# Lexis® Clause Intelligence
## Your AI-powered drafting research tool

**Reduce your risk, save time and deliver the best outcomes for your clients**

We know that the drafting process can be a challenge: from finding the right wording for your bespoke clause, to maintaining consistency, to capturing and making available the most up to date know-how.

Lexis Clause Intelligence comes into your world — the document or precedent that you're drafting — and suggests relevant, expert-drafted clauses in seconds.

The intelligent recommendation system ingests the clauses that you're working on, weighs up the different elements of each clause, and uses that analysis to suggest relevant clauses from industry-leading LexisNexis® precedent content.

"When we work and we 'context switch' such as changing applications, moving to another product, jumping browsers, we get distracted from the task at hand and it can take an average of 23 minutes and 15 seconds to get back to the interrupted task. That's an awful lot of wasted time for behaviour which until now has been unavoidable."

# Deliver a new level of intelligence to your drafting workflow

## Delivering the best clause to help drive better client outcomes

'Artificial Intelligence' (AI) is the term given to the programming of computers to 'think', learn and act in ways that mimic aspects of human intelligence. AI and its sub-discipline machine learning (ML) are changing legal research for the better by removing the need to expend scarce resources on time-consuming and repetitive manual processes.
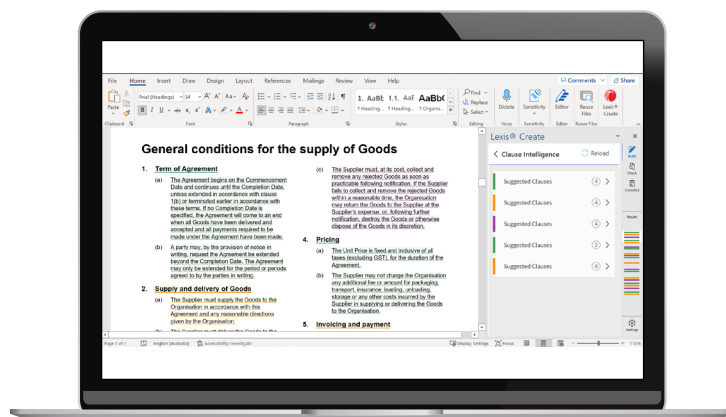

LexisNexis is developing intelligent products that combine our comprehensive content with sophisticated AI/ML techniques. Using AI/ML, we can meet you exactly where you are by delivering relevant content to you in context — reducing the time you take to search.

Lexis Clause Intelligence uses a number of AI/ML techniques to ingest your clauses and retrieve relevant clauses from LexisNexis content. AI/ML does not replace the need for your deep expertise as a lawyer; instead, it frees up your time to focus on applying that expertise to your matter, rather than performing manual tasks.

## Drive efficiencies to a new level with intelligent clause suggestions that find relevant clause options in seconds
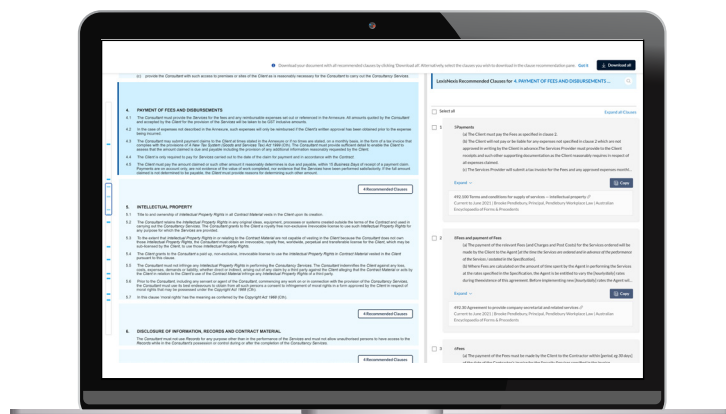

Relevant clauses surfaced when and where you need them. Clause Intelligence is available in both a lightweight, intuitive browser application accessible from Lexis Advance® and in Microsoft Word as a feature of Lexis Create®. The benefits of Lexis Create are amplified with the power of Clause Intelligence.

