

Nexis® Data+ : Power Infinite Insights with Unrivaled Datasets

The true power of data lies not in its volume alone, but in its diversity. By embracing a wide spectrum of data sources—both internal and external—organizations unlock a more complete perspective, fostering enhanced decision-making across the enterprise.

External data sources offer a wealth of information to complement and enhance internal data, leading to more informed and robust strategies. This synergy paves the way for a more nuanced and holistic view of the business landscape, allowing you to anticipate changes, adapt quickly, and stay ahead of the competition. But identifying and aggregating the myriad sources you need takes time and effort better spent on analyzing the data.

Nexis® Data+ solves that problem, streamlining delivery of dynamically enriched data so you can begin uncovering actionable insights, sooner. With flexible options to tailor and scale data integrations to fit your unique needs, Nexis Data+ connects you to an expanding data universe—growing by nearly 4M documents a day—all from a single provider.

 Explore the datasets available from **Nexis Data+** — and why they matter — to see what's possible.

NEWS & WEB MEDIA DATA

What's Covered

Spanning more than 100K current news sources, the news and web media data from Nexis Data+ also offers a deep 45+ year news archive. This global dataset includes sources from 200+ countries in 50+ languages and covers premium and web-harvested news publishers.

Newspapers
Newswires
Press Releases
Magazines
Trade Publications
Broadcast Transcripts
Thought Leader and Industry Blogs
Social Commentary

The value does not rest with variety and volume alone; extensive enrichments—industry and topic tags, geo-location mapping, entity extraction, sentiment analysis, and other metadata—help you filter out the noise to speed insight discovery.

Whether you want to ingest general news to capture the pulse on public opinion, ESG-specific news to monitor emerging environmental, social, and governance trends, or an adverse media feed to enhance risk analysis, Nexis Data+ has you covered.

Why It Matters

Incorporating news and web media data into your analytics empowers you to stay ahead of reputational risks and deeply understand market dynamics, essential for effective crisis management and brand positioning. It also aids in monitoring media coverage changes, refining brand reputation, and adjusting public relations, marketing, and sales tactics for superior performance.

In addition, news data incorporated into risk assessments and due diligence processes enhances your ability to identify trigger events that could pose threats or unveil opportunities, crucial for informed investment modeling and strategic decision-making. This integration offers a dynamic view of the global landscape, enabling businesses to stay abreast of market fluctuations and geopolitical changes, thereby optimizing investment strategies and mitigating potential risks.

COMPANY & FINANCIAL DATA

What's Covered

With data on more than 489M private and public companies, you gain access to corporate family trees, stock tickers, sales and revenue data, and more. In addition to profiles, analyst reports, SEC filings, and merger and acquisition data, Nexis Data+ offers access to legal entity data covering 165 million companies and 220 million executives in 130 countries. Examples of data providers include:

- Best's Company Reports
- Bundesanzeiger Verlag
- CreditSafe
- FBR Asian Company Profiles
- GlobalData Ltd.
- Handshakes Capital Markets Data
- Hoover's, Inc.
- IHS Shipping Data
- Infocredit Group Business Information Reports
- Integra Industry Reports
- LexisNexis® Corporate Affiliations™
- London Stock Exchange
- SGA Executive Tracker
- Vickers Securities Report
- Worldbox AG
- Worldscope International Company Profiles
- Zack's Equity Research

Why It Matters

Adding company and financial data into analytics, applications and workflows significantly enhances the insights you capture to protect and grow your business. For example, clear visibility into beneficial ownership structures is critical for adhering to regulatory compliance standards. Company data also yields valuable investment insights and market intelligence, allowing stakeholders to make better informed decisions based on robust, financial data-driven analysis. Ingesting company and financial data facilitates a deeper understanding of market trends and potential risks, helping you navigate dynamic markets and complex regulatory environments while making strategic decisions with greater confidence and precision.

