

Module	<b>NSW Local Government   Roads and Infrastructure</b>
Jurisdictions	<b>New South Wales</b>
Legal Expert	

**Module Scope**

Does the council plan, construct, and maintain roads and infrastructure in accordance with statutory and safety requirements?

Does the council ensure road and work safety, traffic management, and compliance with environmental and heritage protections during infrastructure works?

Does the council implement effective asset management and maintenance systems and participate in infrastructure partnerships for public works?

**Module Application**

The Roads and Infrastructure module assists councils to:

- › Fulfill obligations for road classification, construction approvals, and maintenance under roads legislation.
- › Integrate safety, environmental impact assessments, and heritage considerations into public infrastructure and road projects.
- › Develop and update strategic and asset management frameworks aligned with funding program requirements.

This module is relevant to engineering, infrastructure, and asset management teams responsible for planning, delivery, and maintenance of council roads and infrastructure.

Non-compliance may result in civil liability, financial penalties, heritage and environmental prosecutions, or loss of public safety and service continuity.
