BEGINNING YOUR RESEARCH IN VERDICT & SETTLEMENT ANALYZER

Verdict & Settlement Analyzer offers you access to more than 1.1 million jury verdicts and settlements with pre- and post-search filters for zeroing in on the results most relevant to your case.

To search using Verdict & Settlement Analyzer:

A. Enter your search terms, e.g., asbestos, in the Red Search Box. TIP: Use search connectors such as “and” to define relationships between multiple search terms, e.g., asbestos and mesothelioma.

B. To filter your search by Jurisdiction, Date or Practice Area & Topic, click Search Everything and then select the appropriate link to view and select from the available filters.

C. To begin your search, click Your search results are displayed.
LexisNexis Verdict & Settlement Analyzer reports provide a graphic view of verdict and settlement data for the cases in your results, presented through a number of charts and graphs. To view individual cases, select the document you want to view from the list of cases below the graphs.

**Note:** LexisNexis sometimes receives reports of the same case from multiple sources. While each case is represented in the total document count in your search results list, only unique cases are represented in the charts and graphs.

**A** Narrow By—Use these options in the left column to filter your results by specific categories. To select several criteria in a category, Select Multiple.

**B** Graphs—Summarize your results visually from several perspectives. Examine each one more closely for specific verdict information.

**C** Results List—Retrieve the names of relevant verdicts and settlements, and a brief summary of results for each. To read a full summary of an individual case, click on the case name in blue.
SORTING YOUR RESULTS LIST

By default, cases listed in the results list are sorted by relevance, with the most relevant cases appearing first in the list.

While viewing the results list, you can change this sort order by selecting the Sort by: pull down list and choosing a different option from the list. Sort either ascending or descending by document title, jurisdiction, court, resolution, awards or date.

VIEWING GRAPH DETAILS

While viewing the results page, you can select a specific graph on the page and view details about the cases associated with your search. Viewing specific details in each graph is the same as applying filters on the left side of the page.

A At the results page, locate the graph you want to view in detail and select Explore graph.

B Rest your mouse pointer over the different areas of the graph. Information appears in a tooltip, with instructions to select once more to narrow the case.

C Click on the portion of the graph in which you are most interested. Each of the reports is updated using the filtered data.

D To return to your original results after narrowing them one or more at a time, select the Clear link at the top of the Narrow By pane.

E To close the graph and view the thumbnail again, select the X at the top right of the graph.
WORKING WITH YOUR REPORT

You can print, download or email a copy of a case you are viewing in the cite list, or save it to one of your folders. This can be useful if you want to review the information later or share it with others in your firm or office.

1. View the results list. (To hide the graphs so you can view the results more easily, select the arrow next to the Graphs link.)
2. Either select the check box next to each document you want to deliver, or select the link to view a single full document.
3. Click the icon for the type of delivery you want to perform:
   - Add to a work Folder for later use.
   - Print your document.
   - Email to yourself or a colleague.
   - Download a PDF of your document. Choose new settings to customize a PDF report.
