Experience Confidence

Legal professionals need complete confidence in the output and outcomes of their work. Lexis+ delivers it.

- Superior research, data-driven insights and practical guidance are integrated to show the most relevant content in a single experience.
- On unfamiliar matters, Lexis+ gives you the confidence you are delivering the very best advice.
- Present your recommendations knowing you've covered every base.

**LEXIS ANSWERS®**

Natural language technology helps you build a fast and deep understanding of any matter

**LEGISLATION COMPARE**

Save time and streamline your advice process by comparing different versions

**LEADING CASES**

Instantly locate the critical cases most relevant to your search in a clear and compelling view

Legislation Compare

Quickly compare two versions of legislation side-by-side on Lexis+ to better understand key changes that may impact your client.

- Review side-by-side view or overlaid
- Choose different time frames to review legislation
- Get clear and instant visibility of all additions and deletions

Lexis Answers

Powered by natural language processing, Lexis Answers provides Lexis+ users the ability to type a question into the search bar and receive a succinct answer at the top of their search results.

- Helps you build a fast and deep understanding of any matter.
- An easy and intuitive starting point for junior lawyers
- Enhances the accuracy and productivity of you and your team

Leading Cases

Leading Cases enables you to quickly locate the key cases relevant to a specific legislative provision. Instantly locate the key cases most relevant to your matter.

- See cases in a clear and compelling view
- Relevant provision supporting your recommendations
- Simplify research with data-driven, decision-making support

Integrated Practical Guidance

13 practice areas fully integrated with Legal Research on Lexis+. The content is also fully integrated within your search results enabling you to better choose where you want to start your journey.

- Access Practical Guidance front and centre in your workflow
- Single integrated search surfaces the most relevant guidance more quickly
- Intuitive browse and seamless navigation to key content

Customer Stories

How Lexis+ gave Briony Whyte back 25% of her time

BRIONY WHYTE, ASSOCIATE

Most lawyers need time to research to deliver exceptional client outcomes, but smart lawyers use the best technology to help them achieve these outcomes in less time.

Background

Briony Whyte is an Associate. She acts for a range of local and international clients and has experience across corporate, commercial, and construction law. She's passionate about delivering great outcomes for her clients and she uses technology to help her find incremental efficiencies and deliver exceptional outcomes in shorter time frames.

Challenge

Briony's ability to deliver excellent client experiences relies heavily on her ability to research effectively and efficiently. Spending hours on fruitless research is her number one frustration. She's been a user of Lexis Advance[®], as well as other research platforms, for years - but recently she tried Lexis+.

Solution & Outcomes

"I think the difference I noticed first was that the user interface is much more intuitive," she says. "The research pathways are clearly visible, my workflow is much easier when I can see the network of different topics and how my research might move." For Briony, the simple interface of Lexis+ represented greater focus. "The clean display really helps with focus. I don't tend to look at the things I don't need, so if they're taking real estate on the page I find myself blocking them out. But with Lexis+, that first landing page, is a much more streamlined and less overwhelming experience."

The streamlined experience brought speedier and more efficient research. "Often when you do research, you're given a timeframe - for example, find as much information as you can in 1-2 hours," says Briony. "But I found that with Lexis+, I was able to complete the same amount of research and produce a product of a similar or better quality in a shorter period than I would otherwise. In a task where I was given 1 to 2 hours, I only needed 40 minutes."

One of the features that was most useful to Briony was Lexis Argument Analyser, an AI-powered case law research tool. "Argument Analyser made it so much easier when I was looking for something specific in a case," explains Briony. "On Lexis Advance, you can see that a case has referenced another case, but you can't see in what context it's been referenced. You have to read the whole case to work that out, and it takes a lot longer. With Argument Analyser, you can see that the cases are linked on the basis of the same topic. You can really limit the number of cases you have to read and the amount of reading you have to do in order to find the answers you're looking for."

Again, the efficiency gains translated into significant time-saving. "I think overall, Argument Analyser probably saved me about 25% of the time that I would otherwise have spent on research. All of the most relevant cases were presented on the first two pages of the search, which made it so easy to find exactly what I needed." With the time I saved, I can work on other client work which is great for the practice.

Briony's experience with Lexis+ was one of renewed efficiency. "The user interface is a lot simpler, providing easier access to the sources you need, without having to deal with information overload," she says. "It made a big difference in terms of time, efficiency, and effectiveness. And the research was more detailed and in-depth than it would have been had I just trawled through the cases the way I would traditionally have done. Overall, I'd definitely recommend Lexis+."

The experience of Lexis+ is excellent, I was happy with the research platform I'd been using before — but now, I see there's a better way to do it. I trust Lexis+ to deliver me the information I need, when I need it, how I need it. It's attractive, intuitive, and simple. With Lexis+, I'm confident that I'm seeing the results I need to see in order to properly advise my clients and act for them in their best interests.

