

Context on Lexis Advance®

The industry's first and only case law language analytics solution

Draft your most persuasive argument yet.

Context is a new kind of analytics that goes beyond the edge of traditional legal research and uncovers insights into how a judge thinks and rules.

Using industry-leading technology, language analytics is deployed across millions of case law documents and 100 motion types to pinpoint the specific language, opinions and citations a judge is most persuaded by, and forecast how expert testimony will stand up to judicial scrutiny. Knowing the language and cases your judge uses can help you draft the most persuasive argument possible.

Context is part of the Lexis Analytics[™] suite, the world's most powerful legal analytics solutions.

Speak your judge's language

Make your most persuasive argument by using the language your judge wants to hear.

Know the specific language and cases your judge relies on, and use that intel to craft your most compelling argument.

Forecast how likely you are to prevail by knowing the grant and denial rates in 100 motion types for your judge in one easy-to-read graph.

Have confidence in your arguments knowing the fellow jurists your judge cites most often.

Motion Outcomes from William Alsup's cases (3579 motions found)

Know an expert's strengths and weaknesses

Persuade your judge to admit your expert's testimony or impeach your opposition's expert.

Pinpoint why your judge admitted or excluded an expert's testimony, and how often, in one easy-to-read chart.

Link to the judge's specific reasoning, in the precise language your judge used to weigh the Daubert challenge.

Know the specific language and cases you need to use to help persuade your judge to admit your expert's testimony or impeach your opposition's expert.
