Mine Data

If it affects your business, we track it. The State Net service collects every bill, resolution, executive order and ballot measure in each jurisdiction. We also collect reference materials published by state legislatures about specific legislation, such as fiscal impact statements or legislative committee analyses. In addition, we gather floor-vote information in all jurisdictions, and committee votes where those are recorded by the state.

You can use our state-of-the-art tools to isolate and track, or use our issue screening service that is defined by you and followed by us. Our experts carefully review new bills, regulations and updates so you can act on the topics that are most important to you.

Utilize robust filters to identify the exact measures that matter to you.
