Extensive Legal Experience in Intellectual Property

- Over 10 years devoted to protecting worldwide intellectual property assets.
- **Patent:** Counsel clients and develop patent strategies over a broad spectrum of patent matters including: application preparation and prosecution; patentability, non-infringement and freedom to operate opinions; interferences; reissue and reexaminations; design patents; and trade secrets. Represent inventors in Examiner interviews at the USPTO.
- **Trademark:** Counsel clients on trademark selection, conduct searches and prepare clearance opinions. Conduct U.S. and international trademark oppositions including settlement negotiations. Monitor mark usage and investigate third party use of marks. Prepare Cease and Desist Letters.
- **Agreements:** Negotiate Joint Development, Licensing, Consulting and Non-Disclosure Agreements.
- **Litigation:** Monitor competitive markets, assess liability, develop appropriate pre-litigation strategies, and support ongoing litigation including performing legal research and writing.
- **Other IP:** Develop internal corporate IP policies and procedures. Provide counsel on copyright and domain name issues. Prepare UDRP filings.

Significant International Practice

- Developed IP strategies in patents and trademarks according to the laws and practices of WIPO and of particular countries and regions including: Saudi Arabia and other GCC Countries; China; Korea; Japan; Canada; Mexico; and Europe.
- Negotiate international joint development agreements and licenses. Develop patent scope and filing strategies based upon agreements.
- Knowledge of local customs associated with various countries through travel, including Shari 'a law and Middle Eastern Culture.

Strong Managerial and Communication Skills

- Counsel clients by maximizing global intellectual property assets while managing budgets.
- Search and analyze competitive markets; provide guidance to management regarding most promising technology, prepare development and pre-release strategies.
- Interact with all corporate personnel including inventors, managers, business unit and corporate Vice Presidents.
- Prepare and present training for engineers, scientists and entrepreneurs on various IP related topics.
- Manage and train associates in various technologies and legal practices. Prepare and present attorney training seminars.

Familiarity with Numerous Technologies and Disciplines

- Chemical Engineering: Separation including oil/water in down hole applications; Water Treatment; 3D Printing.
- Mechanical Engineering: Valves; Pedestals; Cabinets; Automotive; Seals.
- Materials: Metals; Nanostructures; Semiconductors; Coatings.

Other Legal Experience

- Perform Due Diligence and Prepare Merger Documents.