RISK & COMPLIANCE DATA

What's Covered

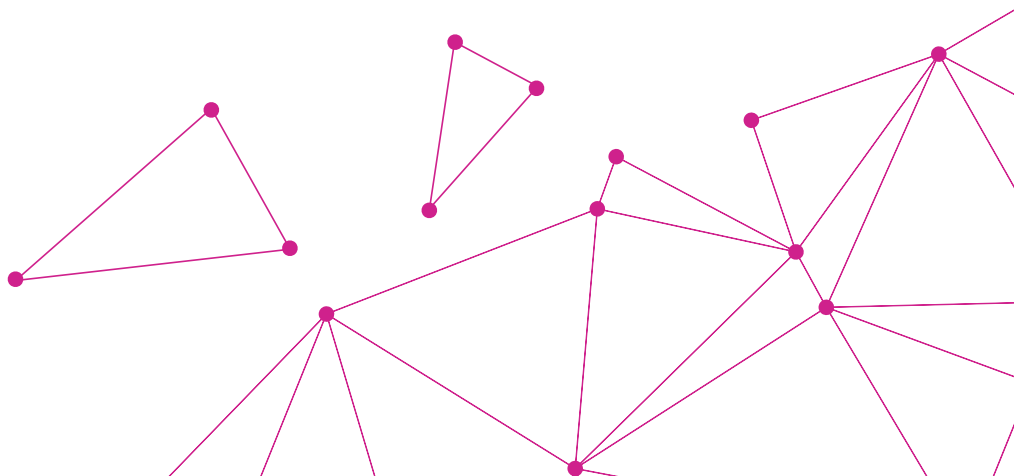

Nexis Data+ also features datasets aligned with best practice for third-party risk management and regulatory compliance, such as 1.5 million profiles of politically exposed persons (PEPs), their family members, and close associates from 240 countries or territories. In addition, available data covers 1,400+ sources of domestic and global sanctions, watchlists and blacklists ranging from white collar crimes to crimes against humanity. Examples of lists include:

- OFAC—Specially Designated Nationals (SDN) List; Non-SDN List, including Palestinian Legislative Council; Enhanced Sanctioned Countries List
- Commodity Futures Trading Commission List of Regulatory and Self-Regulatory Authorities
- Department of State, Directorate of Defense
- Trade Controls, Consolidated List of Debarred Parties
- European Union Designated Terrorists Consolidated List
- FBI—Hijack Suspects List; Most-Wanted List; Most-Wanted Terrorists List; Seeking Information List
- Financial Industry Regulatory Authority (FINRA)
- Actions File
- International Police Most Wanted and Red Alerts
- Office of Controller of Currency—Unauthorized Banks List
- State Department Terrorist Exclusion List
- United Nations Consolidated List
- U.S. Bureau of Industry and Security—Denied Persons List; Unverified List; Entity List
- World Bank Ineligible Firms List

Why It Matters

In today's volatile business climate, surfacing potential risks sooner helps you establish agile, proactive strategies that align with regulators' and stakeholders' expectations. Nexis Data+ enables enriched visibility that supports risk-based due diligence and compliance with other international regulatory standards. Whether using historical analysis to spot red flags related to potential partners or transactions or pattern identification to reveal emerging regulatory trends, Nexis Data+ helps you make informed decisions to maintain the integrity of your business operations in a complex global regulatory environment.

ESG RATINGS DATA

What's Covered

With ESG ratings for 37k+ companies in Europe, Asia, and North America, Nexis Data+ improves visibility into another key consideration: How organizations you depend on perform based on environmental, social or governance factors. The ratings reflect analysis of 350M data points aggregated from a variety of ESG sources including:

- 10 premier socially responsible investment (SRI) analysis firms
- More than 600 nongovernmental organizations (NGOs), government agencies, news feeds, social networking groups, smaller for-profit organizations, and publishers

Why It Matters

Environmental, social and governance expectations gained considerable momentum in recent years, increasing your need for visibility into ESG ratings. Consumers and investors expect organizations to do more than talk the talk. You need to actively fulfill ESG commitments. With Nexis Data+ ESG ratings data, you gain vital visibility to help guide both internal ESG strategies and external engagements, such as supplier relationships, which can significantly bolster or jeopardize ESG credentials.

