LexisNexis® Hosted Solutions with Managed Services

Case-by-case hosted solutions developed to fit the distinct needs of any litigation

Developed in response to the needs of litigation teams managing high volumes of data, LexisNexis® offers a variety of hosting solutions that help you customize, control, and fully manage your litigation data and discovery tools in one place.

Secure, scalable case-by-case hosting and managed services solutions from LexisNexis offer:

- **Significant cost savings:** Eliminate costly investment in infrastructure, IT and software.
- **Speed and flexibility:** Move quickly on most any case. Most hosted options can be deployed rapidly— often within 24 – 48 hours.
- **Exceptional project management and support as needed:** Project managers and technical support professionals are available to work with you. Get as much (or as little) support as you need.
- **Experience and expertise:** Industry and product experts deliver firsthand knowledge of tools, technology and processes.
- **Secure collaboration:** Multiple parties access and share case data and applications via the Internet through a secure IP address.

Select from three secure, scalable hosting options:

LexisNexis® Hosted FYI™ for general document review

Large data sets and numerous and far-flung attorney review teams can mean considerable headaches for your firm. LexisNexis Hosted FYI offers a secure, scalable and comprehensive discovery management and document review solution that can be quickly deployed. Hosted FYI provides secure access to our industry-leading Concordance® review platform.

LexisNexis CaseCloud℠ private "project room" in the cloud

You're in Boston. Co-counsel is in New York. The rest of your legal team is in Chicago. How can you collaborate more effectively on discovery and case analysis across the country? CaseCloud℠ provides a case-by-case hosting option to help you improve case collaboration and build better case strategies by bringing your team, data and tools together in your own private "project room" in the cloud.

LexisNexis Hosted Concordance® Evolution

Large-scale and complex litigation require a more powerful e-discovery review engine. By offering Concordance Evolution in a hosted environment, LexisNexis offers litigation professionals the speed and capacity to handle even the largest, most data-intensive cases—without a huge investment in infrastructure and IT staff. You'll also enjoy leading-edge processing, email threading and de-duping tools to knock down massive data sets.

▸ *Which hosted solution is right for your needs?*

Choosing the right litigation data hosting and managed services solution for your needs.

When selecting a hosted solution, consider these simple questions before you begin:

Do you need to conduct document review?

If yes, select from two hosting options for document review and production:

1. LexisNexis Hosted FYI

Access our classic Concordance software from a secure IP Web address:

- Ideal for cases with small to midsize data sets and standard review needs

- Electronic data is converted to a TIFF image while text and metadata are extracted into a search

- Get dedicated data and Concordance review software support

When your caseload gets too heavy, rely on our team of experts to supplement your internal resources. This solution allows you to get your review up and running quickly—so you can get back to the courtroom.

2. Hosted Concordance Evolution

Concordance Evolution in a secure hosted environment delivers unprecedented speed and power allowing you to handle even the daunting data sets without a hiccup. With Hosted Concordance Evolution, you'll get:

- Unmatched capacity to handle even the most system-choking data sets

- Industry-leading performance in loading and producing documents

- Email threading utilizing Polaris® ET OR LexisNexis® Email Thread technology, plus LAW PreDiscovery™ integration

- Native viewer included—review, annotate, redact the native image

Do you need to perform collaborative case analysis?

LexisNexis CaseCloud

Free your entire legal team to collaborate more successfully with LexisNexis CaseCloud. When a case involves multiple parties, numerous documents and vast amounts of data, discovery can be daunting. CaseCloud gives you the freedom you need to manage your cases more efficiently in a private, hosted "project room" in the cloud:

- **Freedom from security headaches:** No more worries about opening up your firm network to outside counsel.

- **Freedom to flex with your storage needs:** Add storage on the fly, and pay for only what you need.

- **Freedom to work the way you want:** Control your data without storage concerns and get anytime, anywhere access.

Do you need both review and case analysis?

CaseCloud Case Analysis and Review environments

Choose from one of the available CaseCloud Case Analysis and Review environments—offering your litigation teams access to CaseMap® and Concordance software in a secure cloud environment.
