- Our proprietary database of Private Placement Memoranda includes thousands of recent global and domestic offerings exempt from SEC registration under certain '33 Act regulations like Rule 144A.
- Additional search parameters include exemption type, security type, offering amount, currency and party information (issuer, legal advisor, book runner, trustee, auditor).

No-Action Letters Advanced Search

Knowledge Mosaic boasts nearly 70,000 full-text searchable letters that span more than 40 years (over 10 times what you'll find on sec.gov!).

- The new SEC No-Action Letters Advanced Search feature gives you dedicated and powerful access to this collection, providing you with valuable SEC staff positions and analysis.
- Premium search filters allow you to sort results by requesting company, SEC subject category and SEC position (concur or unable to concur). Include or exclude letters on shareholder proposals under Rule 14a-8.
