

Lexis Advance[®] Minimum System Requirements

Supported Operating Systems

- Microsoft[®] Windows[®] XP
- Microsoft Windows 7
- Microsoft Windows 8
- Mac[®] OS X[®] - 10.x operating systems.

Supported Browsers

- Microsoft[®] Internet Explorer[®] 7.x, 8.x, 9.x, 10.x
- Chrome[™] browser 31.x
- Firefox[®] 25.x
- Safari[®] 5.x, 6.x

Notes: JavaScript[®] must be enabled for Lexis Advance[®] to run properly. Use your browser's advanced settings to enable JavaScript if it is not currently enabled.

You may have to disable your browser's pop-up blocker in order to use some features.

For fastest performance, enable the HTTP 1.1 protocols in your browser's advanced settings.

RAM

- 128 MB (256 MB or higher recommended)

Tip: If you generally run multiple applications or browser windows simultaneously, this will affect memory and overall performance, so higher RAM is recommended.

LAN Connection

- You will need a TCP/IP connection of suitable speed with Internet access.

Note: Local-area network (LAN) firewalls, proxy servers and network administration software (including virus scanners, other traffic on the network, etc.) may impact performance.

Processor

- **PC:** Pentium[®]/233 MHz (or above)
- **Mac[®]:** Power Mac[®] G3 (or above)

Modem

- Modem speed: 56K or above (ISDN, ADSL or cable modem recommended)

Tip: If your Internet service provider does not provide this modem speed, you may connect using the LexisNexis[®] Internet Dialer, provided to LexisNexis customers without additional charge.

For more information, call LexisNexis[®] Customer Support at 888-539-4722.
