

Concordance<sup>®</sup> Native Viewer from LexisNexis<sup>®</sup>. Seamlessly integrates with Concordance<sup>®</sup> discovery management software.

Time and cost savings are yours with Concordance<sup>®</sup> Native Viewer—review native documents and images within a Concordance database and process only those documents that are relevant.

## Concordance Native Viewer allows users to identify key documents sooner to avoid costly processing fees:

- Review documents in their original format for better contextual understanding
- Make redactions against the native view of the documents
- Produce TIFF or PDF documents in color or grayscale

An easy-to-use interface and markup tools accelerate the review process, letting you view markup history as well as document and image information without having to switch back to Concordance. And when you're ready to assemble a database, produce only the most relevant documents, the ones you need and nothing extraneous, so you can keep costs down.

### Now you can have all the features you require:

- Near-Native Review Review documents in their original format for better contextual understanding before costly processing
- Native Document Redaction—Redact against the native view of the document, TIFF images or PDF documents
- Advanced Production Model—Save production settings for future use, ensuring consistency and enabling faster setup for new cases
- **Bulk Printing**—Simultaneously print multiple sections, printing hard copies as quickly as possible
- Color Productions—Output to color for greater visual impact
- **Silent Install**–Install Concordance Native Viewer on multiple workstations from one location
- New! Sticky Zoom and Sticky Rotate settings— Change scanned spreadsheets to landscape at the desired magnification, and retain that view even when you navigate between records.

# Experience accelerated document review with Concordance Native Viewer

- Provides context and show intent, uncovering potential evidence in hidden metadata—valuable information that may not be displayed when converted in images or TIFF documents.
- Less review to understand the context of a document, allowing you to gain perspective without opening each document and then gain insight into Track Changes, formulas, speaker notes, etc.
- Review documents in their native format, helping save you time and money by processing only the files that are relevant for production.

## Concordance Native Viewer offers simplified steps that allow you to review, redact and produce documents and images

Starting with the user interface, the all-new functionality is extremely intuitive for navigating options and performing tasks. Effective tools streamline work as you:

1. Convert and view existing Concordance image versions or, for new cases, simply open Concordance, open a database and go to work.

Imagebase Conversion Source Selection	_ <b>D</b> X
Concordance Image Create a Concordance Native Viewer database from a Concordance Image version 3-5 imagebase (DIR/VOL file pair, matched Imagebase: CALFC0.DIR	to the DCB).
Exported Load File Create a Concordance Native Viewer database from a load file (OPT or .LOG) Select File:	
C:\PROGRAMDATA\LEXISNEXIS\CONCORDANCE 10\DATABASE\CALFCO.0PT	Ŧ
Convert	Cancel

## 2. Review and annotate native documents and images with handy markup tools:

- Enjoy more control over input copy for multi-line banners with headers and footers that allow for half a page of text, with 10 lines per area
- Place your personal stamp with 20 percent transparency
   watermarks across all produced and printed documents
- Four default markup stamps are included, with 20 available for you to configure and apply to any image or document

### System Requirements

- Pentium<sup>®</sup> 300 MHz or higher processor
- 128 MB RAM
- 50 MB available hard disk space
- 800 x 600 display, 256 colors
- Appropriate language packs installed
- Computer should also meet the suggested requirements needed for the operating system being used
- Microsoft<sup>®</sup> Windows<sup>®</sup> XP Professional/Windows 7/ Windows Server 2003/Windows Server 2008 SP2/ Windows Server 2008 R2 operating system
