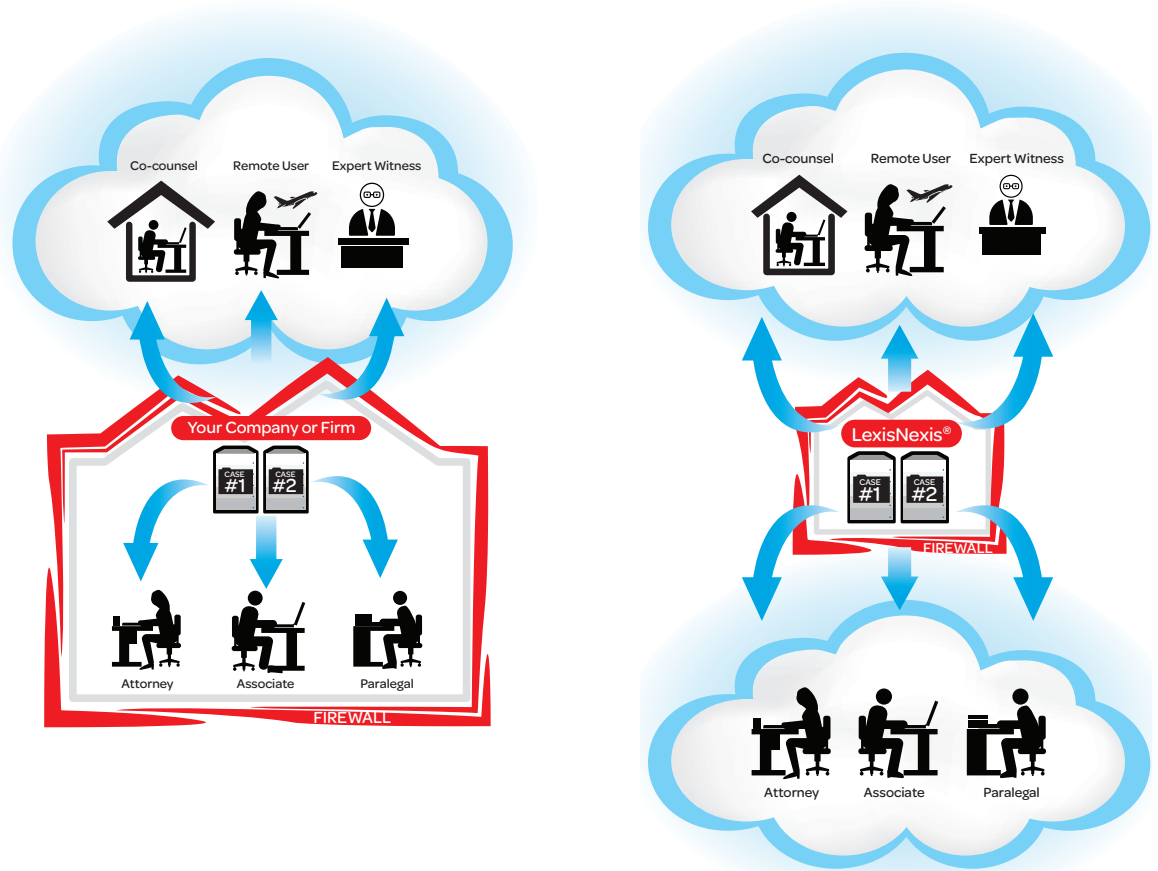

Hosted Concordance Evolution

Hosted Concordance Evolution gives you on-demand, case-by-options for large-scale complex litigation cases. Offered either in a **private or public cloud with various levels of support and project management**

Hosted Concordance Evolution is the best choice for those that prefer LexisNexis to host data instead of making costly investments in IT infrastructure and staffing. Access via a secure IP Web address.
