

# Lexis® Learn | Elevate Your Classes

## What is Lexis® Learn?

Lexis Learn is an interactive learning platform to supplement your research curriculum. It's designed to help students learn legal research fundamentals outside of class so you can focus on in-depth content in class.

## How will Lexis Learn Enrich my Class?

**Relevant**—video tutorials cover basic and advanced legal research skills.

**Engaging**—interactive design fosters learning and appeals to millennials.

**Flexible**—assign any or all video modules to students for completion outside of class, freeing up class time for deeper instruction.

**Skills transferable**—skills learned can be applied to any research system.

**Track & assess**—a powerful dashboard includes detailed analytics to track completions and evaluate students' understanding of core research skills in Lexis Learn. For example, assess student progress through detailed analytics across all video tutorials assigned, or by a specific tutorial. For detailed information on analytics, click the Help button in Lexis Learn.

## Students Self-Enroll

Lexis Learn makes it easy for students to self-enroll and complete the modules they have been assigned. After signing in to [lexisnexis.com/lawschool](https://lexisnexis.com/lawschool) and selecting Lexis Learn, students select their professor's name and the name of the class. The modules the professor added to the class will display.

## Support

Use the Help button in Lexis Learn for detailed product information and instructions.

Contact your LexisNexis Representative for further information.

To review current modules, select Preview Modules in Lexis Learn.

## How to Access & Assign Modules

Step 1: Go to [lexisnexis.com/lawschool](https://lexisnexis.com/lawschool) and sign in using your Lexis® ID and password.

Step 2: Click **LEXIS LEARN** at the top of the page.

Step 3: Click **Create Class**.

Step 4: Name your class, e.g., "LR&W Section 1."

Step 5: Click the **Assign** button to select the modules you want to assign and due dates (under Manage Class Modules).
