Overview

- New welcome message for certain users
- New publication cover design
- Return borrowed titles on publications page
- Publication information available in Digital Library
- Annotations remain accessible even after loan title expires

LexisNexis®

New publication cover design

Problem statement: The cover designs in Lexis Red appeared out of date and were not appealing to many users.

Solution: New cover designs have been created which update the experience and appeal to the familiarity of the hardcopy covers.

New welcome screen for certain users

Problem statement: First time Red users were confused about how to get started with Red publications.
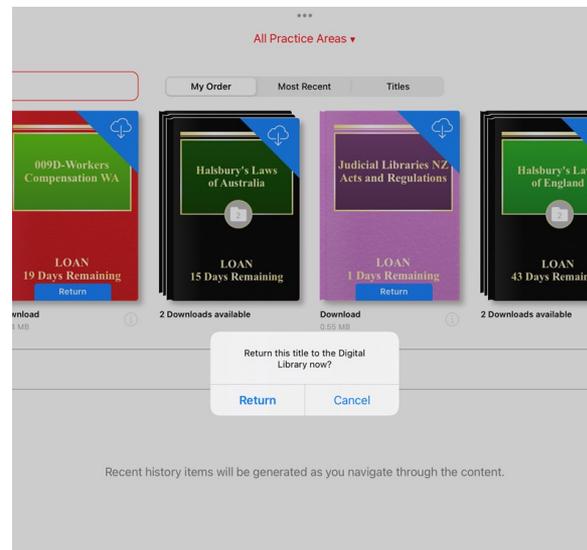

Solution: Users who log in to the Lexis Red app for the first time or after a prolonged absence, or who have no downloaded publications, will be greeted with a welcome screen listing the different ways to get content on Red. This welcome screen will only be shown to users who are on accounts with the Digital Library enabled.

Return borrowed titles on publications page

Problem statement: Users want to be able to return borrowed titles in the Lexis Red app without having to open the Digital Library, saving them time and steps.

Solution: Users will now be able to return borrowed titles from the publications page in the Lexis Red app by clicking the "return" button on the publication cover.

# Publication information available in Digital Library

Problem statement: Users want to know more about a publication before deciding whether or not to borrow it from the Digital Library.

Solution: Users will now be able to view information about each publication in Digital Library by clicking on the iModal icon ⓘ next to the title of the publication. This will display a pop up containing a description of the publication, the table of content, a list of recent updates and other relevant information.

Annotations saved to the cloud and remain accessible even after a publication expires

Problem statement: Users want their annotations to persist between instances of borrowing a publication so that they don't lose their valuable work.

Solution: A user's annotations and highlights on a publication are saved to the cloud and will be accessible if the user re-loans the publication.