## Gain confidence with comprehensive coverage when and how you need it

Whatever your transaction, we've got you covered. The Clause Intelligence clause recommendation pool draws from the Australian Encyclopaedia of Forms & Precedents, Practical Guidance, and Intellectual Property Precedents (separate subscription required).

Compare your clause wording side by side to spark ideas for your own document.
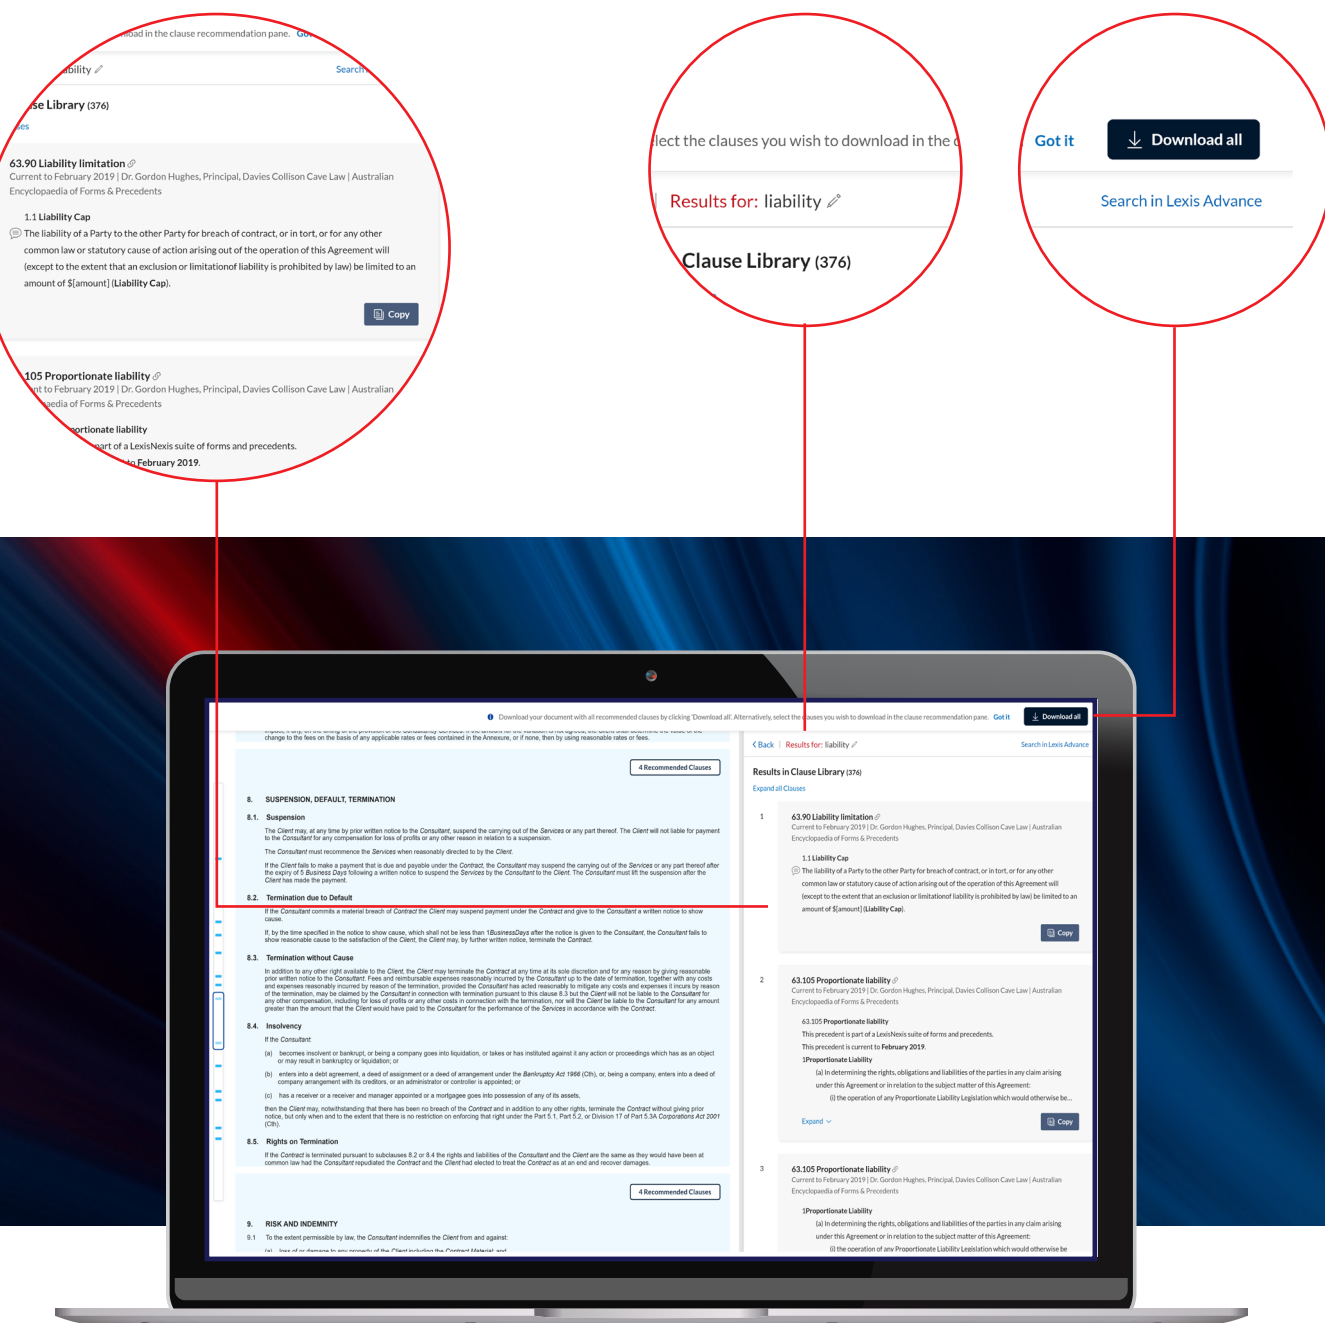

