

The first place to turn to reinforce your hard-won experience with hard data

Check your gut. Sharpen your strategy. **LexisNexis® Verdict & Settlement Analyzer** gives you access to the industry's largest collection of verdicts and settlements for data-driven case assessment.*

With LexisNexis Verdict & Settlement Analyzer, you can:

- Access more than 1.2 million jury verdicts and settlements—the largest number in the industry*
- Adjust relevant variables and see the possible range of outcomes with dynamic graphics
- Zero in on results relevant to your case with convenient pre- and post-search filters
- Act with authority based on informed, data-driven decisions
- Review cases from every angle to improve early and ongoing case assessment

Now LexisNexis Verdict & Settlement Analyzer is even better.

Simple, flexible search.

Tap into more than 1.2 million verdict and settlement records easily with a tool that allows you to harness insights from similar cases and jurisdictions from a single, aggregated source. Start early case assessment with LexisNexis Verdict & Settlement Analyzer first for comprehensive and efficient research.

The screenshot shows the search interface for the LexisNexis Verdict & Settlement Analyzer. At the top, there's a search bar with placeholder text "Enter terms, sources, a citation, or Shorthand®" and a "Search" button. Below the search bar is a "Narrow by:" section with several filter categories: "Jurisdiction", "Practice Area & Topic", and "Search Tips". The "Jurisdiction" section is expanded, showing filters for "U.S. Federal" (with "By Court" checked, showing "United States Supreme Court" and "Federal Courts of Appeal" options), "States & Territories" (listing all US states and territories), and "Search Tips" (including "Include non-jurisdictional content" and "Include related federal content").

Get only the data you need.

Advanced analytics make it easy to work with your data the way you want to. Begin with convenient pre-search filters, or start broadly and then apply various filters to zero in on the most relevant results. Either method helps you focus on what's important without sacrificing thoroughness from the start.

Pinpoint what matters.

Interactive analytical reports feature charts and graphics that quickly reveal resolution trends and spikes, but show more details when you hover over them. Access the most relevant information to your case by filtering by year, award amount, resolution type or other variables. Also, each time a variable is changed, the graphs are redrawn and your cite list is updated.

The screenshot shows a specific document entry titled "Priebe v. Nelson, 39 Cal. 4th 1112". The interface includes standard document navigation tools like "Add to", "Print", "Email", and "More". Below the document title, there are links for "Jump to", "Results", "Previous Document", and "Next Document".

Your favorite search tasks, simplified.

Intuitive icons make it easier to print, download or email documents. Also, highlight, annotate or copy portions of documents with just a few clicks. And with online folders and 90-day search history, you can cover more ground faster, and more easily.
