

LexisNexis® Socioeconomic
Data Coverage

Overview

LexisNexis Socioeconomic Health Solutions leverage the industry's largest collection of public record and other proprietary sources, providing health care organizations with a powerful view of the social determinants of an individual's health risk.

LexisNexis® Socioeconomic Health Score powers population health management workstreams with an independent and unique score that leverages clinically validated socioeconomic data to predict health risk without claims and pharmacy data. This is critically important for assessing the health risk of new enrollees.

LexisNexis® Socioeconomic Health Attributes is a unique package of validated socioeconomic attributes that are correlated to health outcomes. The attributes can be leveraged by your in-house analytics teams to more accurately assess a patient's health risk and to inform the development of your care management programs.

General data coverage

LexisNexis receives behavioral updates on 279 million unique U.S. identities every year. The LexisNexis data repository includes 45 billion public and proprietary records as well as some alternative data. The repository is refreshed on a regular basis, with 77 million records processed daily. In order to maintain coverage of this growing repository, LexisNexis has engineered a complex and robust big data system that is able to aggregate data from tens of thousands of sources, including:

- 50 State Governments
- 3,000+ County Governments
- 100+ Unique and Proprietary Data Providers
- 80+ Local Governments

Public records data coverage

Specific to public records data, LexisNexis has the following coverage:

 114M bankruptcy records covering 31.7M individuals sourced directly from bankruptcy courts for all 50 states, D.C., Puerto Rico, Guam and the U.S. Virgin Islands	 Criminal records coverage for 47 states (including 409M Criminal Court filings, 19M arrest logs and Dept. of Correction data)
 Property tax assessment records on 185M consumers and deed transfer records for 135M consumers from all 50 states	 Over 180M professional license records for 27M from all 50 states and medical related professional license issuance from 23 states
 335M lien and judgment records on 97M unique individuals from all 50 states, D.C. and Guam	 Regularly updated voter registration records from 23 states and D.C. for 128M unique individuals
 83M watercraft registration records from 38 states and D.C.	 Nationwide aircraft registrations covering 4M FAA files and 9.5M records since 2001

Proprietary data coverage

Specific to unique and proprietary data, LexisNexis has the following coverage:

 Credit header records for 240M identities	 Motor vehicle records for 170M identities and 583M driving records	 Accident reports for 50 updating states
 Business association records for 48M identities	 Property records for 229M identities	 242M identities with connections to first degree relatives
 National coverage of medical professional licenses and sanctions	 Purchase activity for over 150M identities from all 50 states	 Comprehensive global watch lists from 26 sources
 National coverage of non-state sourced death records since 1963	 College attendance records for 28M identities representing all 50 states and over 2,800 institutions	 National coverage of electric, gas and water

Identity related coverage

Specific to identity related information, LexisNexis has the following coverage:

 769M driver's license records for 114M identities	 Date of birth records for 237M identities	 SSN records for 257M identities
 Phone records from all 50 states for 215M identities, comprised of over 110M total phone records and 1.1B historical telephone records	 Email address records for 679M unique email addresses and 509M unique identities	 Address records for over 260M unique identities

Data update frequency

By leveraging the largest collection of public records and alternative data, the Socioeconomic Health Solutions provide a more holistic perspective into an individual's social determinants of health.

Public records

- Bankruptcy records updated daily
- Criminal records updated monthly
- Professional licenses updated monthly
- Watercraft registration records updated quarterly
- Property tax assessor records updated annually

Most other public records are created as the result of life events and are typically not reported or updated on a fixed calendar schedule but are recorded throughout the course of the subject's interaction with the local government agency.

Proprietary records

- Medical license records updated monthly
- Comprehensive global watchlist records updated daily
- Death records updated weekly

Other alternative data

Other alternative data include the following data types:

- Education records
- Published business associations
- Purchase activity
- Sub-prime credit service offer request records
- Phone records

The largest sources of phone records are updated on a daily basis. A majority of the remaining alternative data sources are updated on a monthly basis.

About LexisNexis Risk Solutions

LexisNexis Risk Solutions (www.lexisnexis.com/risk) is a leader in providing essential information that helps customers across all industries and government assess, predict and manage risk. Combining cutting-edge technology, unique data and advanced analytics, LexisNexis Risk Solutions provides products and services that address evolving client needs in the risk sector while upholding the highest standards of security and privacy. LexisNexis Risk Solutions is part of RELX Group plc, a world-leading provider of information solutions for professional customers across industries.

Our health care solutions combine proprietary analytics, science and technology with the industry's leading sources of provider, member, claims and public records information to improve cost savings, health outcomes, data quality, compliance and exposure to fraud, waste and abuse.

Socioeconomic Health Score and Socioeconomic Health Attributes provided by LexisNexis are not provided by "consumer reporting agencies," as that term is defined in the federal Fair Credit Reporting Act (15 U.S.C. § 1681, et seq.) (FCRA) and do not constitute a "consumer report," as that term is defined in the FCRA. Socioeconomic Health Score and Socioeconomic Health Attributes may not be used in whole or in part as a factor in determining eligibility for credit, insurance, employment or for any other eligibility purpose that would qualify it as a consumer report under the FCRA. Due to the nature of the origin of public record information, the public records and commercially available data sources used in reports may contain errors. Source data is sometimes reported or entered inaccurately, processed poorly or incorrectly, and is generally not free from defect. This product or service aggregates and reports data, as provided by the public records and commercially available data sources, and is not the source of the data, nor is it a comprehensive compilation of the data. Before relying on any data, it should be independently verified.