—Bradley Dean, Barrister, NSW

Lexis® Argument Analyser

Deep case law research powered by
Artificial Intelligence and trusted
NZ LexisNexis® content

What if you could feel confident that your case law research has met the brief, but get there much faster?

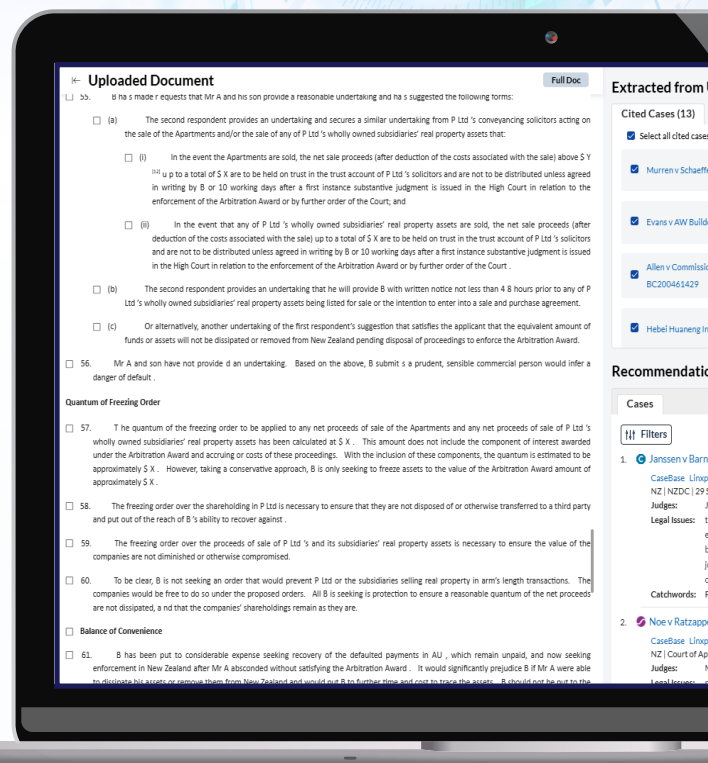

Having a holistic, robust, and real-time view of case law is a key factor in delivering the best outcomes for your clients. Yet ensuring that those hard-to-find cases aren't overlooked can require complex and time-consuming legal research.

Lexis Argument Analyser is an efficiency solution powered by artificial intelligence (AI) that enhances your case law research by swiftly unearthing deep insights in relation to your matter.

Simply upload a legal document or passage into Lexis Argument Analyser to retrieve relevant case recommendations, analysis of cited cases, and mapping of the salient legal issues contained in your document or passage.

These results are returned in one secure dynamic dashboard, ready for you to review.

See deep case law research results in minutes, not hours.

“

Lexis Argument Analyser has become an essential part of my legal research tool kit. What I particularly like about the platform is the ability to cut and paste documents or enter free text to return downloadable authorities, recommendations for relevant legal issues and case law. No more guessing what combination of words will yield results! I am saving a significant amount of time in research which, in turn, is having a positive effect on my practice.

—Cheryl Richardson, Barrister, Victorian Bar

”

I'm often concerned—as I think most barristers are—that I've left out an important case.

—Barrister

Want to feel certain that your legal research is complete?

See on-point case recommendations, citation analysis, and downloadable authorities instantly delivered within an intuitive dashboard.

