

Nexis® Data+

Unrivaled data.
Next-level technology.
Flexible delivery.

Experience Data Magic.

Find unmatched perspective and insights, to fortify research, improve decision-making, and deepen analytics.

ELEVATE YOUR **RESEARCH**

Nexis® Solutions

Your students and faculty don't just need data. They need to discover powerful, scholarly insights. They need to turn information into significant academic contributions to spur innovation. All while you manage extensive data needs efficiently and economically.

In other words, you need a trusted source for high-quality, accessible data ... now.

Nexis® Data+ makes this next level of data-driven research and analysis possible, empowering researchers to extract meaningful insights from an unrivaled collection of extensively and dynamically enriched data delivered via a next-level, flexible API platform.

A POWERFUL SOLUTION THAT MEETS YOUR NEEDS.

What makes us different?

Our respected combination of comprehensive curated content, deep data enrichments, proprietary linking and clustering technology— all with flexible delivery.

Our solutions will empower your scholars, enabling comprehensive analysis and more robust, evidence-based conclusions.

WHAT DO YOU WANT TO ACCOMPLISH?

Enhance Economics & Business Studies

Analyze news, market and industry data to evaluate market dynamics, consumer behavior, and the impact of economic policies to inform theoretical models and empirical research. Leverage Company and Financial data to support econometric studies, business case development, and market analysis simulations.

Strengthen Political Science & International Relations Studies

Explore geopolitical shifts, policy impacts, and international affairs through comprehensive global news, legal data and regulatory sources to support research related to diplomacy, governance, and international law.

Further Marketing, Communications & Sociology Studies

Establish media monitoring and sentiment analysis for researchers to gain insights into emerging trends, societal shifts, and public opinion from extensive news, social commentary and market data to better understand influential concepts or guide academic inquiry.

Deliver Real-World Data Science & Information Technology Experience

Develop and test algorithms, AI models, and computational theories using large datasets from various industries and sectors to give students hands-on data science experience with data that businesses worldwide depend on already.

Enable Environmental Science & Ecology Studies

Support the growing need to identify environmental changes and sustainability trends by ingesting global news related to environmental, social and governance (ESG) factors, as well as ESG ratings to inform studies in conservation, climate policy, and sustainable development.

HOW OUR UNRIVALED DATA CAN HELP.

Knowledge Expansion & Collaborative Learning

Facilitate access to a wide array of topics for students and faculty, expanding the educational resources and datasets available for serious research.

Advanced Analytical Modeling & Forecasting

Empower researchers with enriched, high-volume data to develop sophisticated models and undertake descriptive and predictive analytics to support groundbreaking research across various fields of study.

In-Depth Text & Data Exploration

Enable comprehensive retrospective analyses of historical news for scholars to detect trends, decipher underlying factors, and predict future scenarios, improving the quality of academic papers and the impact of research findings.

Innovation & Research Enhancement

Track and examine developments in academia and industry, fueling research and development efforts with a vast repository of current and historical news, business, industry, regulatory, and legal data.

Academic Application & Tool Refinement

Improve research methodologies and academic tools by incorporating diverse datasets and insights into research platforms, aiding in the creation of more robust scholarly materials and resources.

TRANSFORMATIONAL & TRUSTWORTHY DATA.

Strengthen cross-disciplinary studies and foster a holistic understanding of complex issues by integrating diverse data sets, including:

News & Web Media

Access 45+ years of global news from 38,000+ sources, spanning print, broadcast, and web platforms for near real-time and archived local, national, international, and industry news.

Company & Financial

Explore the financial intricacies of over 489 million global public and private companies with detailed profiles, executive dynamics, annual reports, SEC filings, and more.

Biographical Sources

Identify key individuals for business development and talent acquisition with detailed contact information, educational and professional milestones, and affiliations.

Compliance Data

Screen third-parties against critical datasets covering Politically Exposed Persons (PEPs), Sanctions & Watchlists to enhance risk mitigation.

ESG Ratings

Streamline ESG performance evaluations with consolidated data, facilitating seamless due diligence and reporting processes.

Legal

Access a comprehensive collection of Federal, State, and International court cases spanning 14 jurisdictions, including the United Nations International Court of Justice.

