

## Reduce processing and review expense, and achieve greater control over e-discovery.

LAW PreDiscovery™ software combines production-level imaging and electronic discovery processing in one powerful, easy-to-use application. **It provides firms with greater control and clarity during discovery by offering an internal solution to quickly assess and manage the amount of discovery in a case.**

## Cut huge document sets down to size prior to costly review

Using proprietary pre-culling and de-duplicating technology, this powerful software enables you to control costs by reducing the amount of data that needs to be processed. Your team can begin its review much sooner with fewer files.

On average, LAW PreDiscovery ***actually pays for itself*** within the first two months of use by eliminating unnecessary processing costs and reducing review time.

Plus, LAW PreDiscovery supports more than 100 scanners, over 2,000 file types for identification and extraction, and more than 200 for printing. Law firms benefit from a full range of time- and effort-saving collection and processing capabilities.

- Load electronic documents and mailstores, scan paper documents, and import TIFF images and load files.
- Extract text and metadata for seamless review in Concordance® litigation management software or other database applications.
- Process e-documents, mailstores, file lists and Microsoft® Outlook® folders simultaneously.
- Perform de-duplication and culling to process and review only responsive data.
- Use enhanced filtering capabilities for faster, more effective searching and culling.

*Processing e-discovery in house gives your legal team greater control, and cost savings that can really make a difference.*

## Accomplish even more with the latest version of LAW PreDiscovery

**External Deduplication**—Deduplicate data across multiple cases simultaneously.

**Optimized Scan Toolbar**—Save scan profiles to speed up scanning of mixed document types.

**Enhanced PDF Support**—View text-based PDFs in the image viewer. You can also convert single documents to PDF, batch-convert native files to PDF and perform optical character recognition (OCR) directly on Microsoft® Word documents.

**More comprehensive importing**—Now you can use the ED Loader to extract individual files from archives and process embedded mail stores (.pst files) during the import process.

## Full EDM/XML compliance means even more ease and efficiency

With the adoption of the EDM/XML standard, LAW PreDiscovery transfers electronically stored information to and from supported sources and applications with greater ease, speed and reliability.

- Transfer data faster—with less effort and at lower costs.
- Reduce the risk of costly errors during data movement.
- Ensure seamless transfers across systems and products.

## Attorneys request LAW PreDiscovery because they can:

- Go from CD/DVD to review in minutes
- Review files natively or convert to TIFF/PDF
- Cull duplicate and non-responsive files
- Export directly to Concordance software and other leading document review platforms

## Litigation teams request LAW PreDiscovery because they can use it to:

- Process both paper documents and electronic files quickly
- Extract text, metadata, e-mails and attachments
- Filter by file type, search full text, index and code
- Convert files to TIFF/PDF or print to paper
- Perform batch processes such as Bates numbering, endorsing, OCR, printing and TIFF/PDF conversion
- Export native files, images, coded data and OCR text to the desired litigation support application
- Administer and monitor all workstations from a single computer console

## Achieve a greater return on your technology investment and lower cost of ownership

Find out how LAW PreDiscovery software's unique subscription-based pricing can also help save you considerable cost over "click-based" services. Ask a LexisNexis® Discovery Services Specialist to run the numbers for you using your current costs and volume.

Processing e-discovery in house gives your legal team greater control and cost savings that can really make a difference.