BIOGRAPHICAL DATA

What's Covered

Nexis Data+ features biographical data aggregated from 150+ biographical sources, giving you insights into personal information, career histories, educational backgrounds, credentials, and more. Covering executive profiles, as well as profiles and obituaries of newsworthy persons, the dataset features information from:

- Gale Biographies
- SGA Executive Tracker
- Professional Contacts
- The Complete Marquis Who's Who® Biographies
- The Official Board Biographies
- Salutory
- Morningstar, Inc. U.S. Executive Compensation Database
- Executive Biographies from MorningStar, Inc.

Why It Matters

Whether you're preparing to make a major hiring decision or evaluating a potential merger or acquisition, you need to be able to validate the backgrounds of top officers, board members or other influential players to understand potential risks. Likewise, when you're looking to expand your sales efforts, biographical details can help you find likely prospects or avoid conflicts of interest sooner.

LEGAL DATA

What's Covered

Nexis Data+ features a dataset spanning more than 50K legal intelligence sources, ranging from legal news, law reviews and journals to decided court cases from state, federal and international courts, covering the United States, Canada, England, Wales, Ireland, Northern Ireland, Scotland, European Union, Malaysia, Brunei, Hong Kong, Australia, New Zealand and South Africa. Other types of legal data available include:

- Agency Decisions
- Expert Witness Materials
- Statutes & Legislation
- Jury, Verdicts & Settlements

Why It Matters

Ingesting legal data into your intelligence applications helps you stay alert to decisions, enforcement actions, or rulings that could impact your business. But beyond improved visibility into emerging regulatory or legal trends, legal data also empowers decision makers to vet third parties to help mitigate risk. Analysis of legal data related to an entity or individual can, for example, surface patterns that sound a warning bell, like a particularly litigious history or current legal entanglements that could put your organization at risk.

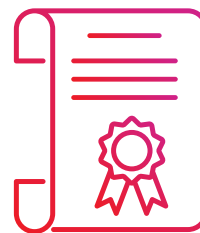

INTELLECTUAL PROPERTY DATA

What's Covered

Access key trademark information including names, registration details, and expiration dates, and decode vital copyright aspects like ownership and registration. In addition to aggregated data from 100+ IP news titles, Nexis Data+ typically captures 55K+ trademarks a month, expanding on the 37M+ copyrights and 30M+ trademarks already included in the dataset.

- Global IP News
- US Copyright and Trademarks
- International Trademarks

Why It Matters

Leveraging detailed trademark and copyright data significantly enhances R&D and product development by ensuring originality and avoiding infringement, while also providing deep insights into competitors' strategies and innovations. This knowledge not only safeguards intellectual property rights but also informs strategic decisions, helping you maintain a competitive edge in rapidly evolving markets.

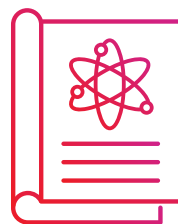

ACADEMIC JOURNALS

What's Covered

Nexis Data+ makes it easier than ever to explore a diverse array of scholarly and industry journals relevant to multiple disciplines, allowing you to conduct in-depth analysis and stay current with the latest academic insights from sources such as:

- Proquest
- Gale
- Emerald Group Publishing
- Sage Publications

Why It Matters

Academic and industry journals represent a window into emerging technological advancements, scholarly findings, and market trends. By harnessing this rich resource with the flexible Nexis Data+ API, you gain a direct line of sight to impactful scholarly research and industry intelligence that is useful for sparking innovative R&D strategies, enhancing competitive intelligence, developing government policies, and furthering academic research.

Experience Data Magic with Nexis® Data+

We've combined our unrivaled data universe, deep data enrichments, best-in-class data science technology and a flexible API platform, to deliver a solution to help you transform data into insights, and insights into action.

THE RESULT:

A powerful data solution that empowers your team with the knowledge to become subject matter experts, allows you to deeply track your markets and competitors and gives you the ability to quickly identify unique insights—putting you at the forefront of innovation.

Transform data into action.