Intellectual Property

Explore expansive intellectual property (IP) data, including images, full-text documents, and enriched data, guiding innovation and competitive strategies.

EXTENSIVE AND DYNAMIC DATA ENRICHMENTS.

It's not just the amount of data. The real value of Nexis® Data+ is in how we classify and enrich it.

Nexis® Data+ pairs dynamic smart data enrichments with proprietary linking and clustering technology.

That means **more targeted data calls yielding more relevant results—and more powerful, accurate analysis.**

We do the heavy lifting for you, adding powerful metadata and enrichments, including:

TRANSFORM DATA INTO ACTION, FASTER.

By combining an unmatched collection of global data and sophisticated data enrichments with our proprietary linking and clustering technology, Nexis® Data+ empowers your team to precisely identify and categorize content, generate fewer false positives, draw correlations and build relevant connections. Has data analysis ever been easier? We don't think so.

FLEXIBLE DATA DELIVERY.

Unlock simplicity by coding against our single API and instantly tap into the extensive LexisNexis data universe. Save time on data prep, accelerate insights, and enjoy a consistently formatted experience.

Experience a fast and flexible data journey with our easy-to-integrate, next-generation API platform. It seamlessly combines advanced search precision, extensive data enrichments in a consistent JSON format, and a single point of entry to our global content. Nexis® Data+ adapts to your specific requirements, offering unparalleled flexibility. Our dedicated data experts collaborate with you to determine a custom solution that perfectly aligns with the unique needs of your business.

 **SEARCH**
Search and retrieve the vast Nexis® Data+ universe within your own environment. Nexis® Data+ simplifies technical complexities with seamless access to relevant datasets, so you don't have to worry about the underlying infrastructure.

 **ARCHIVE**
Supercharge your analytical and modeling capabilities with access to historical data sets. Harness the power of our extensive and enriched archive through batch deliveries, one-time data set pulls or by requesting an entire dataset.

 **MONITOR**
Stay up to date with the latest information related to identified subjects, events, terms or persons of interest. Automate the execution of searches, streamline the process of staying informed and receive real-time updates to efficiently track the topics you care about.

 **FIREHOSE**
Get new and updated information as it happens. Whether you need a real-time stream of all available data or specifically refined data sets in a constant feed, Nexis® Data+ provides a steady flow of enriched data, piped directly into your environment to keep models and analysis current.

SEAMLESS INTEGRATION WITH YOUR DATA PLATFORM.

Nexis® Data+ integrates easily with data platforms such as Snowflake, so you can leverage the power of LexisNexis® datasets within your preferred environment. Our partnerships provide the flexibility you need to deliver powerful insights.

THE POWER OF DATA MAGIC.

We've combined our unrivaled data universe, deep data enrichments, best-in-class data science technology and a flexible API platform, to deliver a solution to help you transform data into insights, and insights into action.

The result? A powerful data solution that provides the depth and breadth of data to power analytics, so you can craft a layered approach to research, gaining a multidimensional perspective to inform academic inquiry and sharpen governmental decision making.

EXPERT TOOLS & SUPPORT.

We prioritize your success by providing expert-level support to ensure your projects not only get completed but are highly successful. Nexis® Data+ Provides:

- **ON-BOARDING & TRAINING:**

Our Data experts provide step-by-step integration support and training throughout the on-boarding journey to ensure your team grasps the structure and schema of our data and how to construct searches, enabling you to hit the ground running.

- **EXPERT TECHNICAL SUPPORT:**

We provide ongoing technical support as your needs and projects evolve, to ensure your data solutions stay relevant for you.

- **24/7 GLOBAL SUPPORT:**

Our Data experts are available 24/7 to ensure your project is running smoothly. We offer global support as your needs and projects evolve—28+ countries with local and regional customer support.

- **ADVANCED TOOLS:**

We provide tools and guidance through the Nexis® Data+ Portal offering in-depth API documentation, response examples, source data insights, delivery options, schemas, sample code, and access keys for sandbox environments for seamless data exploration.

We are committed to helping you achieve your organization's goals with data solutions tailored to your unique needs. We are your dedicated partner in achieving data excellence.

Enlighten research through diverse data.

Let our data experts show you what's possible.
