Lexis® Applications & Data Hosting Service
Be ready to work—even after a crisis—with world-class backup, protection and disaster recovery.

If a system, data or infrastructure crisis occurred, would your law firm be prepared to maintain business continuity? Are you confident in your data backup and protection?

Gain more confidence and peace of mind by relying on LexisNexis, a technology provider with more than 40 years of legal industry experience, strong data management expertise and world-class global data centers.

With Lexis® Applications & Data Hosting Service, you benefit from *the only personalized global, legal hosting solution tailored to law firms, corporate legal departments and Litigation Support Bureaus.*

- Safeguard your critical systems.
- Protect your firm or organization against business interruption.
- Gain higher levels of security.
- Reduce exposure to data losses.

LexisNexis®

Scottsdale, Arizona Data Center located 30 minutes from downtown Phoenix.

Count on best-in-class data centers

To serve as primary or secondary hosting sites for your legal data and systems, LexisNexis operates top-tier, high-availability data centers in a variety of locations, including Springfield and Springboro, Ohio; Oak Brook, Ill. (Chicago area); Scottsdale, Ariz.; Red Hill, U.K. (London); and Hong Kong. The data centers offer a variety of services to meet your needs.

Backup, replication and recovery: Be confident in knowing that multiple on-site and off-site copies of your data are safeguarded to be restored in the event of disaster, data corruption, hardware failure or human error.

Security: LexisNexis applies best practices and security technology to augment server and network security measures— plus physical security measures in Tier III and SSAE 16 Certified Data Centers.

Systems and application management: We deliver exceptional service with 100 percent satisfaction rates for management of law-firm systems and applications.

Network services: Take advantage of network design and consulting, validation and testing, implementation, management and monitoring.

Data center services: We provide co-location floor space, redundant power, environmental controls, cable management, private workspace, remote-smart hands support and scalable capacity available when you need it.

Disaster Recovery

Through alliances with key hardware and software vendors— Vision Solutions, Hewlett-Packard, NetApp, EMC and Agility Recovery—LexisNexis also offers comprehensive disaster recovery services, including:

- Business continuity planning, with criticality analysis, recovery strategy and planning exercises to address your full business needs
- Mobile recovery offices and quick shipment of replacement technology at a time of disaster or testing

Engineered and staffed for secure legal hosting

Our data centers provide the power, cooling, security, support and structural capabilities needed to efficiently protect your legal applications and systems.

Power: Maximum power protection with redundant equipment and service keeps your data secure. Count on high voltage, wattage and main power density, bolstered by uninterruptible power supply (UPS) to ensure continuity, along with redundant backup and emergency power.

Cooling: Efficient, redundant cooling systems include massive chilled-water and/or air handling capabilities to ensure the proper indoor environment regardless of outdoor conditions.

Security of the building: Rely on our high-sensitivity smoke detection and fire suppression systems, world-class monitoring, 24/7/365 digital video surveillance and onsite guard staff to ensure building security.

Facilities infrastructure: High-capacity, raised floors and scalable co-location capabilities enable you to upgrade space, connectivity and services as needs evolve.

Support: On-site, skilled technicians are available to address any maintenance tasks and troubleshooting, helping to reduce cost and maximize uptime. We are ready to help with equipment handling and cabling, on-site engineering, migration planning, remote smart-hands support and more.

LexisNexis® Hosted Litigation Solutions

Today you can also take advantage of a technology environment designed specifically for securely hosting litigation and discovery data and software—and making it accessible securely to every member of your team.

With LexisNexis® Hosted Litigation Solutions, you store data on a secure, dedicated and customizable platform while benefiting from our application/case management expertise and world-class, global data centers. LexisNexis manages the network while you maintain and control your data.
