

SEDAR® Searching

For over a decade, we've offered high-powered, real-time searching on SEC EDGAR® filings. Now, we are pleased to offer access to SEDAR (System for Electronic Document Analysis and Retrieval) disclosure materials, the Canadian equivalent of EDGAR. This comprehensive database of over 4 million documents dates back to 1997 and is updated in real time.

With our SEDAR search page, you can:

- Filter by a variety of company attributes, including industry, location, exchange and issuer size based on total assets
- Utilize powerful text searching of the document, using either Boolean or natural language syntax
- Filter by key document attributes, including filing date, filing type and document type
- Sort your results by relevance, date filed or company name
- Employ post-search filters to further refine your search results
- Scan your results with Keyword-in-Context highlighting of your text search terms
- Batch select documents to email and download all at once by adding them to the document cart
- Export results to Excel® or view as printable PDF
- Limit your search to filings by public companies, mutual funds or third parties

Here are some examples of how you can use this securities content:

- Pull Annual Reports to review companies' business descriptions and activity, communication to shareholders, directors & officers information, corporate governance statements, management's discussion & analysis, directors (management) reports, executive compensation, financials and shareholder information
- Review financial statements to gain insight into a company's fiscal health and growth, as measured by assets, revenue, cash flow, shareholder equity, liabilities, expenses and more
- Track new and ongoing securities offerings by companies seeking to raise capital, including initial public offerings
- View NI 43-101 reports to get detailed information on Canadian resource extraction companies
- See proxy circulars to see matters being considered by shareholders at a company's annual meeting

A Knowledge Mosaic® license also includes full access to our industry's best customer support, research assistance and training. Whether you need help refining a search or just want to get caught up on all our latest features and datasets, our experienced support staff is only a call or email away.
