LexisNexis Canada Announces Commercial Availability of Protégé General AI in Lexis+ AI

Toronto, ON – DECEMBER 11, 2025 – [LexisNexis® Legal & Professional](), a global leader in authoritative legal AI workflows, today announced that Protégé™ General AI is now commercially available in Canada following the successful launch in the U.S. and Australia. Protégé General AI offers private encrypted access to general-purpose AI models within the Lexis+ AI™ workflow solution, including Claude Sonnet 4 from Anthropic and GPT-5, GPT-4o, and o3 from OpenAI.

Protégé General AI is purpose-built for legal professionals with the highest levels of privacy and flexibility, going beyond what general-purpose AI tools can provide. Key differentiators include:

- **Security and Privacy by Design:** The fully encrypted Lexis+ AI environment ensures data privacy protections that far exceed what consumer-grade AI tools offer.
- **A LexisNexis Citation Agent:** The advanced citation agent proactively checks any included legal citations that may merit further examination.
- **Flexible Model Choice:** Users can choose the AI model that best fits each task or use case, such as drafting legal documents, crafting communications, or brainstorming.
- **Integrated General and Legal AI:** By securely combining Protégé General AI and Protégé Legal AI in one solution, Lexis+ AI, legal professionals can solve more problems faster.
- **User and Org-level Control:** Users can easily toggle Protégé General AI on or off, and firms can turn off General AI for users entirely to meet firm or regulatory policies.
