Lexis Red® Installation Guide

Lexis Red® – Why are we releasing a new version?

The current version of Lexis Red available in the market supports all major operating systems. To provide a greater breadth in the scope of compatibility and features, Lexis Red 3.0 is the new version of this leading digital app, now delivering customers access via a broader range of operating systems and devices. The overarching aim of Lexis Red is to meet our customers' needs more effectively by providing access to essential legal content digitally, at any time and in any location.

New features of Lexis Red include:

- **Support across a broader range of operating systems**, including macOS, iOS, Android and Windows 7, 8.1+, plus expanded device compatibility to encompass iPads, tablets, PC/Mac laptop or PC/Mac desktop devices. (N.B. – Please note that phone and phablet compatibility is presently unavailable).
- **Performance improvements**, including faster download rates and automatic title updates. Plus, seamless navigation from opening titles to moving across titles as and when required.
- **A new look and feel!** Lexis Red provides a modern look, with a cleaner interface and intuitive navigability. In turn, this brings it in alignment with industry best practice standards.
- **An improved navigational experience.** Lexis Red now supports native user interface controls for each platform, in turn, helping users familiar with a specific platform to navigate with greater ease through the app as desired.
- **Tailored organisation of publications**, providing the ability to relocate and delete titles within the Publications screen as required.
- **Infinite scrolling** to allow users to move up and down a publication with greater ease.
- **Improved search capability**, allowing users to search a string of terms (as opposed to one-word searches only); with a greater breadth provided within the search results delivered a.k.a. stemming. For example, whilst searching the term “care,” the results will expand to encompass “cared, cares, caring” etc. Additionally, search results will be retained whilst a user is in a specific title.
- **Printing and emailing functionalities**, which allow documents to be printed directly from a publication.
- **Font re-sizing** providing greater legibility of content.