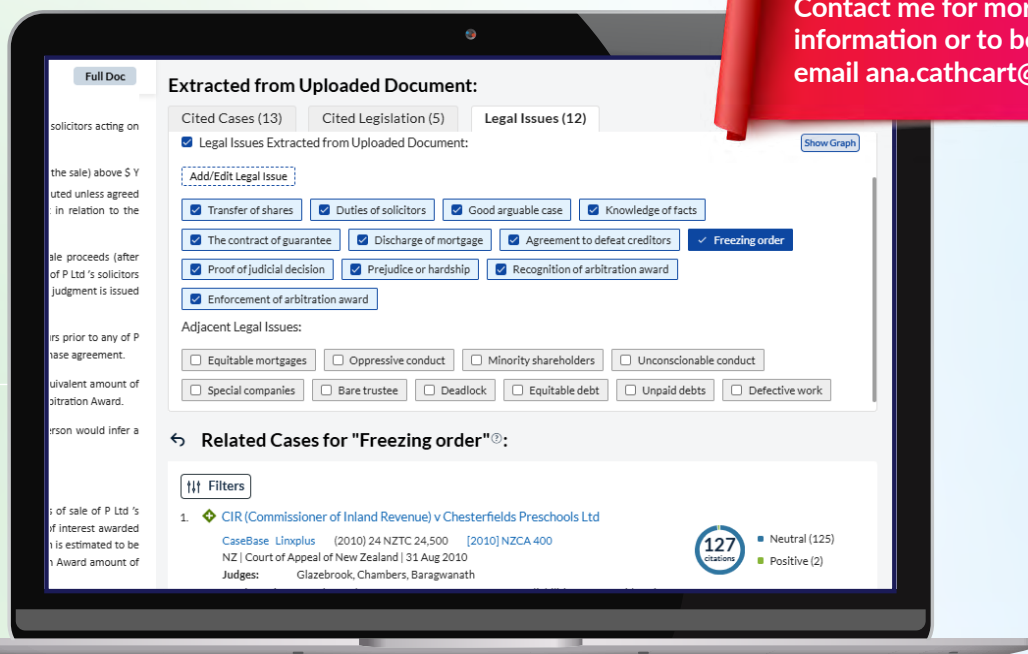

Instead of requiring multiple or successive keyword searches, Lexis Argument Analyser responds to the information you submit, making relevant recommendations on case law and legal issues based on an analysis of your matter.

Argument Analyser allows you to easily evaluate the cited authorities in your document or passage with key data points from CaseBase (case treatment data, catchwords and referring cases) presented in an intuitive interface.

Case and legislation authorities are delivered in full-text format and may be downloaded individually or as a batch, so you can

- ✓ read on the go
- ✓ attach to a brief, or
- ✓ transfer to a court bundle
- ✓ share with colleagues.

Lexis® Clause Intelligence

Your AI-powered drafting research tool

Reduce your risk, save time, and deliver the best outcomes for your clients.

We know that the drafting process can be a challenge: from finding the right wording for your bespoke clause, to maintaining consistency, to capturing and making available the most up-to-date know-how.

Lexis Clause Intelligence comes into your world — the document or precedent that you're drafting — and suggests relevant, expert-drafted clauses in seconds.

The intelligent recommendation system ingests the clauses that you're working on, weighs up the different elements of each clause, and uses that analysis to suggest relevant clauses from industry-leading LexisNexis® precedent content.

Clause Suggestions

Relevant clauses surfaced when and where you need them.

Drafting Notes

Clauses come with their own associated drafting notes, with clear and practical guidance about what to consider when using a clause.

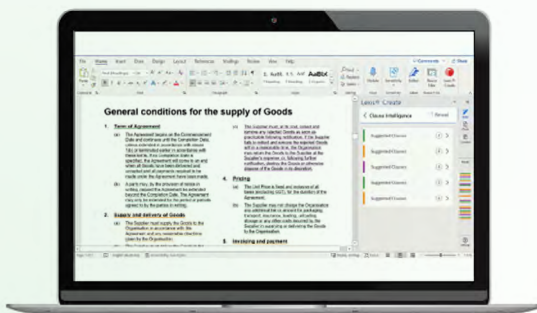

Search in the Clause Library

Looking for clause wording that is not covered in the recommendations? Search clauses in-app using your own keywords, or jump easily to Lexis+.

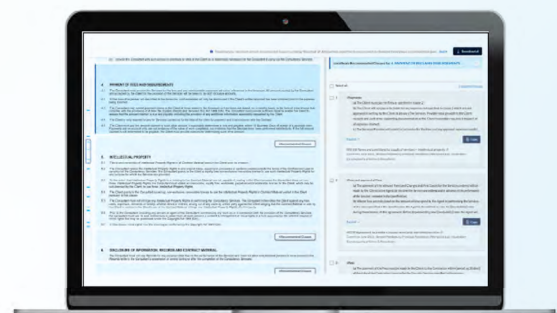

Comprehensive Coverage

Clause Intelligence is anchored in the leading New Zealand Forms and Precedents.

Deliver a new level of intelligence to your drafting workflow

Drive efficiencies to a new level with intelligent clause suggestions that find relevant clause options in seconds. Relevant clauses surfaced when and where you need them. Clause Intelligence is available in both a lightweight, intuitive browser application accessible from Lexis+.

Gain confidence with comprehensive coverage when and how you need it

Compare your clause wording side by side to spark ideas for your own document. The Clause Intelligence clause recommendation pool draws from the New Zealand Forms & Precedents, Practical Guidance and is accessible from Lexis+.

Lexis® Clause Intelligence

Reduce Risk

The Lexis Clause Intelligence recommendation algorithm maximises your exposure to relevant data, making it easier for you to be sure that you've covered off all risks

Intuitive & Easy to Use

Navigate easily between your own clauses and relevant suggestions. In Clause Intelligence on Lexis® Create, view suggested clauses side by side with your own document

Tailor your Document & Deliver Better Client Outcomes

Get ideas for clear, high-quality drafting—helping you to create documents that best respond to your clients' legal and commercial needs

Save Time

Reduced need to search on Lexis+ or other platforms to find the wording and drafting guidance that you're looking for

Top 5 reasons to consider Lexis Clause Intelligence

Find relevant clauses, precisely when you need them

Identify and reduce risk with the help of suggested clauses and drafting guidance

Compare clauses side by side

Reduce screen-switching by using Lexis Clause Intelligence in Lexis Create

Refine your own precedents
