

Search Term Maps

Search Term Maps for Cases, Legislation, Secondary Materials (Commentaries, Textbooks online, Journals and Bulletins) display the location and distribution of each of your search terms in both the results list and within each full document, making it easier than ever to identify patterns and the largest concentration of search terms. Use the (1) graphical view to navigate directly to points in your documents where your terms appear together or select a highlighted term to view an extract of the document where the term appears. The most significant cluster of terms is indicated with an (2) asterisk.

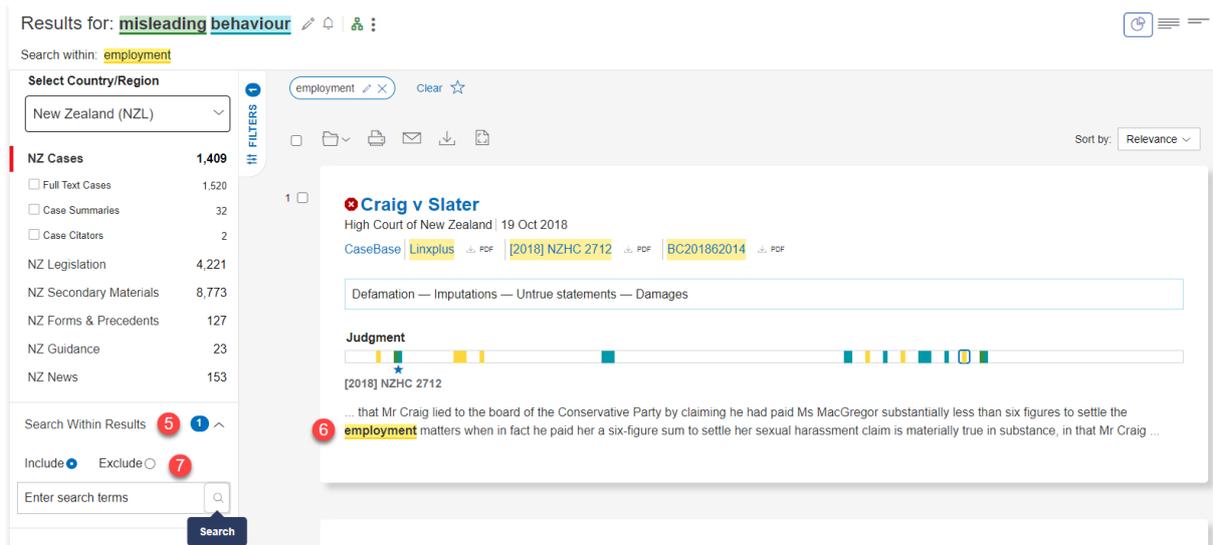

The screenshot shows a legal document page for **Stuff Ltd v Coroner's Court at Palmerston North**, High Court of New Zealand, dated 28 Sep 2018. It includes links for CaseBase, Linxplus, and PDF downloads for cases [2019] 3 NZLR 243, [2018] NZHC 2556, and BC201863458. A search bar contains the text "Administrative law — Judicial review — New Zealand Coroner's Court — Relevant considerations". Below this, there are two sections: "Headnotes" and "Judgment". The "Headnotes" section has a search term map with a red circle (1) at the start and a red circle (2) at the end of a bar. A blue star is positioned over the map. Below the map, the text "[2019] 3 NZLR 243" is shown. The "Judgment" section has a search term map with several green bars. Below the maps, a passage of text is shown with the term "undue harm" highlighted in green. The text reads: "... review of the orders on the basis, first, that the Coroner applied the wrong test by finding that the ground of personal privacy was engaged without undue harm first being established and in the circumstances V had consented to an interview, and second, that the Coroner had failed to consider relevant factors in weighing ...".

When viewing a document, reference the Search Term Map and highlighted terms. Click on select passages, (3) navigate to specific individual terms, or (4) hide the Search Terms bar. Easily identify relevant, useful passages for a more efficient research experience.

