Security of Critical Infrastructure, Data Security, Privacy and Global Impacts

The global data security and privacy landscape refuses to stand still, presenting businesses with many challenges. To help you meet these challenges, download our new whitepaper, 'Security of Critical Infrastructure, Data Security, Privacy and Global Impacts'.

Cybersecurity is a key register from the Regulatory Compliance Australia and New Zealand content set. Cybersecurity is a hot topic in the market, globally. Therefore, LexisNexis has authored a whitepaper covering SOCI, Data Security, Privacy and its Global Impacts.

Greenwashing and Sustainable Finance in New Zealand

While the sustainable finance industry is booming, public awareness is growing, and a wave of international sustainability initiatives has created an insatiable appetite for financial products free from the stigma and consequences of environmentally and socially damaging investments. But how regulated are they?

Environment, Social and Governance (ESG) is an evolving topic in market, with New Zealand becoming the first nation to impose mandatory ESG reporting. Therefore, LexisNexis has authored a whitepaper covering 'greenwashing' within the financial industry as it relates to "net-carbon zero" product offerings and the regulations affecting them.

ESG is a key register from the Regulatory Compliance international content set.
