

Academic Research Reimagined for Digital Natives

The needs of students conducting academic research have not changed. They still need reputable sources of information when they write papers, prepare presentations or tackle team projects. What has changed is HOW digital natives want to conduct research. Meet Nexis Uni®, a simple, intuitive research platform designed with input from students that have never known a world without Google.

Turn rookie researchers into accomplished academics

Nexis Uni is much more than a research database; it delivers the digital research experience that your students expect—accessible from students' preferred devices for ultimate convenience. Librarians can also add a Nexis Uni search widget to the institute's intranet and library pages, so students have the option to start research on the fly. Nexis Uni delivers measurable advantages for librarians, educators and students alike. The easy-to-navigate Nexis Uni interface:

- Reduces training demands, allowing librarians to focus on higher value tasks
- Offers educators greater visibility into student participation on required reading or group assignments
- Increases student satisfaction and drives usage for demonstrable ROI
- Ensures your students are proficient in the skills—and types of research tools—that business professionals around the world depend on

The bottom line? You get maximum value for your library's resource budget with a dynamic research platform that connects students to the comprehensive, trusted content you expect from LexisNexis®.

Experience the Nexis Uni difference

Academic research on Nexis Uni starts right from the homepage. Students can quickly conduct either natural language or complex Boolean searches across the entire content collection, making it an ideal tool for novice and advanced researchers alike. But that just scratches the surface.

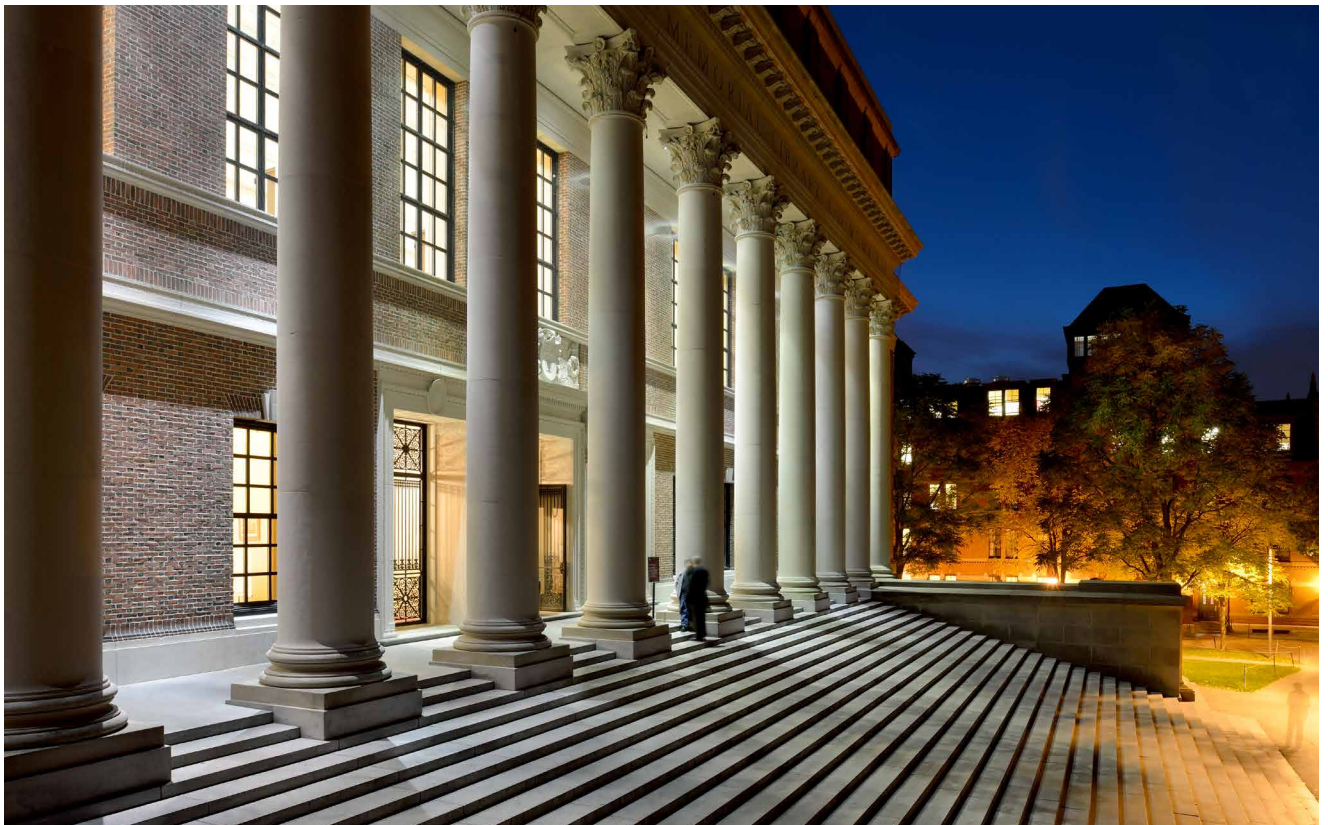

It has a very streamlined feel that is more inviting than most databases. With students my age, it's all about convenience and ease-of-use.

CITATION-WORTHY CONTENT

Nexis Uni delivers unmatched depth and quality when it comes to content. With more than 15,000 news, legal and business sources, Nexis Uni helps students find credible sources including:

- Print and online journals, television and radio broadcasts, newswires and blogs
- Local, regional, national and international newspapers with deep archives
- Extensive legal sources for federal and state cases and statutes, including U.S. Supreme Court decisions since 1790
- Unparalleled business information on more than 80 million U.S. and international companies and more than 75 million executives

The Content Scholars Need with the Research Experience Digital Natives Want

PERSONALIZED EXPERIENCES

Nexis Uni supports campus-wide IP-authenticated access, but students also have the option to create individual profiles so they can:

- Customize their home page to feature one of the discipline pages
- Save searches to re-run in the future
- Create Alerts on topics of interest to improve current awareness
- Bookmark documents for later viewing
- Identify previously-viewed documents at a glance to save time

And because the set-up of User IDs and Passwords is a self-service process, you don't get bogged down with registration requests.

INTUITIVE DISCOVERY

The big search box sets the stage, but Nexis Uni offers other distinctive ways for students to find the information they need.

- Curated discipline pages present related content to the topic, top publications and specialized search forms—helpful for new students who want to learn about a discipline or advanced students who need fast, current awareness within their field of study.
- Nexis Dossier content provides a wealth of information about companies in the U.S. and around the world—whether it's research for a class assignment or researching job prospects and preparing for job interview
- Task-based search tabs allow first-year students to quickly conduct research for common assignments, such as writing a paper on the pros and cons of a topic or creating an in-depth company profile.
- Predictive search function suggests likely sources or keywords as terms are typed into the search box.
- Results filtering allows students to quickly drill down to highly-relevant results based on location, publication type, subject, industry, geography or timeline.

COLLABORATIVE ENVIRONMENT

Nexis Uni allows students to work together more efficiently—and remain individually accountable.

- Students can create and share folders on the fly for team research projects or study groups.
- Document and search-string sharing in a collaborative workspace reduces source overlap on group projects.
- Faculty members can set up 'required reading' folders to share with class members, gaining visibility into which students are—or aren't—checking in.
- Students can highlight portions of a document, add notes and save the annotated document in a folder to share with other students.

Show Your Students a New Route to Academic Research

By providing students with an academic research solution that addresses their preferences and provides access to vetted, comprehensive content, you empower them to become well-rounded scholars who submit better work.

Nexis Uni has earned a spot as a