The screenshot shows a legal document page for **Headnotes**. On the left, there is a sidebar with a "Search Terms" dropdown and a "Table of Contents" section. The sidebar includes a search term map with a red circle (3) at the end of a bar. The main content area shows the "Headnotes" section with a search term map and a red circle (4) at the end of a bar. Below the map, the text "Privacy — Prohibition of publication orders — Review of Coroner's Order — Whether relevant considerations taken into account — Whether 'general claim to privacy' refers to information involved or concerns about publication — Whether reviewable error to fail to consider 'undue harm' in relation to personal privacy — Whether failure to consider public availability of certain information error of law — Nature of interim orders in Coronial context — Coroners Act 2006, ss 71, 71A, 74 and 75 — New Zealand Bill of Rights Act 1990, s 14 — Family Court Act 1980 — Care of Children Act 2004 — Criminal Procedure Act 2011, ss 200, 201 and 202." is shown. Below the headnotes, a passage of text is shown with the term "undue harm" highlighted in green. The text reads: "Mr Hanzlik died after setting himself alight outside Parliament. His death was referred for inquiry to the Coroners Court. The issues canvassed at the inquest would likely involve his family situation, his relationship with his former wife (V), and their children. On 29 November 2017, the Coroner made interim orders prohibiting publication of any evidence given or submissions made at or for the purposes of any part of the proceedings of the inquiry, the name or any particulars likely to lead to the identification of V or the children, or photographs of V or the children. Stuff applied for review of the orders on the basis, first, that the Coroner applied the wrong test by finding that the ground of personal privacy was engaged without undue harm first being established and in the circumstances V had consented to an interview, and second, that the Coroner had failed to consider relevant factors in weighing the ground of personal privacy against freedom of expression." Below the text, there is a "Held:" section with the text: "1 Two limbs had to be considered before granting a prohibition order. First, the Coroner had to be satisfied that the prohibition was in the interests of one of the specific grounds set out in s 74 of the Coroners Act 2006, being the interests of justice, decency, public order, or personal privacy. Second, the prohibition had to be a demonstrably justified limit on open justice and the right to impart information, having balanced the competing interests. A prohibition order was more likely where there had been heavy and disputed criticism of the applicant. Here, since the inquest was not completed, the extent of any criticism was not yet apparent and in that context interim orders were more likely (see [6], [7], [8], [9], [10], [11])." Below the text, there is a "Gravatt v The Coroner's Court at Auckland [2013] NZHC 390, [2013] NZAR 345 applied. Matenga v Coroners Court at Dunedin [2014] NZHC 2994, [2015] NZAR 289 considered." section.

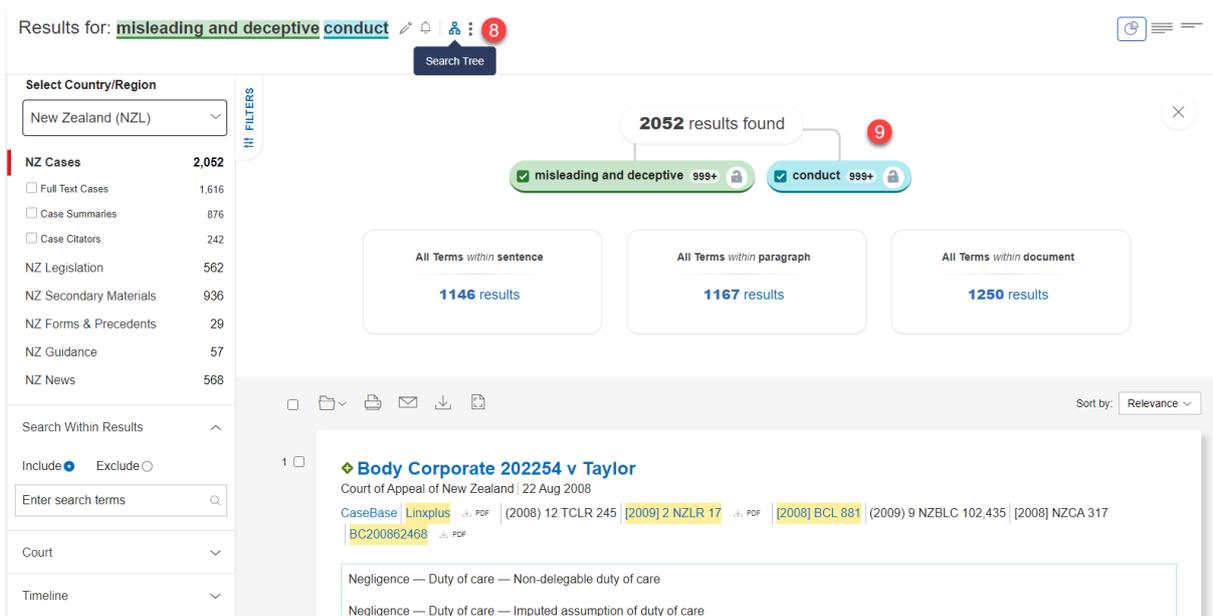

Search Within Results

Gain greater control over your search with Search Within Results (5), which highlights (6) terms from your search query that you wish to include in your results, for visibility into whether all your terms are present in a document—without opening the document. You can also choose to exclude (7) certain terms from the documents being returned in your search results.

Search Tree

For even more search customisation and control, after running a search, select the (8) Search Tree icon to access the (9) first-of-its-kind visualisation tool, and better understand why certain terms are missing from the results set. Select the boxes with the requisite search terms to refresh the results set with those terms.

Missing and Must Include

Gain greater control over your search with Missing and Must Include, which highlights terms from your search query that are missing from a specific document in the results set, for visibility into whether all your terms are present in a document—without opening the document. Missing and Must Include is available for all content types and up to five terms or phrases can be displayed with the 'Missing and Must Include' label. The (10) label 'Missing' at the bottom of the result snippet shows the term that is missing from the document. Click on (11) Must Include to rerun the search so that the search results include the term. See at the top which terms were deemed as (12) Must Include terms in the new query. The results now include your must-have terms.

Criminal law — Criminal procedure — Tikanga Maori — Parallel criminal jurisdiction

[2012] 2 NZLR 695

... trial in the High Court for murder and attempted murder. The accused applied for a ruling that the charges should be dealt with in accordance with **tikanga** Maori, on the basis that the pre-existing customary criminal **justice** system based on **tikanga** Maori was available to Maori and the accused should be tried in that forum. The Crown argued that the present statutory criminal ...
