

Nexis® Data as a Service

Elevate your academic projects with real-time and historical data, providing the essential perspective to enhance your research.

Get the data you need, delivered exactly how you want it.

Nexis® Data as a Service enables you to extract meaningful insights at a significant scale. It provides access to a comprehensive collection of thoroughly enriched and dynamically updated data delivered through an advanced, adaptable API platform designed to enhance your academic pursuits.

“

Nexis® Data as a Service made it so easy for us to customize the delivery of news content through an API to our students and faculty within the framework of our own interface.”

— **Hui Hua Chua**, Collections & User Support Librarian, Michigan State University

Unrivaled authority.

Nexis® Data as a Service delivers a transformative, authoritative viewpoint through an unparalleled worldwide compilation of news, company information, legal documents, regulatory data, and patent records.

Next-level technology.

Nexis® Data as a Service pairs sophisticated, dynamic smart data enrichments with proprietary linking and clustering technology expediting data usability for academic exploration.

Flexible delivery.

Nexis® Data as a Service seamlessly integrates with your institution's tools, workflows, systems, and platforms, facilitating dependable analysis, visualization, and sharing—all from a single, reliable source.

Unraveling history and society through the vast trail of big data is a remarkable potential.”

— Tobias Blanke,
Department of Digital Humanities,
King's College

Nexis® Data as a Service Enables You To:

Access Data Effortlessly

Nexis® Data as a Service provides seamless access to a broad spectrum of data, bypassing manual collection. This expedites research timelines, allowing researchers to swiftly adapt to evolving project requirements.

Drive Creativity and Innovation

Harness the power of over 10,000 archived news sources via APIs, extracting targeted data to unveil fresh subjects, trends, and patterns. This resource nurtures creative exploration while upholding research integrity.

Optimize Research Strategies

Link your university to a comprehensive text-based source universe, perfectly suited for training, testing, and validating data science projects, including natural language processing (NLP), machine learning, and advanced analytics.

Accelerate Insights

Translate data into actionable outcomes, empowering research with robust predictions and theories. Employ adaptable search logic to precisely shape data mining projects, ensuring influential results.

Why Choose Nexis® Data as a Service?

Elevate your academic journey with Nexis® Data as a Service. Gain swift insights into emerging trends, positioning your institution at the forefront of innovation. Experience unparalleled research excellence empowered by LexisNexis, a leading authority in news, business, and legal information. Propel your institution's scholarly endeavors with the future of academic research through Nexis® Data as a Service.
