New enhancements

We are excited to announce the next step in the evolution of our Digital Library, particularly with respect to ease of use and navigation. The next scheduled enhancement release for LexisNexis® Digital Library is scheduled for 7/7/2014. This series of enhancements is a demonstration of our continued commitment to improving ease of use and navigation for our customers. We are committed to deliver on our goal of providing a one-stop digital platform for all the highly valued digital content our customers want to subscribe to.

The LexisNexis® Digital Library team will be reaching out to key library staff and patrons across our customer base via the Digital Library User Group on LexTalk℠, AALL Meetings, 1:1 in-person and phone interviews, and more throughout the summer of 2014 to hear your thoughts for additional improvements.

Navigation and Ease-of- Use Highlights

Improved content classification and refined checkout period options: This functionality gives administrators the ability to set lending periods based on the physical format type of a given title, allowing for more optimal circulation. A treatise or study aid, for example, can now be set with a shorter lending period compared to a desk book which could be checked out for as long as a year. The new classifications and lending periods are:

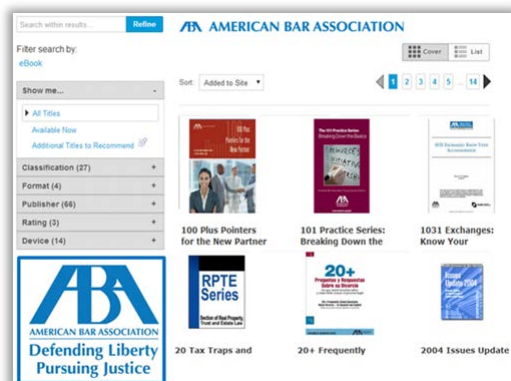

Publication Classification	Days
Treatises	7, 14, 21
Desk Books	7, 14, 30, 120, 365
Newsletters	1, 3, 7
Forms	7, 14, 21
Primary Law	7, 14, 21
Study Aids	1, 3, 7

With this enhancement we have also reviewed our entire portfolio and retagged content for easier location and sorting of titles.
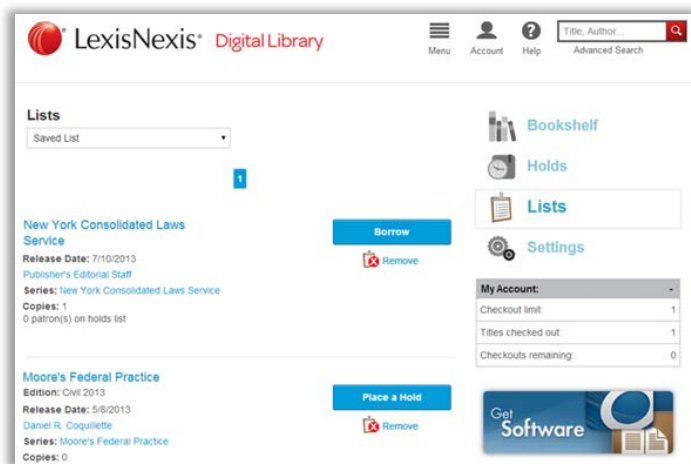

Question: What will happen to previously defined lending settings upon release?
Answer: All previously established settings will be erased and replaced with the options in the chart above. Specialized settings can be restored if necessary. A LexisNexis Digital Specialist will work with customers on a case by case basis.

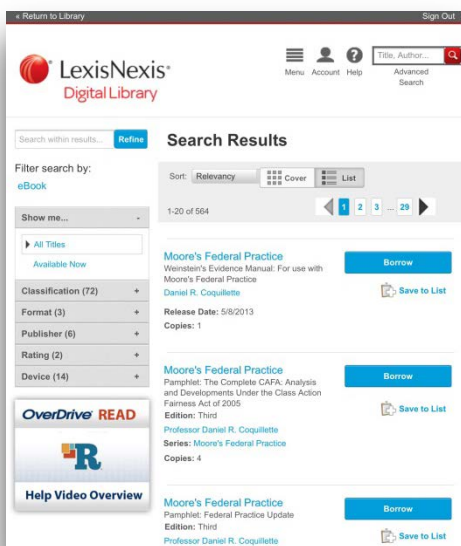

ABA eBooks

The LexisNexis Digital Library now features a select collection of American Bar Association (ABA) eBooks. ABA eBooks are added to your collection only by contacting your LexisNexis Digital Library Specialist. ABA eBooks will be displayed within the **Featured Collections** Menu.

Save to List Feature, One-Click Borrowing and Sample Review

The ability to create a personalized "favorites" list, and review and borrow content directly from eBook listing pages will speed access and location of key titles.

See example screen shot of what books will look like when you "hover" over them in an eBook listing.

View All Series

This new view provides a product-level link-enabled view of all multi-volume content to improve navigation and ease of use. You can now click to borrow from a large multi-volume series while on the same page.

Streaming Video

Paving the way for future multimedia offerings, users will be able to view video files directly within their digital libraries without any software installations.

Streaming video content will include all the same administrative options such as lending periods, automated expiration and even analytics.
