

Analytics for firms that insist on accuracy.

High stakes litigation demands the highest level of accuracy to win. That's why 77% of Am Law 100 firms rely on Lexis Analytics™, the world's most advanced legal analytics solutions*.

Your insights are only as good as your analytics.

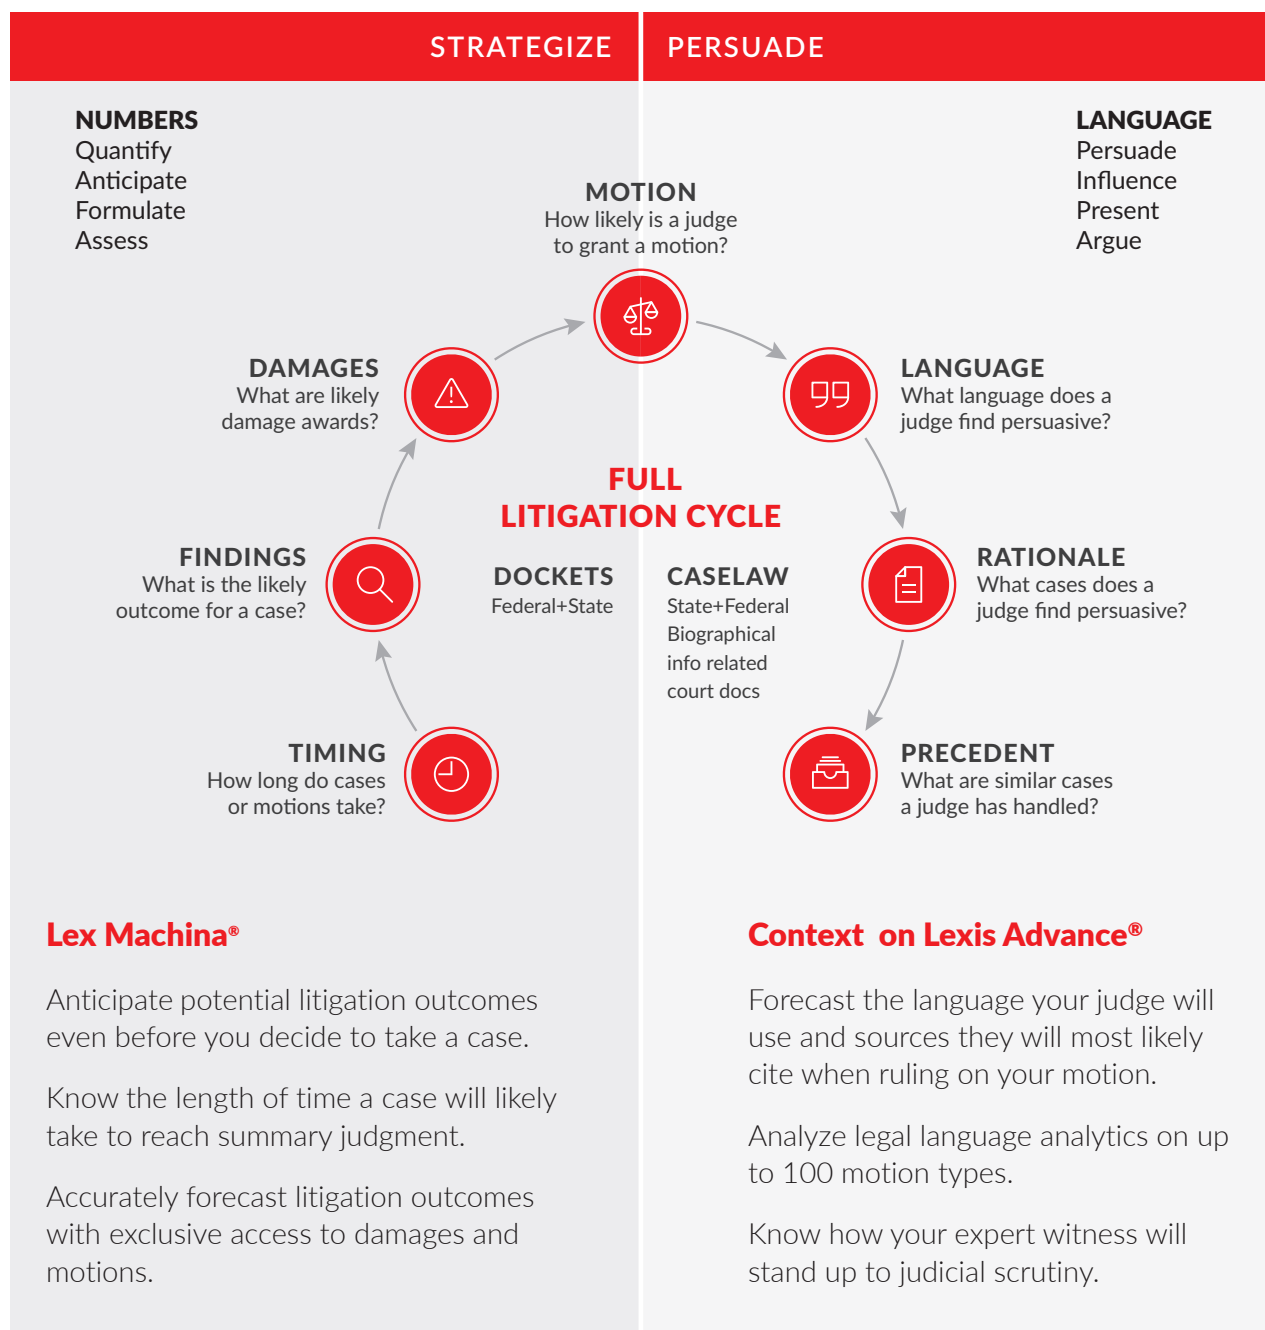

Only **Lex Machina** uses a proprietary Attorney Data Engine™ to review every legal document and repair the data that makes other analytics companies fail to deliver accurate results. Firms that fail to recognize the importance of accurate data risk strategic errors.

Delivering you insights is our strength.

By applying advanced AI and language analytics, **Context** uncovers insights on how your judge thinks and rules, so you can craft your most persuasive argument. Other products allege comparable solutions by representing standard filtering as analytics. Don't be fooled—**Context** is the industry's only case law language analytics solution.

Designed to support your entire litigation.

Together, **Lex Machina** and **Context** are the most accurate set of analytics tools designed to assist your litigation from start to finish—from building your strategy to arguing before your judge.

DON'T SETTLE FOR INFERIOR ANALYTICS. DISCOVER WHY LEXIS ANALYTICS WINS.
