Introducing the new Lexis Advance®

Intuitive design. Exceptional content. Integrated analytic tools. Anywhere access.

The powerful new Lexis Advance® helps you anticipate your next steps and quickly uncover the most important insights and analysis for your work. Trust your intuition to find what you want, where you'd expect. Here's what's coming:

New look ... familiar options

The biggest change is the new Lexis Advance look, designed for easier reading, scrolling and fast "find and go." You'll still find popular features in the same general locations as before.

You will also experience faster browsing and navigation. Move among retrieved content categories—from cases to statutes, for example—by selecting content links that display on results screens. No tabs to manage. Need to return to a task in the session? Click **History**.

Same features ... added power

All Lexis Advance features and functionality you've come to rely on are still available. Plus some offer expanded capabilities.

For example, select and deliver specific parts of a Table of Contents source. Or use the red search box to find a source and retrieve its documents without searching.

Remarkable mobile access!

You choose the mobile device—smartphone, tablet or laptop. The new Lexis Advance screens will adapt to fit automatically.

Ask your LexisNexis representative for a complete review of new enhancements, and watch for more details ... coming soon.
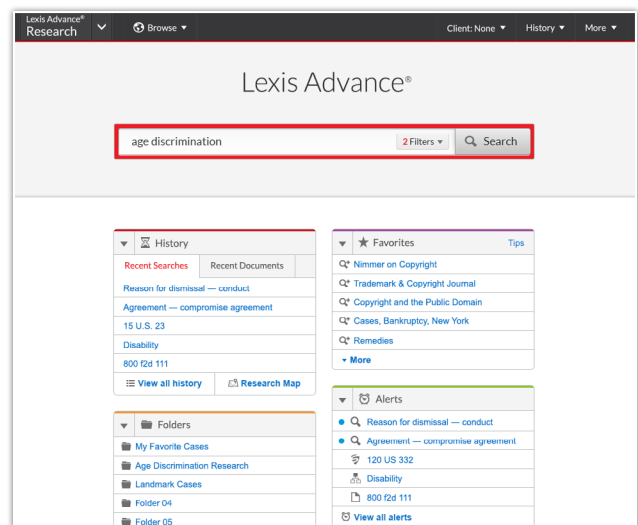

What's not changing?

- Log in website at www.lexisadvance.com
- Your Lexis Advance ID or password
- Your current Alerts, Folders and History
- The cost or the terms of your Lexis Advance subscription as a result of these changes
- LexisNexis® Customer Support available virtually 24/7