# Speed + Intelligence

**Deliver optimum client outcomes by using clause suggestions and drafting guidance to deliver the best possible drafting**

Suggested clauses come with their own associated drafting notes, with clear and practical guidance about what to consider when using a clause and references to relevant cases, legislation, and secondary materials.

**Realising efficiencies like never before - search the in-app clause library for clause wording not covered in the recommendations**

Search for clauses in the browser application using your own keywords, or jump easily to the powerful Lexis Advance search engine.

# Leveraging AI to deliver unique benefits

### PRACTICAL IMPLEMENTATION OF AI THAT REDUCES YOUR RISK

The Lexis Clause Intelligence recommendation algorithm maximises your exposure to relevant data, making it easier for you to be sure that you've identified and covered off all risks.

### INTUITIVE AND EASY TO USE

Navigate easily between your own clauses and relevant suggestions. In Clause Intelligence on Lexis Create, view suggested clauses side by side with your own document.
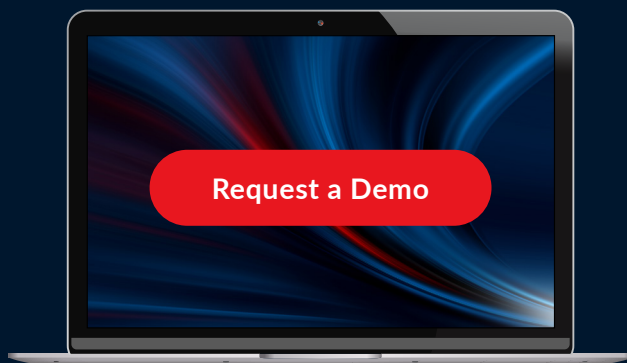

### TAILOR YOUR DOCUMENT AND DELIVER BETTER CLIENT OUTCOMES

Get ideas for clear, high-quality drafting— helping you to create documents that best respond to your clients' legal and commercial needs

### SAVE TIME SO YOU CAN WORK ON HIGHER VALUE TASKS

Reduced need to search on Lexis Advance or other platforms to find clause wording and drafting guidance.
